April 6, 2000

## Wall Construction on Clark Drive at First Avenue Will Cause Delays

Construction of retaining walls on the west side of Clark Drive, from Graveley Street to Second Avenue, will begin April 10, 2000 and will continue until the end of July.

The work will remove the southbound curb lane and reduce the number of traffic lanes from six to five. Motorists should expect delays and may want to consider alternate routes.

The project will construct new retaining walls to allow for the widening of the intersection of Clark Drive and First Avenue. Following the completion of the retaining walls, construction will begin on left turn bays from north and southbound Clark Drive to First Avenue. It is anticipated that left turn bays will be completed by the end of August.
