

8 RILEY PARK "KNOT"

"KNOT"

KEY FEATURES:

- strong pedestrian connections both east-west and north-south
- enhances pedestrian environment along and across Ontario Street
- parking alignment along east edge buffers park uses from residential area
- maximum flexibility for new green space use, including informal sports fields
- children's play area close to community kitchen and away from Ontario Street traffic
- multi-use structure design likely costs more to construct
- multi-use structure design likely less flexible in use
- less green space overall than other options
- possible farmer's market location less convenient to parking lot

9 RILEY PARK "SEAM"

"SEAM"

KEY FEATURES:

- optimizes amount of green space
- multi-use structure design more cost-efficient
- multi-use structure design more flexible in use
- possible farmer's market location very convenient to adjacent parking lot
- smaller and separate community garden areas
- possible farmer's market located close to adjacent residential area
- less emphasis on enhancing pedestrian connections across Ontario Street
- children's play area more isolated from community kitchen, communal gardens and multi-use structure

10 RILEY PARK "PATCH"

"PATCH"

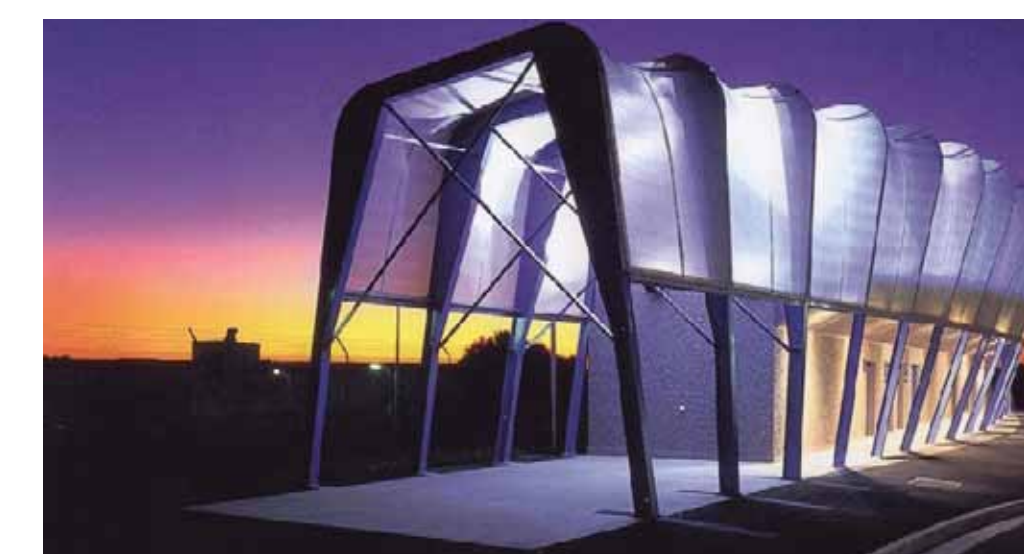

KEY FEATURES:

- possible farmer's market location very convenient to adjacent street (Ontario) and away from residential area
- enhances pedestrian environment along and across Ontario Street
- strong north-south pedestrian connection across park between residential areas
- parking lot faces onto residential street (E 30th)
- children's play area location is further from community kitchen and communal gardens, and closer to Ontario Street
- consolidates green space toward south with less green space along Ontario and E 30th
