* The Census, including the short and long-forms, is a mandatory survey of Canadians living in private dwellings; the short-form surveys 100% of the population and the long-form survey 25% of the population. In 2011, information regularly collected via the long-form was collected as part of the voluntary National Household Survey (NHS). Response rates for the NHS were lower (68% nationally) than that of a typical long-form census (e.g., in 2016 the long-form had a 97% response rate). The lower response rate observed in the NHS may introduce non-response bias and influences the extent to which the results of these surveys can be compared over time.

** The City of Vancouver excludes the Musqueam IR lands, but includes Stanley Park.

*** Adjusted to 2016 \$ (CAD).

Notes:

Occupied Dwelling are those with a household living in them. The change to the definition of households (already noted) also affects the number of occupied dwellings.

In 2006 there were changes made to the definition of households. A number of Single Room Occupancy and Seniors facilities were considered to be dwellings in 2001 and collective dwellings in 2006. This was repeated in 2011 and 2016, when more housing was reclassified. This reduces the number of dwellings (particularly apartments under 5 storeys). As a result the residents of those buildings would not be considered

In 2006 there was a change made to the definition of duplex. While it is still defined as a dwelling in a building with two dwellings, one above the other, in 2001 these were only detached properties, while in 2006 they can be joined to other similar properties. In 2006 Statistics Canada also seem to have identified more duplexes than before.

In 2006 there were changes made to the definition of households. A number of Single Room Occupancy and Seniors facilities were considered to be dwellings in 2001 and collective dwellings in 2006. This was repeated in 2011, when more housing was reclassified. to be households in 2006 or 2011. This reduces the number of dwellings (particularly apartments under 5 storeys). As a result the residents of those buildings would not be considered

A number of changes were made to the census family concept for 2001 which account for some of the increase in the total number of families, single parent families and children living at home
