

File No. 04-1000-20-2016-466

January 16, 2017

s.22(1)

Dear s.22(1)

Re: Request for Access to Records under the Freedom of Information and Protection of Privacy Act (the "Act")

I am responding to your request of December 2, 2016 for:

1. Entire (18 page) document called Point Grey Road Sidewalk Widening Details (see attached page 17 of 18); and
2. Any reports, emails and submissions for proposed seating arrangements (benches in circles, some with bike racks as per Drawing No. 2016-20-D.L. 4.1) as part of Phase 2 construction on Point Grey Road from August 1, 2016 to November 30, 2016.

For part one of your request, the Transportation Design Branch has informed us that you were provided with page 17 of the *Point Grey Road Sidewalk Widening Details* as a courtesy only. The remainder of the document is still in draft form and has not been approved to date and is therefore being withheld under s.13(1) of the Act. We are recommending that you make a new FOI request for the final document in approximately 30 to 60 business days.

For part two of your request, all responsive records are attached. Some information in the records has been redacted, (blacked out), under s.16(1)(c) of the Act. You can read or download this section here:

http://www.bclaws.ca/EPLibraries/bclaws_new/document/ID/freeside/96165_00

Under section 52 of the Act you may ask the Information & Privacy Commissioner to review any matter related to the City's response to your request. The Act allows you 30 business days from the date you receive this notice to request a review by writing to: Office of the Information & Privacy Commissioner, info@oipc.bc.ca or by phoning 250-387-5629.

If you request a review, please provide the Commissioner's office with: 1) the request number assigned to your request (#04-1000-20-2016-466); 2) a copy of this letter; 3) a copy of your original request for information sent to the City of Vancouver; and 4) detailed reasons or grounds on which you are seeking the review.

Please do not hesitate to contact the Freedom of Information Office at foi@vancouver.ca if you have any questions.

Yours truly,

A handwritten signature in black ink, appearing to be 'B. Van Fraassen', written in a cursive style.

Barbara J. Van Fraassen, BA
Director, Access to Information
City Clerk's Department, City of Vancouver

Attachments: LSK150916-1 Removal of seating area.pdf

David, Jeff

The Park Board have plans to daylight Tatlow Creek through Volunteer Park. It seems the creek enters the park exactly where I have proposed a little seating area. D'oh! We will need to delete this seating area.

I've marked up a draft drawing showing which one should be deleted.

Hi,

Thank you both for coordinating – yes please let's work together on the design of this section over the next year, I think we have a great opportunity here to celebrate the stream and have more for residents to experience.

I mentioned this to Paul Storer, he seemed amenable.

Cheers

Tiina

Subject: RE: Pt. Grey Road & Tatlow Park

Hi Paul,

Thanks for the update. Early concepts of the daylighted stream show it entering Volunteer Park almost exactly where the seating area is proposed. Until the final concept is approved, it is best to leave the section along Volunteer & Tatlow Parks clear of any bike related features.

And yes, I think having some sort of indication along the bike route that people are crossing a 'stream' is a great idea. Just

another great feature to add to their route!

I'll keep you posted on what's happening with the park. I'm hoping to get the RFP out this fall.

Cheers!

Subject: RE: Pt. Grey Road & Tatlow Park

Hi Amy

The Pt. Grey Road project will not impact Tatlow Park. We've spent a great deal of time going out to the public with our proposals.

We are proposing on small seating area (seating area 9) at the edge of Volunteer Park and I attach a draft drawing illustrating its location. Please review and let me know if I should delete this one area from the plans.

Exciting news re the daylighting. When we were developing the plans for the closure of Pt. Grey Road, the idea of the bike route going over a bridge over the daylighted (is that a word?) stream was raised. Could be a cool feature.

Subject: Pt. Grey Road & Tatlow Park

Hi Paul,

Could you give me a quick update on the Pt. Grey Road project? We've had some inquiries about how it may affect Tatlow Park. Has engineering gone out to the public yet or did the survey just raise some premature concerns from the residents?

