Dear s.22(1)

Re: Request for Access to Records under the Freedom of Information and Protection of Privacy Act (the "Act")

I am responding to your request of July 3, 2018 for:

Information referred to by the Transportation Department in making the decision to ban cars (temporary or permanently) from using the Adanac Overpass and how it fits into the City's related 40 Year Transportation Plan.

Date Range January 1, 2016 to July 3, 2018.

All responsive records are attached. Some information in the records has been severed, (blacked out), under s.13(1), s.15(1)(I), and s.22(1) of the Act. You can read or download these sections here: http://www.bclaws.ca/EPLibraries/bclaws new/document/ID/freeside/96165 00

Please note that there were also eight short videos of traffic near the described area that were provided as part of the responsive records. These videos are being withheld under s.22(1) of the Act in order to maintain the privacy of residents and vehicles that appear in the videos.

Under section 52 of the Act, and within 30 business days of receipt of this letter, you may ask the Information & Privacy Commissioner to review any matter related to the City's response to your FOI request by writing to: Office of the Information & Privacy Commissioner, info@oipc.bc.ca or by phoning 250-387-5629.

If you request a review, please provide the Commissioner's office with: 1) the request number (#04-1000-20-2018-358); 2) a copy of this letter; 3) a copy of your original request; and 4) detailed reasons why you are seeking the review.

