Subject: Recommendation D - question re GHG impact of

---

Good afternoon Mayor and Council,

I am writing to follow up to Councillor Boyle's question this morning regarding the impact of delaying the zero emissions building requirements for 1 year.

Based on the expected number of homes that would be heated with natural gas during this potential delay, the direct impact is expected to be 1,000 tonnes/year. Given the complexity of forecasting the secondary impacts from a delay, staff are not able to provide a detailed forecast of those impacts at this time.

I hope that information is useful.

Best,  
Paul
