

Millennium Development Company Profile

Company Focus

MILLENNIUM™, member of the Armeco Group, is a progressive Canadian company with international vision. Its real estate developments encompass shopping centres, office buildings, mixed use complexes, residential towers, and verdant master planned communities, commercial and industrial centres.

Company Strength

Its in-house construction management expertise, born out of years of experience with complex construction systems and building techniques, and its retention of experienced consultants, enables it to closely review the design, budget, and building processes. In this way, it is able to develop the highest quality buildings in a cost-efficient and timely manner. And it draws on the depth and breadth of its international affiliates to keep it abreast of global happenings.

Award Winning Developments

Water's Edge (West Vancouver), Lumière (Vancouver), Bristol at Hampton Place (UBC Endowment Lands), Edgewater (West Vancouver), One University Crescent (SFU Burnaby Mountain), One Park lane (North Vancouver) and the master planned community of City in-the-Park (Burnaby)

Corporate Social Responsibility

Millennium is a company that continually strives to achieve the highest standards of social, ethical, environmental, and business practices in all facets of its work. It believes that its strong commitment to corporate social responsibility will not only help the company prosper but will also bring sustainable social and economic benefits to the communities in which it does business.

Olympic Village

In 2006 the Millennium Group won the right to become the developer of the Vancouver Olympic Village by presenting to the City of Vancouver a comprehensive development plan supported by award winning expertise. In addition, Millennium committed to work closely with the City to support improved access to jobs, training and procurement opportunities for residents and businesses in Vancouver's inner-city neighbourhoods.

During the Games the Village will house the athletes and officials of the 2010 Winter Olympics. The housing, along with commercial and retail space, the core of the community centre, will be a sustainable "green" for the residents of Southeast False Creek after the games.

Olympic Village Community Benefit Agreement

Guided by the principles of its corporate social responsibility policy, Millennium strives to do business with companies whose actions and business principles will contribute to the revitalization of Vancouver's inner-city communities. To this end, Millennium has partnered with the City of Vancouver and Building Opportunities with Business Inner-City Society (BOB), a non-profit economic development agency committed to working cooperatively with community agencies and local area businesses to the benefit of the inner-city.