Yours truly,

Cobi Falconer, FOI Case Manager, for

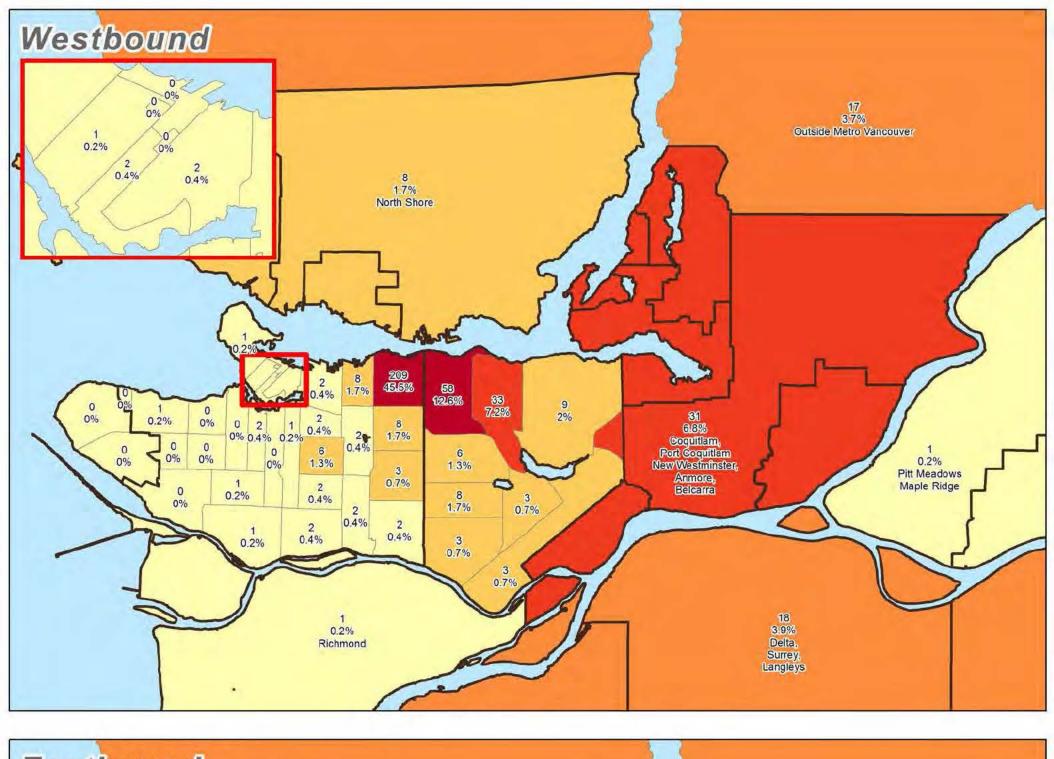

Barbara J. Van Fraassen, BA Director, Access to Information & Privacy

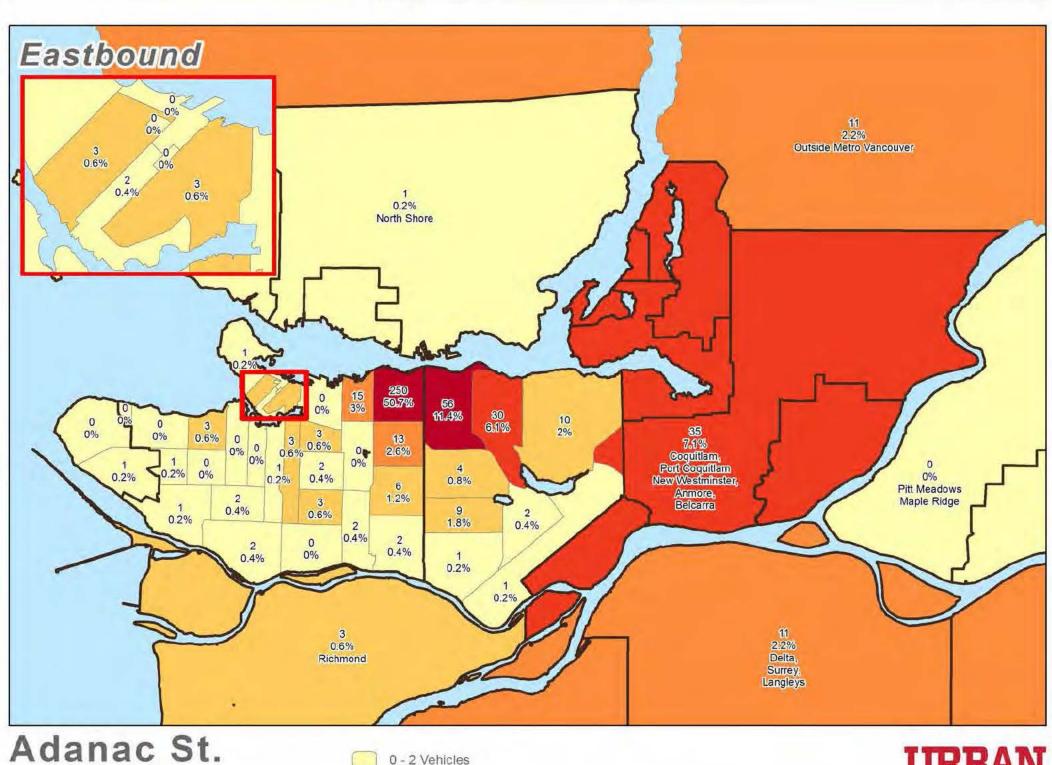

<u>Barbara.vanfraassen@vancouver.ca</u> 453 W. 12th Avenue Vancouver BC V5Y 1V4

*If you have any questions, please email us at foi@vancouver.ca and we will respond to you as soon as possible. Or you can call the FOI Case Manager at 604.871.6584.

MEMORANDUM

March 23, 2017

TO: Stephanie McNeely

FROM: Tim Barton

SUBJECT: Adanac/ Cassiar Transit Connections

Purpose

- Concerns over through cutting vehicles using the Adanac Bridge rather than staying on arterial routes. There is a higher volume of vehicle traffic on the bridge than we would like given its use as a busy cycling corridor. Therefore traffic calming options are being considered, which could impact transit services as the #27 route crosses the bridge.
- This is not specifically to do with the Adanac bicycle route. Separated lanes could be provided over the bridge whilst still allowing transit access.
- The Memo provides an assessment of existing transit operations and infrastructure. It also provides an exploration of future transit options as it relates to traffic calming options for the neighbourhood. Some options could involve closing the Adanac Bridge to motor vehicles.

Existing Transit Conditions

- The #27 currently uses the Adanac Bridge as part of its route between Kootenay Loop and Joyce Station. For the majority of its route it uses Rupert Street.
- Frequency: Every 15 minutes at peak times. Every 20 minutes outside of peak times.
- Stop spacing: varies and can be reviewed once a strategy is decided upon.
- Stop location: The last northbound stop before Adanac is farside Parker Street. The last NS stop after Adanac Bridge is on Adanac, between Cassiar and Skeena. The last southbound stop before the bridge is on Adanac, FS Skeena. After the bridge it is on Rupert, FS Adanac.
- The route has good on time performance, no bus bunching but low average speed. There is no overcrowding, with reasonable spare capacity.
- Stop boardings and alightings: See table below.

ENG - TPL - Adanac Cassiar Transit Considerations Memo - 2017-03-23

Stop Number	Location	Direction	Boardings	Alightings	Wheelchairs
51692	Adanac, NS Skeena	ЕВ	9	61	0
51698	Adanac, FS Skeena	WB	89	9	0
51693	Adanac, FS Kootenay	EB	7	38	0
51697	Boundary, FS E Georgia	SB	37	6	0
51694	Boundary, FS Georgia	NB	6	19	0
51696	Boundary, FS E Pender	SB	32	1	0

Information is average <u>daily</u> boardings, alightings and wheelchair use based on June 2016.

- For north and southbound Boundary stops, passengers could use the #28 to access the same north and southbound destinations (Kootenay Loop and Joyce SkyTrain) should the #27 be re-routed.
- It appears that demand is greater to and from the south, based on boarding and alighting data. Changes at the northern end of the route may therefore impact proportionally less people than any changes to the south.

Service Changes Since December 2010

Future Options

Transit Only Lanes on Bridge

- Buses could still use the bridge with mitigation measures in place to prevent its use by general vehicle traffic.
- A single lane could be put in place to discourage use by general traffic.
- A traffic signal system could be installed, possibly with sensors to recognise approaching buses.
- Vertical sightlines may be an issue.

Diversion of #27 to use 1st Avenue and Boundary

- Buses would use 1st Ave between Rupert and Boundary, and Boundary from 1st Ave to E Hastings.
- There is currently no bus infrastructure along 1st Avenue and no bus routes currently use it
- There is bus infrastructure along Boundary Road as the #28 uses it.

