

Next Steps

Have your say!

We would like your feedback on the information presented regarding height in the Historic Area.

Please take a moment to tell us what you think by completing a feedback form. You will be asked your opinion on:

- Objectives for the study and its outcomes;
- General building heights in the Historic Area (General Height); and,
- The role, number, and range of heights of taller buildings (Special Sites) that you feel are appropriate in the Historic Area.

Next Steps

Once public consultation has concluded, staff will review the feedback received and prepare recommendations for consideration by City Council. It is anticipated that a report to Council will be made in July 2009.

Information on the Historic Area Height Review can be found online at:
