**Subject:** Weather today

Greetings Mayor and Council

Weathernet is reporting light snow this morning with accumulation up to two cm. at higher elevations. This will turn to rain at around 10am leading to wet roads from then on.

Streets will have 5 trucks out doing the main arterials and priority hills. We also have a jitney doing bike lanes and priority hills as well as a Kubota doing bike lanes.

Thank you to Marco Biagini from engineering for preparing this update and for being on top of the response this morning.

Best

Sadhu