⁻ Spring 2011, Reduce late night freq from 30 to 60m after 22hr (all days)

⁻ Summer 2012, Reduce freg from 15 to 20m from 9-15hr (M-F) & 9-19hr (Sat)

• Removing bus service from Rupert Street between 1st Ave and Hastings would create a geographical 'hole' in service coverage in this area. Boundary and Renfrew are approximately 1.5km apart at this point.

Diversion of #27 to use ECom and E Hastings

- Rupert continues with the same approximate width north of Adanac.
- Buses would then continue through ECom parking lot to Hastings (assumed to be a bus only link).
- An easement exists across the parking lot meaning we could in theory direct buses this way, although ECom would likely raise concerns.
- There is some grade difference between Hastings Street at this point and the ECom parking lot.
- Substantial changes to the parking lot would need to be considered which would likely reduce capacity. Is it ok for vehicles to be maneuvering in and out of spaces whilst through transit movements are occurring. We would not allow this on a regular street but maybe it's ok if it's only a bus link?
- A new signal would possibly be required to help facilitate bus movements. Left turn storage may be able to be provided based on the current median island that is in place.

Diversion of #27 to use E Pender and Windermere to access Hastings

- Similar to the above but buses would use E Pender St and Windermere to access Hastings.
- There is an existing T-intersection signal at Windermere/ Hastings although consideration may need to be given to measures to reduce delays for westbound-left turning buses.
- E Pender appears to be approximately 11m wide which should permit buses to stop. Shelters may also be possible, especially on the north side as it fronts onto a parking lot for the PNE.
- Intersections at Rupert/ E Pender and Windermere/ E Pender to ensure bus movements can be undertaken in a safe manner.

My preference given the above information would be to either maintain the current route and provide a bus only link across the bridge, or if diversion is required, to use E Pender and Windermere. This is the least disruptive option.

See illustrated plan below for the routes.

Hastings-Sunrise Transportation Neighbourhood Coffee Chat - May 30, 2017

Heard from neighbourhood residents about:

- Speeding or speeds higher than acceptable (e.g. travel at 50 kph posted speed when a lower speed would be more livable in the neighbourhood)
- A desire for better traffic calming and safer pedestrian crossings
- Heavy volumes of short-cutting traffic along most east-west streets
- Lack of civility from short-cutting motorists
 - Aggressive behaviour, altercations
 - Reports of disregard for traffic calming devices and diversions (corroborated by data collection)
- PM traffic on Turner and Venables because of left turn restrictions along Renfrew
- Existing traffic calming not achieving expected results of slowing down traffic working (e.g. large traffic circles and diverter at Windermere)
- Vehicles avoiding Hastings because it is too busy
- Lillooet is an important walking route that links the two area schools with the community centre (where after school programs are run)
- Speed humps on Pender have been worn down (flat)
- Concerns along Skeena which is the route used to walk to Sir John Franklin
- Sightline/parking issues at Venables and Windermere because of the jog

Beyond "do nothing" there are 3 options to consider internally:

- 1. Overpass open + traffic calming/ speed reduction measures
- 2. Overpass restricted to sustainable modes (transit + cycling only)
- 3. Overpass open + formalize a neighbourhood collector with supportive traffic calming devices

This graphic shows over 80% of traffic in the peak direction on the Adanac Overpass originates from outside the neighbourhood

Given there will be closures on 1st Avenue in 2018 for Fortis, we expect additional vehicle volumes on the overpass, which will exacerbate the situation in the neighbourhood and which we want to proactively prevent.

We compared the overpass restriction to keeping it open with significant traffic calming. While it may increase vehicle volumes on Hastings and other arterials, it best addresses the community's concerns. Therefore, we will pilot restrictions on the overpass, which will be deployed by late fall 2017 in advance of the Fortis work. Temporary measures that can be formalized later will be considered. As well, we will monitor the impacts by commissioning additional traffic counts to build "before" dataset and collecting speed data. If possible, we will collect baseline "perception of safety" information through a survey.

