2009 Public Feedback:

- Heritage character and scale most important
- Strong opposition to taller towers
- Balanced views on moderate height increases in some sub-areas
- Support in Chinatown for moderate height increase
- Concern for impact of development on the low-income community

HAHR Overview

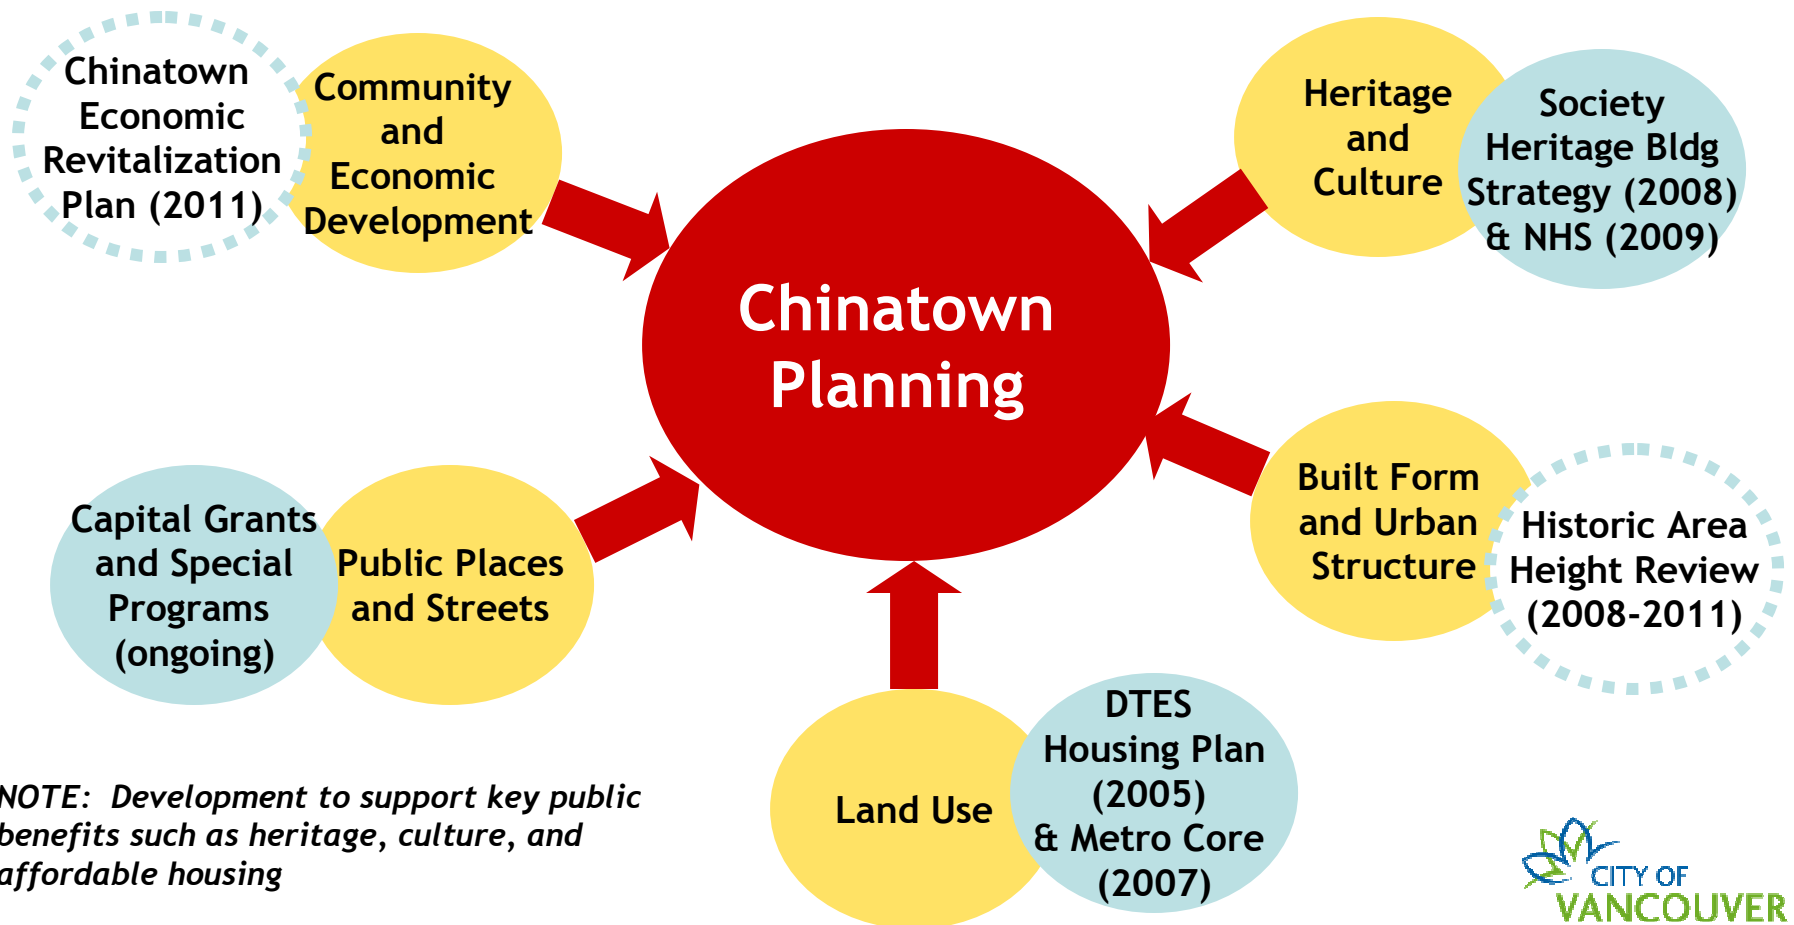

In January 2010, City Council:

- Affirmed importance of Historic Area's social, cultural, economic, and built form value
- Affirmed building height and scale should reinforce the heritage context
- Determined appropriate building heights to be between 50 ft. to 120 ft. (previously up to 90ft.)
- Endorsed a moderate height increase in Chinatown to consider innovative heritage, cultural and affordable housing projects (Rezoning Policy for 120ft.)
- Requested report back on additional higher building sites in Chinatown South (HA-1A) to support economic revitalization (Rezoning Policy for generally 150 ft.)
- Directed staff to report back with implementing policy for all decisions.
