

GOAL: *Enable the conservation and promotion of Grandview-Woodland's many heritage assets..*

Grandview-Woodland has a unique local character – one that has its roots in the diversity of its residents and visitors. But it is also a character shaped by the palette of older heritage homes and newer architectural traditions, the intriguing streetscape and landscape features, the many social practices that define the neighbourhood, and the different layers of industry, culture and commercial activity.

The new Grandview-Woodland Community Plan will be built around three key heritage strategies.

- OBJECTIVES:**
- 1.0 Increase the understanding of 'heritage' by utilizing a values-based approach to identify neighbourhood heritage
 - 2.0 Increase recognition of the many heritage resources that exist in Grandview-Woodland
 - 3.0 Ensure sufficient incentives to encourage protection of local heritage resources