Transportation Planning Branch, Initial Project Description

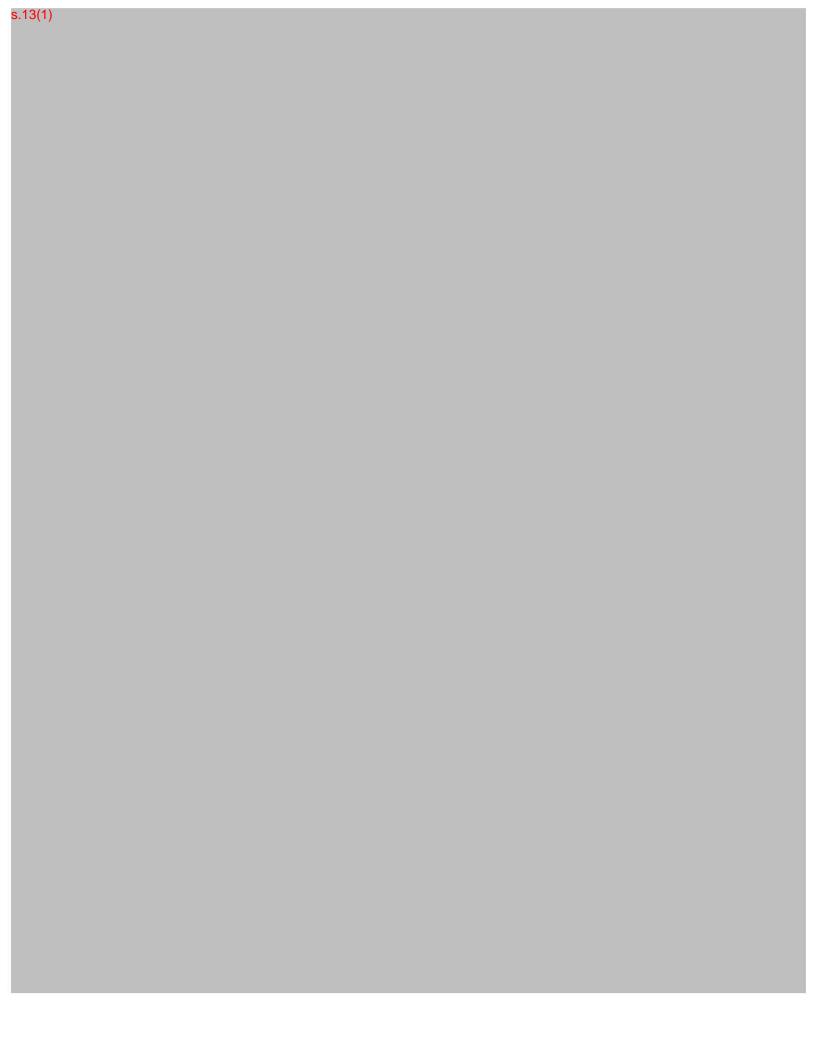

Hastings-Sunrise & Adanac Overpass
DRAFT FORM FOR DISCUSSION AND TESTING

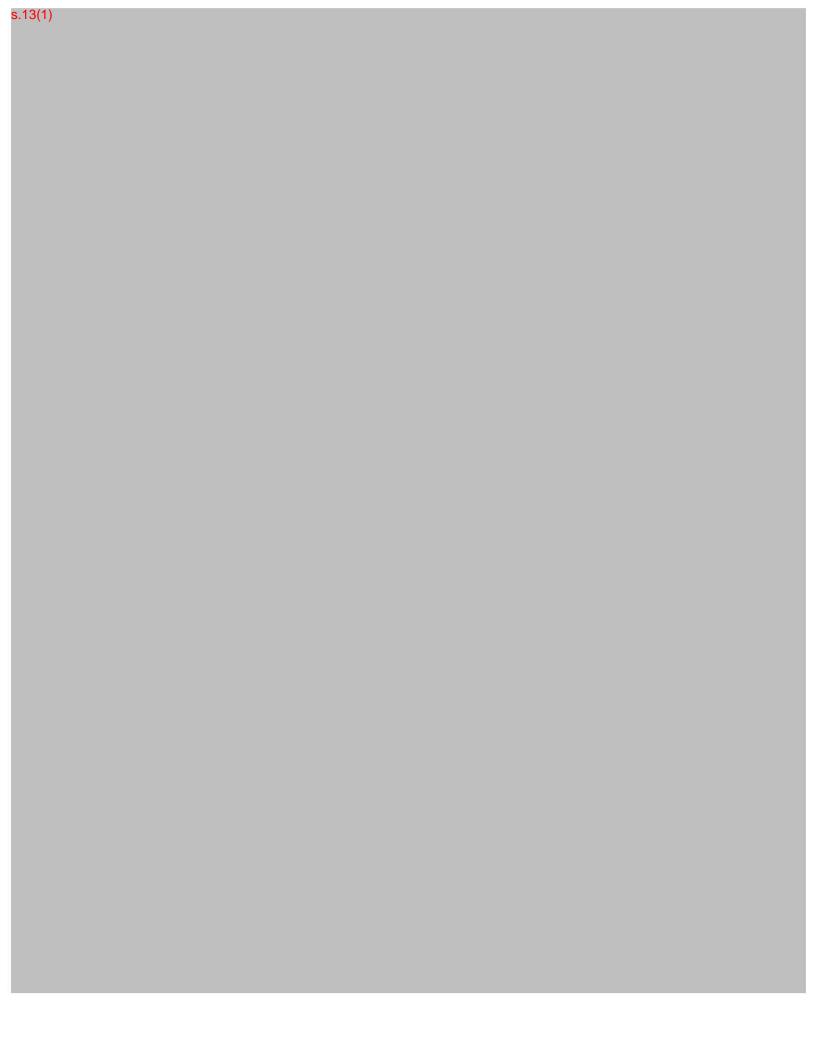

Brief Project Description

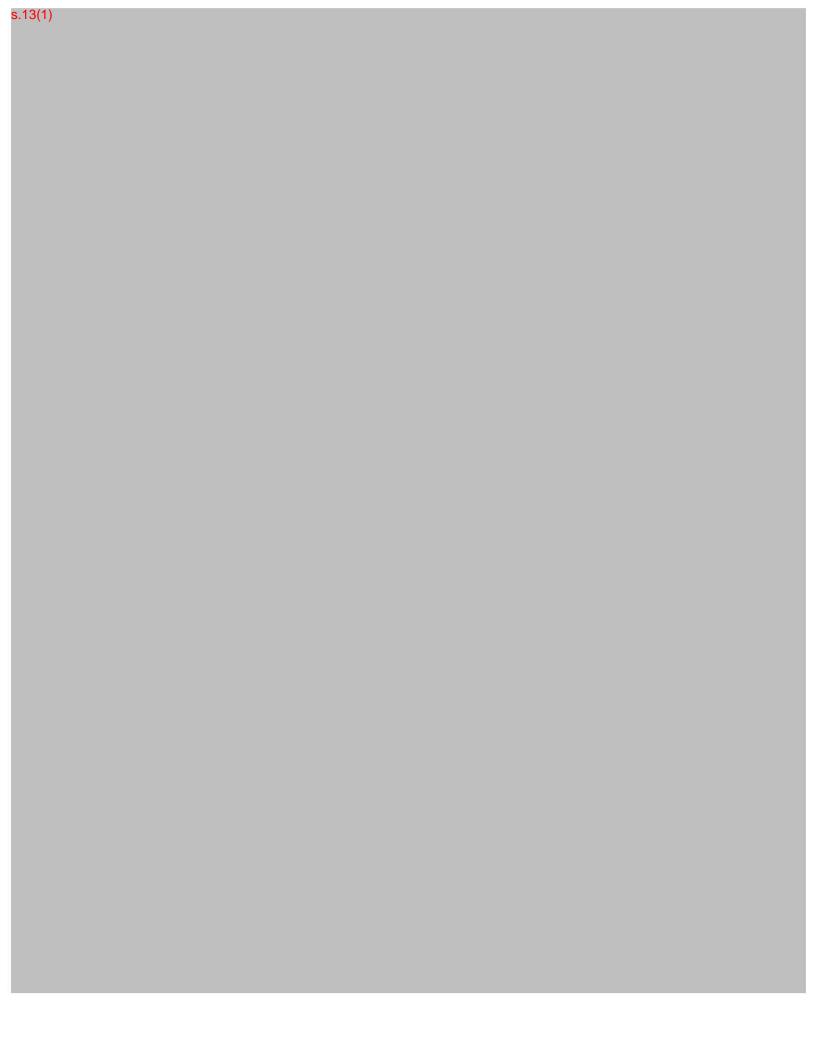

Changes to address concerns including reducing non-local traffic in the neighbourhood bounded by E Hastings St, Boundary Rd, E 1st Av, and Renfrew St.

s.13(1)

Hastings-Sunrise Adanac Overpass

Background

Residents have expressed concerns about non-local vehicles travelling through the neighbourhood; in particular, non-local vehicle traffic using the Adanac Overpass over Highway 1 to avoid lengthy queues on E Hastings St. These concerns include high vehicle volumes and unsafe driving behaviour on local streets, including those adjacent to schools and the community centre. Adanac St is also a well-used local street bikeway that connects East Vancouver to the downtown core. The City has studied the area bounded by E Hastings St, Boundary Rd, E 1st Av, and Renfrew St and engaged with the community to better understand transportation issues and potential options.

There are road closures expected along E 1st Av beginning January 2018 for a Fortis construction project. As a result, additional vehicle pressures are expected to occur on the Adanac Overpass, which will exacerbate the situation in the neighbourhood and which the City would like to proactively prevent.