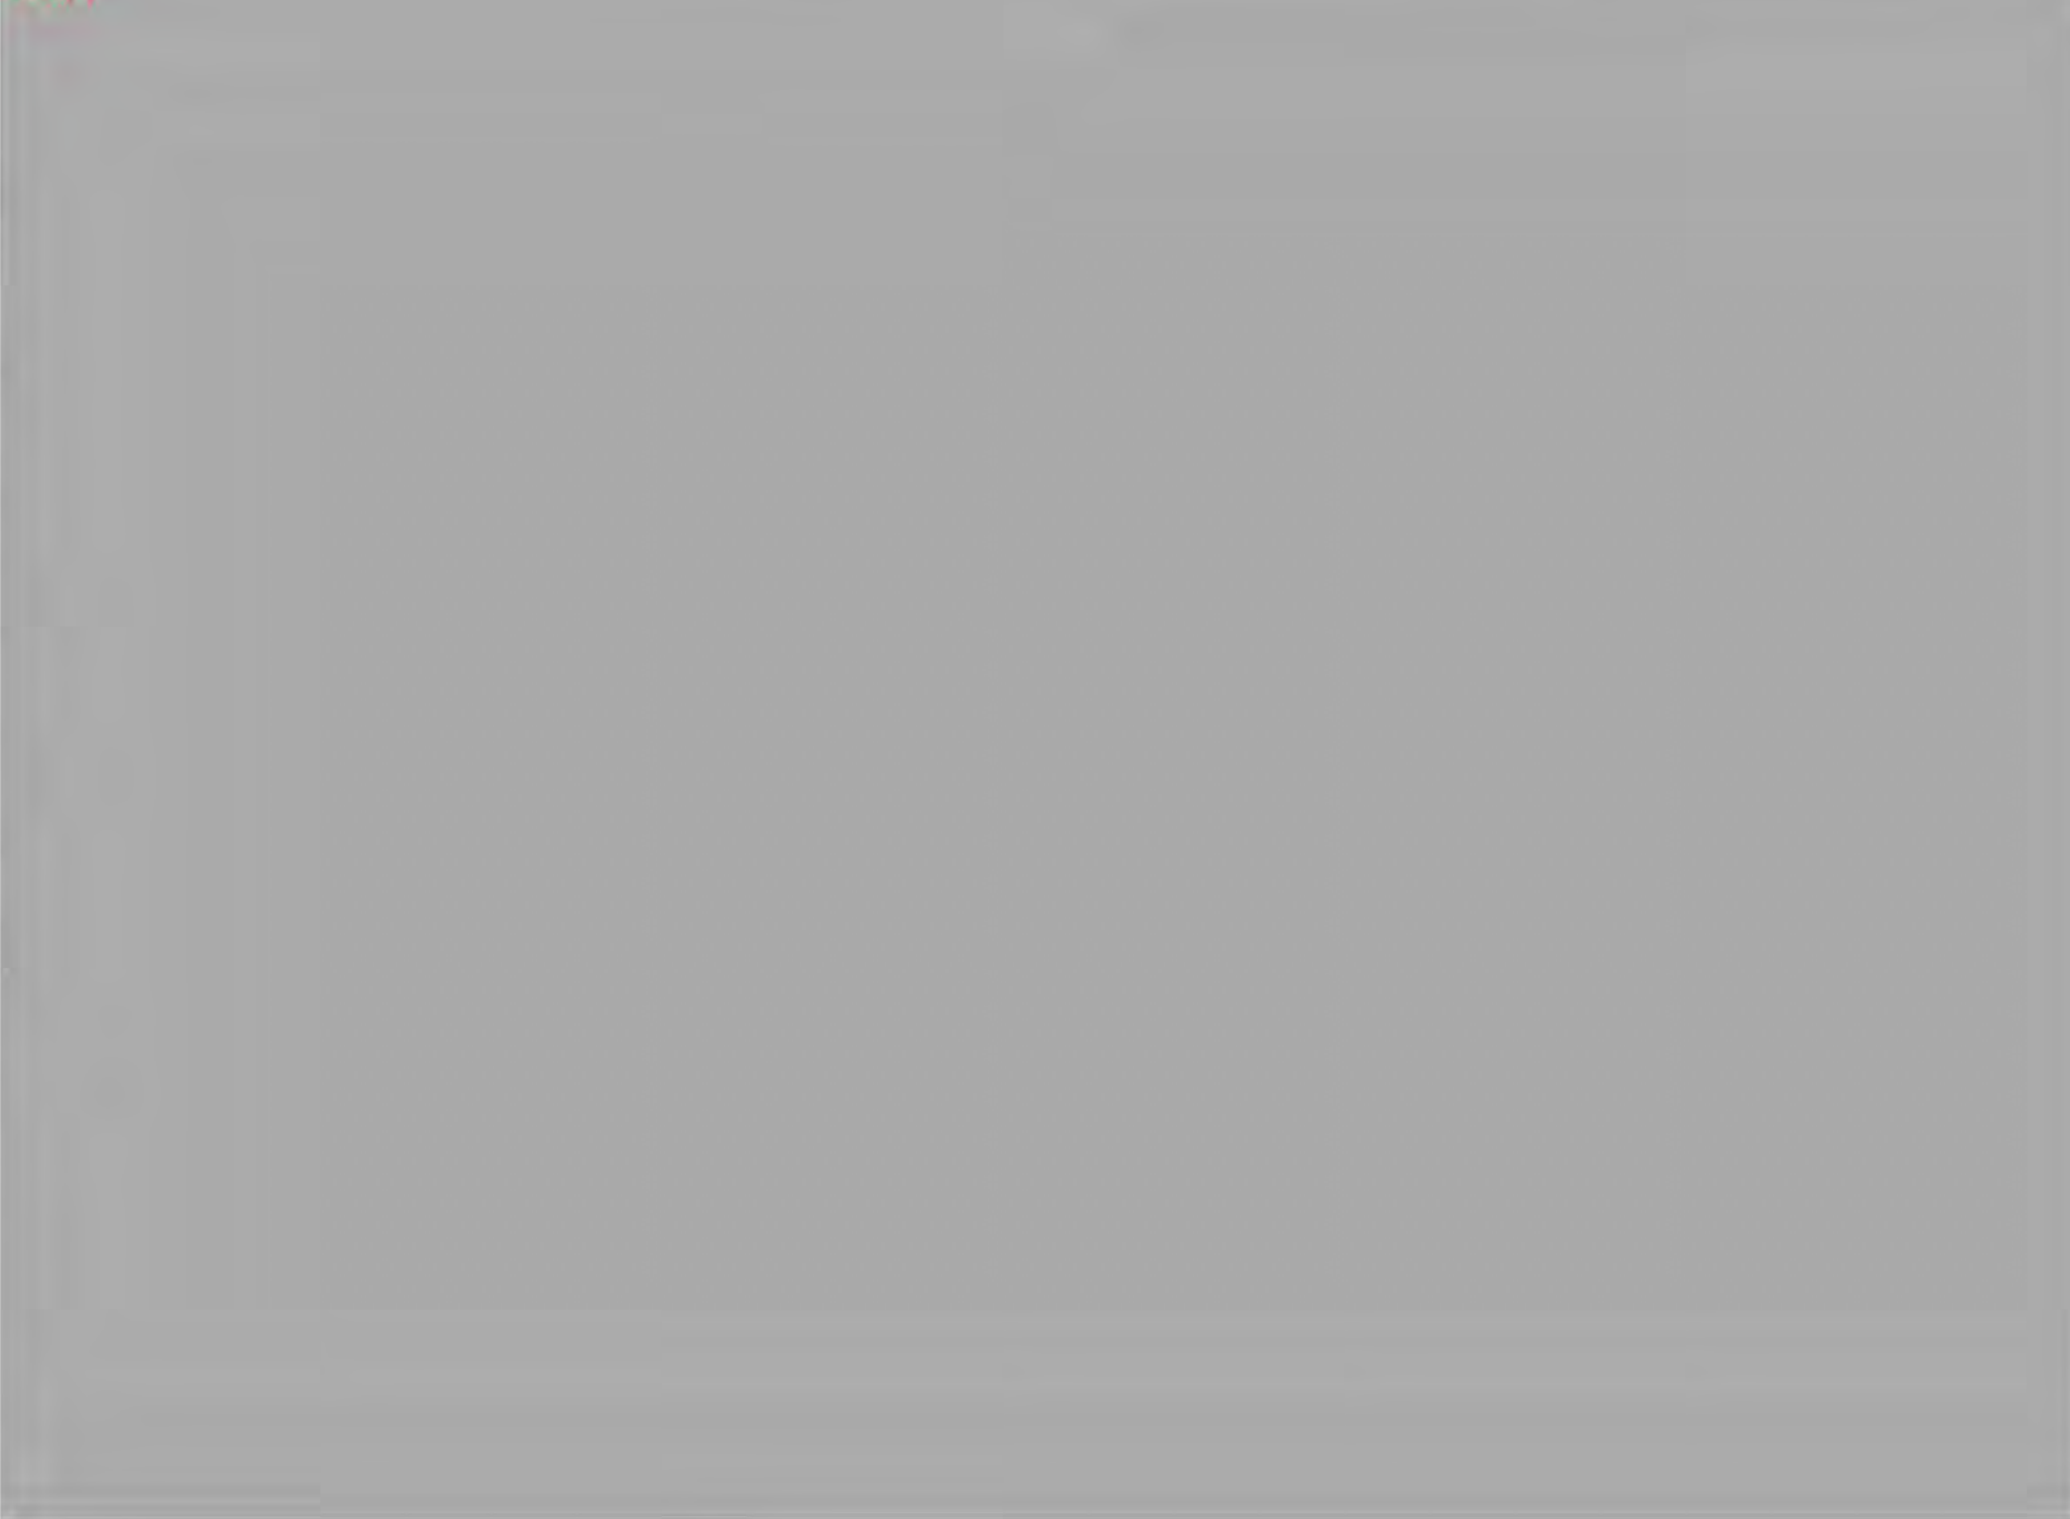

As an aside, we're hoping to get s.16(1)(c). The focus will likely be on the North side (Volunteer Park) but the project will visually change that section of the greenway (in a good way!). I know we had talked about the proposed rest stations along the greenway but wanted to check in to see if you are proposing one there. It would probably be too much in one spot if we're already upgrading the park. Anyways, something to discuss.

Thanks for your help!

Thanks Sam.

Paul, thanks for the sketch it really helps. Anyways, the light distribution of the proposed pole is pointing north while 2/32 'AT' is to the south. To achieve the uniformity of the lighting level, we normally need to have at least an even spacing between each poles, otherwise we will have dark spot on certain area. If the supplier can achieve the design criteria as per your recommendation, then we will have no problem. I'll keep you posted.

