

Commercial Parking Options

Two measures that help provide businesses with parking are:

1. Time limited parking regulations
2. Metered parking regulations

Time Limited Parking Regulations (2 Hour limit)

The City of Vancouver, under the Street & Traffic By-law 2849, may permit a vehicle to park on the street for up to a set time limit to create a reasonable level of parking turnover. These regulations are typically valid only during the day, to provide short term parking for customers of commercial areas.

Metered Parking Regulations

Metered parking has been recommended in areas where there is a significant demand for short term parking

For more information about residential parking, please visit our website at: vancouver.ca/engsvcs/parking/admin