For the near-term, the City compared the option of restricting motor vehicle access over the Adanac Overpass to keeping it open with significant traffic calming elsewhere. While the former may increase vehicle volumes on E Hastings St and E 1st Av, it is expected to have a greater benefit in addressing the community's major concerns.

Closure Options

A number of temporary design options will be developed to restrict access over the Adanac Overpass to only transit buses, emergency vehicles, bikes and pedestrians. This pilot is expected to be deployed by late-fall 2017 in advance of the lane reductions and closures of E 1st Av for Fortis construction. This pilot will be monitored to understand the transportation impacts on the neighbourhood and adjacent arterials and determine if resident concerns have been adequately addressed.

Further modifications to the design and/or additional measures and improvements in other areas of the neighbourhood may be needed to supplement the planned closure. A long-term solution will be developed from the work completed during the pilot.

Timelines

Fortis lane reductions and road closures on E 1st Av are expected to begin on January 1 until September 30, 2018. The temporary restrictions on the Adanac Overpass are expected to be in place ahead of the closure in order to minimize construction traffic impacts.

Opportunities to coordinate with other internal capital projects or third-party external projects are to be confirmed. In the meantime our Transportation division is currently working on design options for the pilot.

WELCOME!

HASTINGS-SUNRISE NEIGHBOURHOOD TRANSPORTATION LISTEN AND LEARN

The City recently engaged with residents on walking and cycling improvements to the Union-Adanac Corridor between Gore Avenue and Kamloops Street.

