**Subject:** Weather this evening and tonight

Greetings Mayor and Council-

As you've likely heard, there may be extreme weather this evening throughout the region.

For Vancouver, Weathernet is reporting rain accumulations 15 to 20 mm starting around 5pm. Rain will continue through the night. Of more concern is the wind. Wind will be ESE with gusts of around 60KPH around 7 to 8pm. Wind will increase with the highest gusts coming later tonight to early morning. Wind speeds will be around 65 to 70KPH at this time.

While these conditions don't trigger our extreme weather plans, we are convening a call with key departments and will have resources on call and working throughout the night.

I'll keep you posted if conditions change or become more extreme.

Thanks

Sadhu

Sadhu Afochs Johnston