Subject: RE: PGR electrical design

Armando

Thanks for the drawing.

The new pole – though half way between 1/32 and 3/32 is kind of floating in space and is very near 2/32'AT'.

There is a seating area to the east of the new pole. Can this pole be associated with the seating area as shown in the attached sketch, I appreciate it reduces the light levels between it and 3/32 but it would make sense associated with the seating – and it avoids being in the middle of the open view across the park to the water.

Subject: RE: Point Grey Road - Drinking Fountain at Jean Beaty Park

Hi Paul,

You are correct. If there are no plans to regrade the park, then we should have a constant 1% slope towards the road. We do not want to create a low point at the back of the slab.

Thanks for pointing this out!

Have a good weekend,
Joyce

Joyce

I'm not sure that will work. I've attached a PDF from Streetview showing that the park is mounded in the area of the fountain. By sloping back towards the park we may be creating a puddle at the back of the slab. May be best for it all to slope towards the street. Obviously this will not change the elevation at the centre of the slab.

Hi Paul and Sam,

Please see the attach markup of the drawing. The concrete slab should slope 1% towards the road from back of walk, and 1% towards the park (north of back of walk).

The elevation at the center of the fountain slab, at the back of walk) is 14.23.

Please let me know if you have any questions.

Thanks,
Joyce

We are proposing a drinking water fountain at Jean Beaty Park – drawing attached, see seating area 1.

Water Ops will be in the area soon installing the water connection, drain and valve structure. They will need the elevation for the concrete slab surrounding the fountain in order to install the valve. Can you get this info to Sam asap?