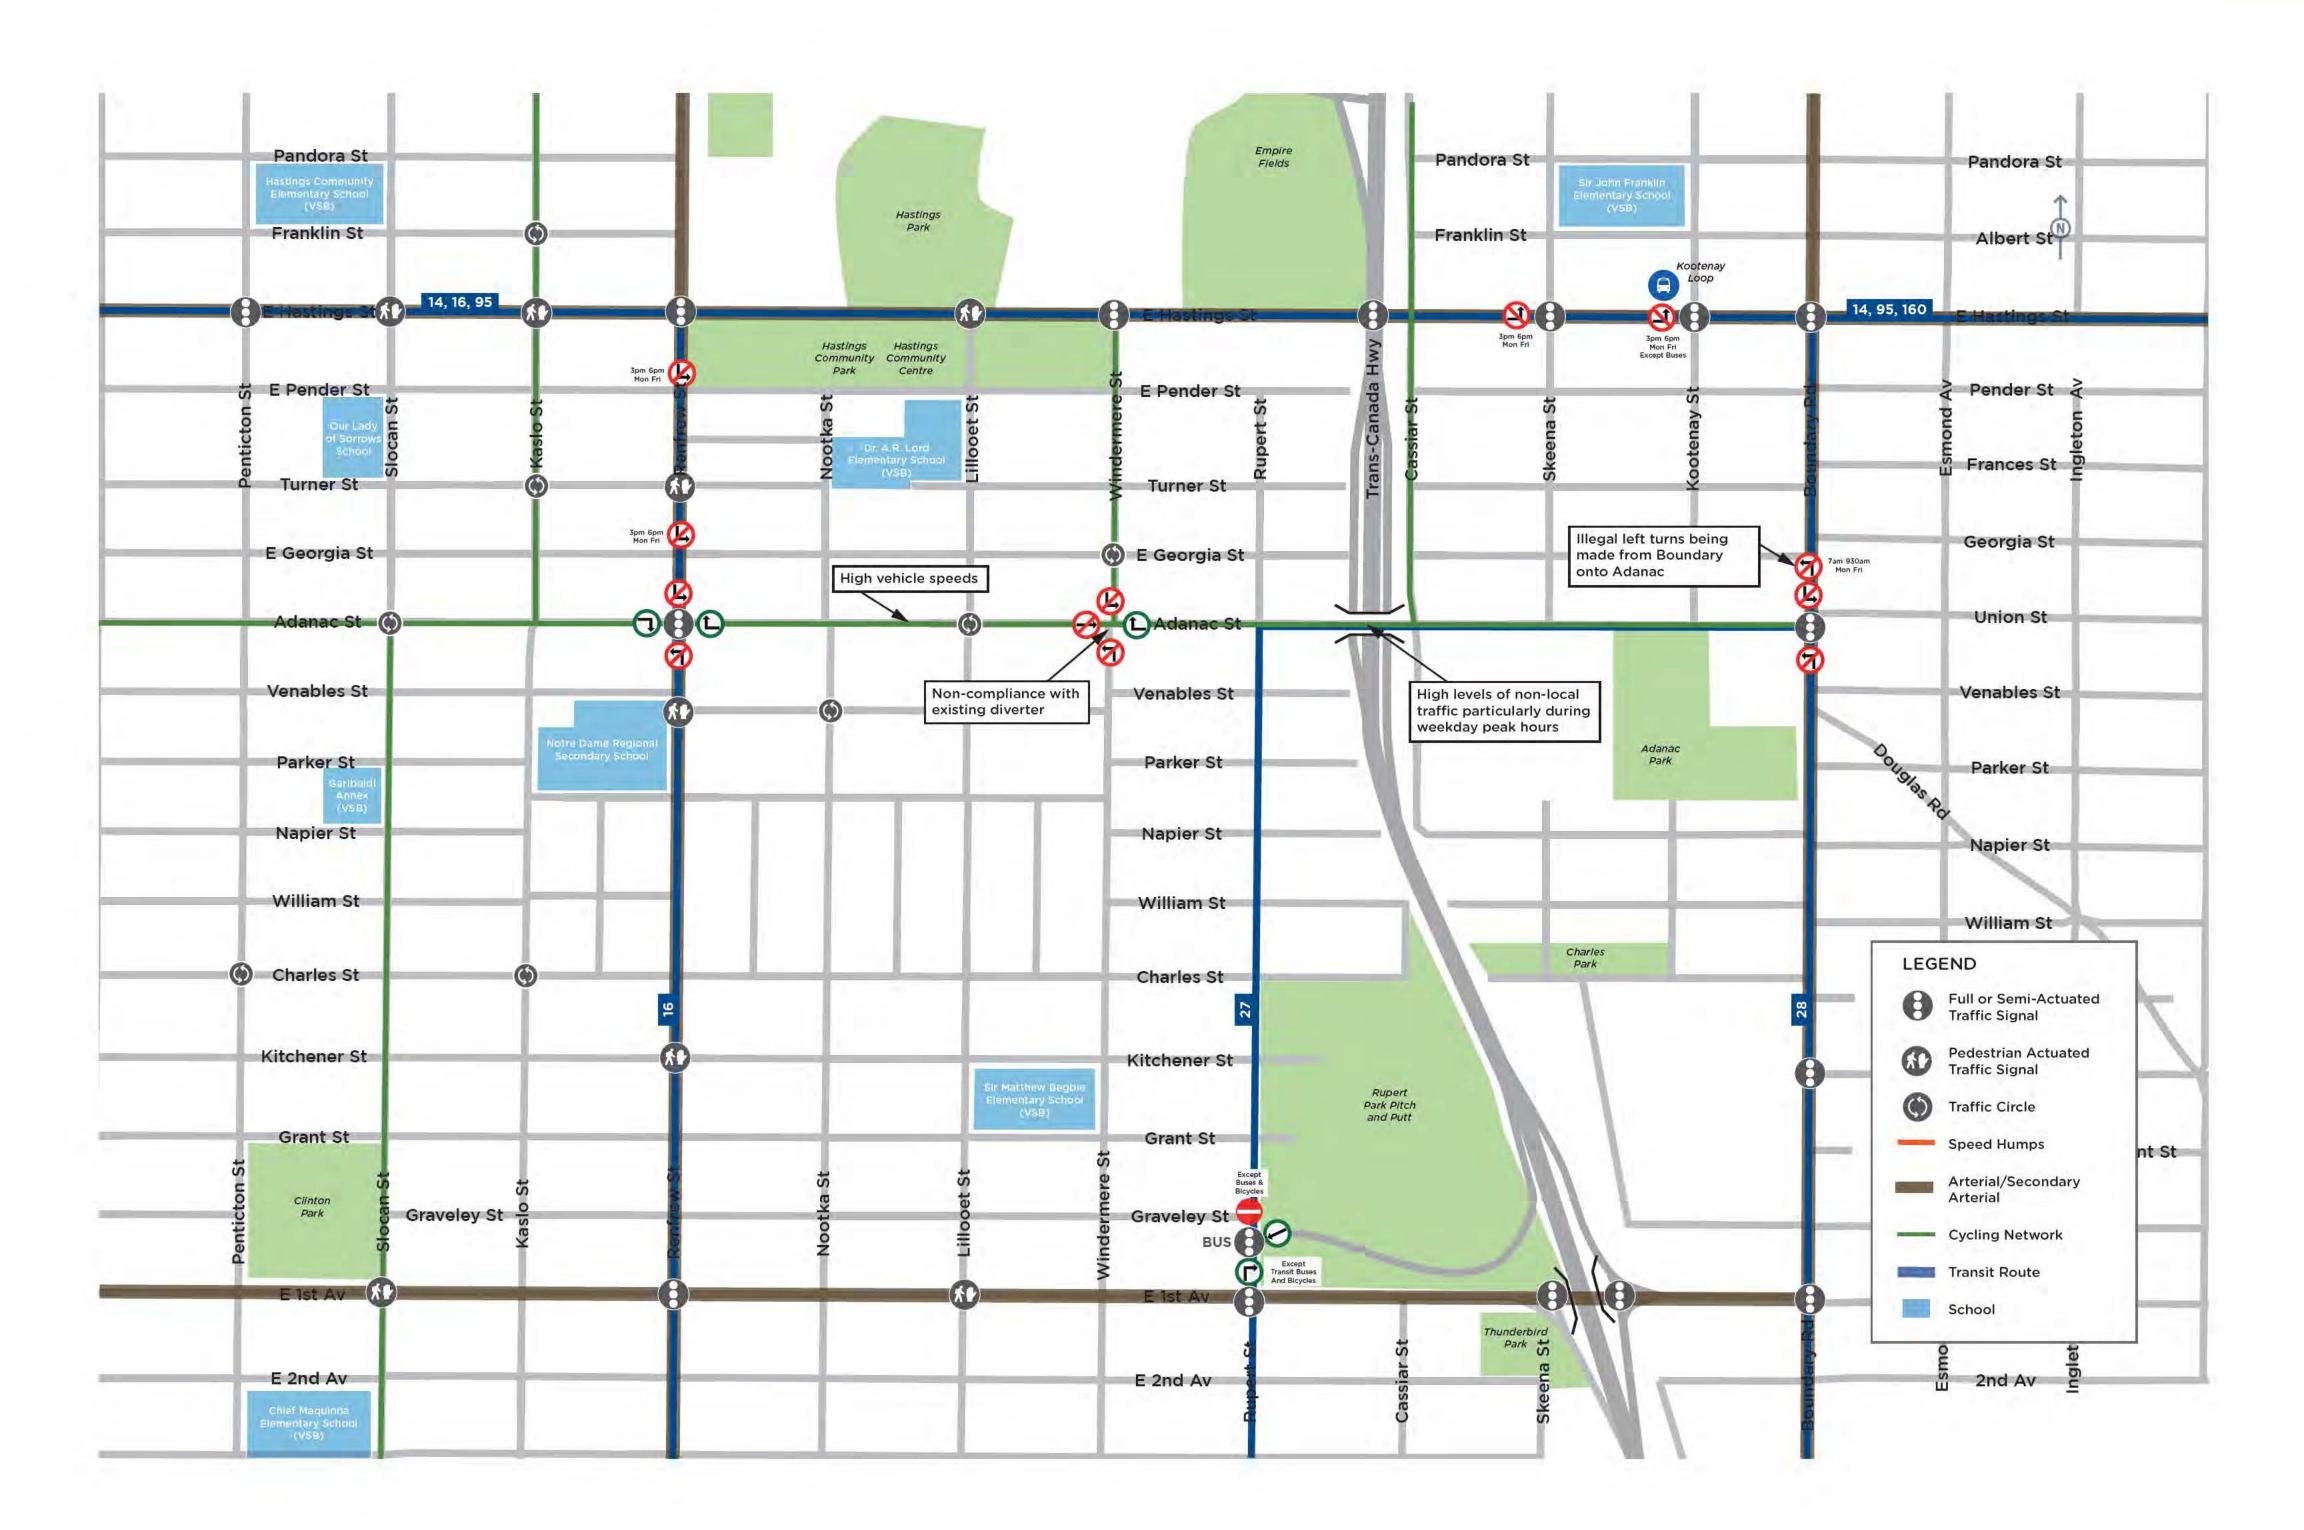

Before launching an engagement process on the eastern section of Corridor, we want to better understand transportation issues in the area between Hastings Street, Boundary Street, East 1st Avenue, and Renfrew Street. What we hear will inform future improvements.

We want to hear from you!

Join City staff at a conversation table to share your neighbourhood transportation concerns and priorities. Background information is available on display boards around the room.

Your input will be help us identify and understand the issues as we work toward future solutions.

HASTINGS-SUNRISE OVERVIEW

Hastings-Sunrise has a network of arterials that connect Vancouver, the North Shore, and Burnaby, and carry local and regional traffic and goods movement.

Local streets are intended to carry lower volumes of local traffic and measures including traffic circles, diverters, and speed humps are used to reduce traffic speeds and volumes to increase neighbourhood safety and livability.

We have heard concerns from residents about vehicle volumes and speeds on local streets, including those adjacent to schools, and about non-local traffic traveling through the neighbourhood to access the Adanac Overpass over Highway 1. In addition to vehicles, the Adanac Overpass also carries significant bicycle traffic and the #27 bus route.

TRANSPORTATION 101

MAKING DECISIONS

