MARKET RESEARCH

## ➤ Introduction

- 502 telephone interviews with Metro Vancouver adults, 18 years and over
- Margin of error:  $\pm 4.4\%$  at 95% confidence level in the most conservative case; 6 percentage point spread required between measures
- Industry-standard, multi-stage random selection techniques employed
- Municipal quotas ensure the population is represented according to its actual distribution
- At tabulation stage, weighting adjustments bring basic characteristics of age, gender and region into their correct known proportions based on Statistics Canada population figures
- Interviewing conducted June 10<sup>th</sup> - June 21<sup>st</sup>, 2009