Subject: Point Grey Road - Electrical/Landscape Coordination

Armando

Thanks for the CAD drawing illustrating the lighting layout. I've compared this to the landscape and geometric drawings and have a few comments/requests:

1. There is a great deal vying for space in the front boulevard. Can we ensure that all proposed features are set out before things like the junction boxes are installed? **Yes, we can coordinate this thru Ops. Thanks.**
2. I note that the pole locations have been modified slightly in a number of places. I have moved the affected trees away from these poles where possible. **Don't move it yet, I will double check the pole locations Thanks.**
3. The electrical drawing is not using the latest geometric base. This is notable with pole 1/36 (I note that the nearest possible locations, the front boulevard to the east or west of the driveway to 3607 has the proposed water main running down the middle of this boulevard). **Pole 1/36 will be moved to the grass blvd east of the driveway. Thanks.**
4. JB's #5 and #6 to the east of pole 1/36 are located in the sidewalk as opposed to the boulevard. Do these need

- special covers? JB's are City's standard and approved for sidewalk used. Thanks.
5. JB's #5 and #5 at the north west corner of Dunbar appear to be in existing sidewalk that is not identified for renewal. We usually throw conduit whenever there's opportunity, yes, we can delete this JB's and just run conduits north at the back of curb and stub off where the new curb ends. Thanks.
 6. JB's #6 and #3 east of 9/33 conflict with a seating area. Can they move closer to the light pole? YES, will do Thanks.
 7. JB #6 between pole 3/33 and pole 1/33 is very close to a seating area. Can this JB be moved 1.5m to the east (this will also get it clear of a gas line)? YES, will do Thanks.
 8. Pole 7/32 is in conflict with a proposed tree. I have moved this tree as far west as possible but can the pole also move 1m to the east (though I note there is an existing sewer/storm connection very close to this)? this pole is actually 1.4m east of Hydro pole, is this works for you? The drawing sent to me shows the pole 5.6m east of the hydro pole. It would be fine if 1.4m east of the pole.
 9. The shape of the tree adjacent to pole 3/32 will not allow the conduit to be installed as shown. Can it be located along the centre of the existing sidewalk up to JB #3? Yes, but we'll see if there's no conflict on existing utilities. Thanks.
 10. The #3 JB west of pole 1/32 conflicts with a proposed tree. Can this box move to the east of the proposed hydro pole location? YES, I'll move it east of driveway Thanks.
 11. Pole 1/31 is located on top of a proposed hydro pole. Pole 1/31 will be moved close to proposed ramp Thanks.
 12. The JB #6 west of pole 1/31 conflicts with a proposed tree. Can it be moved to the east 1.5m? no more room at 1.5m east, how about a meter to the west? Can you do 3m to the west? Or to the east of the ped ramp?
 13. JB #6 west of 13/29 is located in paving whereas the adjacent JB #5 is in the front boulevard. Can both be in the front boulevard? All JB's west of pole 13/29 will be moved to east of tree due to proposed water pipe Thanks. I was also asked to move the tree away from the new pipe location. The tree is now 4.25m east of the ped ramp.
 14. JB's #3 and #6 west of pole 1/29 conflict with a proposed tree. Can these boxes be moved to the east of the adjacent pedestrian ramp? I'll keep #3 JB and move #6 JB to the east of new ramp

Regards

Hi Paul,

I spoke to Joe & Tiina and both thought shifting the circular feature south so it doesn't encroach into the park would be the best solution.

Please let me know if you have any questions or need any clarification on this.

Thanks!

Amy

Subject: Point Grey Road - Phase 2 - Seating Area adjacent to Jean Beaty Park

Good morning Elizabeth

We are developing a scheme to widen the sidewalk along the northern side of Point Grey Road between Tatlow Park and Alma St. Part of this work will include the provision of a number of seating areas along the route.

One of these proposed seating areas is located at the south east corner of Jean Beaty Park. I attach a sketch of the layout (*LSK250716-1*) and a streetview snapshot of the area. You will note that there is a small segment of the seating area that protrudes into the actual park site. In addition the new sidewalk is on a different alignment to the existing path and will remove the southwest corner of an existing planted mound.

It would be good to meet on site to go over these proposals and discuss the impact to the park space. Are you available this week?

Sam

I answered some of these questions yesterday. With regard to question 1. I have looked at combining the fountain with the adjacent seating area but have very little room to play with so I would like it to stay where it is currently shown. To this end I have produced a draft setting out drawing for this fountain and adjacent seating area. I have shown the underground chambers associated with the fountain, note that I have asked that these be kept out of the line of the sidewalk.