The City of Vancouver's process for assessing local transportation concerns considers different data and solutions to improve your neighbourhood and Vancouver as a whole.

CONSIDERATIONS

Community

What does the community desire?
What do local plans call for?

Connections

What key destinations are in or near the neighbourhood?

Technical

What is traffic and parking like in the area?

Wider Network

How is this neighbourhood connected to the road network?

SOLUTIONS

On-Budget

Decisions are made with city-wide priorities and budgets in mind.

Wide-Ranging

Every challenge has a range of possible solutions.

Appropriate

Any solution must make walking and cycling safer and more accessible.

Timely

Linking projects in the same area together can reduce cost and distruption.

LOCAL KNOWLEDGE

Residents often know neighbourhood issues best. Your ideas help the City successfully interpret the data and consider solutions.

UNION-ADANAC CORRIDOR

The Union-Adanac Corridor connects Downtown, Chinatown, Strathcona, Grandview-Woodland, and Hastings-Sunrise. It is also acts as a regional connection, providing links to municipalities to the East and North. Much of the corridor is residential, with a number of businesses located in Strathcona and in the industrial area around Clark Drive.

People living in the **Vancouver Port area** — made up of the Downtown Eastside, Strathcona, and Grandview-Woodland neighbourhoods — make more trips by bike than residents of other neighbourhoods.

TOTAL