Subject: RE: Proposed Drinking Water Fountain - Point Grey Road

Paul,

Thanks for your design. I'm working to move the process along for the fountain. Few questions that were brought up here in Water:

1. Would it be possible to shift the fountain east to be near the proposed Seating Area? Our thought is if it's right by the seating area, it may receive more use
2. Colour of fountain?
 - a. Typ. Blue (eg. At cambie and 10th: https://www.google.ca/maps/@49.2622569,-123.1146467,3a,75y,45.53h,81.22t/data=!3m6!1e1!3m4!1swZsOKDL_YT77dILvclKFLQ!2e0!7i13312!8i6656!6m1!1e1) or
 - b. Typ. Green / Black if installed along a greenway
3. What type of fountain would you like?
 - a. Typically, fountains installed along greenways and cycling routes are HAWS 3800FR.
 - b. Would you like a dog bowl?
4. What's the orientation of the fountain?

Cheers

SL

I am proposing the installation of a drinking water fountain along Point Grey Road at Jean Beaty Park. I have attached a pdf of where this would fit in relation to the new sidewalk. I have allowed \$20,000 in the budget for Public Realm work for this item (I had been discussing this with Megan Pate before she moved roles).

Are you ok with the fountain here, and is the \$20,000 enough?

Subject: RE: Pt. Grey Road & Tatlow Park

Hi Paul,

Thanks for the update. Early concepts of the daylighted stream show it entering Volunteer Park almost exactly where the seating area is proposed. Until the final concept is approved, it is best to leave the section along Volunteer & Tatlow Parks clear of any bike related features.

And yes, I think having some sort of indication along the bike route that people are crossing a 'stream' is a great idea. Just another great feature to add to their route!

I'll keep you posted on what's happening with the park. I'm hoping to get the RFP out this fall.

Cheers!

Subject: RE: Pt. Grey Road & Tatlow Park

Hi Amy

The Pt. Grey Road project will not impact Tatlow Park. We've spent a great deal of time going out to the public with our proposals.

We are proposing on small seating area (seating area 9) at the edge of Volunteer Park and I attach a draft drawing illustrating its location. Please review and let me know if I should delete this one area from the plans.

Exciting news re the daylighting. When we were developing the plans for the closure of Pt. Grey Road, the idea of the bike route going over a bridge over the daylighted (is that a word?) stream was raised. Could be a cool feature.

Subject: Pt. Grey Road & Tatlow Park

Hi Paul,

Could you give me a quick update on the Pt. Grey Road project? We've had some inquiries about how it may affect Tatlow Park. Has engineering gone out to the public yet or did the survey just raise some premature concerns from the residents?

As an aside, we're hoping to get s.16(1)(c). The focus will likely be on the North side (Volunteer Park) but the project will visually change that section of the greenway (in a good way!). I know we had talked about the proposed rest stations along the greenway but wanted to check in to see if you are proposing one there. It would probably be too much in one spot if we're already upgrading the park. Anyways, something to discuss.

Thanks for your help!

Amy

Hi,

Thank you both for coordinating – yes please let's work together on the design of this section over the next year, I think we have a great opportunity here to celebrate the stream and have more for residents to experience.

I mentioned this to Paul Storer, he seemed amenable.

Cheers

Tiina

Hi Paul,

Thanks for the update. Early concepts of the daylighted stream show it entering Volunteer Park almost exactly where the seating area is proposed. Until the final concept is approved, it is best to leave the section along Volunteer & Tatlow Parks clear of any bike related features.

And yes, I think having some sort of indication along the bike route that people are crossing a 'stream' is a great idea. Just another great feature to add to their route!

I'll keep you posted on what's happening with the park. I'm hoping to get the RFP out this fall.

Cheers!

Amy

Hi Amy

The Pt. Grey Road project will not impact Tatlow Park. We've spent a great deal of time going out to the public with our proposals.

We are proposing on small seating area (seating area 9) at the edge of Volunteer Park and I attach a draft drawing illustrating its location. Please review and let me know if I should delete this one area from the plans.

Exciting news re the daylighting. When we were developing the plans for the closure of Pt. Grey Road, the idea of the

bike route going over a bridge over the daylighted (is that a word?) stream was raised. Could be a cool feature.

Regards

Paul Lightfoot