BIKE TRIPS
NOV 2015 OCT 2016

Union-Adanac is one of the busiest cycling routes in the city. In the summer months, approximately 1000 people cycle per day on the route near Renfrew Street, and up to 5000 per day at Union and Hawks where the bikeway approaches downtown.

VEHICLE VOLUMES Source: City of Vancouver vehicle counter data, Fall 2016

Vehicle volumes vary along the corridor. Parts of Union and Adanac Streets are used by people driving to bypass arterial streets. Prior and Venables Streets immediately to the south carry vehicle through-traffic between Victoria Drive and the Georgia and Dunsmuir Viaducts.

DESIGNING FOR ALL AGES AND ABILITIES

The City of Vancouver has a vision to make cycling safe, convenient, comfortable and fun for all ages and abilities (AAA) including families with children, seniors, and new riders.

Reducing the number of interactions between motor vehicles and people cycling can improve comfort and safety. At our AAA target volume of 500 vehicles per day or less, the likelihood of encountering a motor vehicle is typically less than one per block in the peak hour. On routes where low motor vehicle volumes and speeds are not possible to achieve, separation of bikes from vehicles is needed.

The traffic calming measures we are proposing in key areas along the Union-Adanac Corridor will help move us toward AAA.

SCHOOL ACTIVE TRAVEL PLANNING

The City has been delivering a school active travel program since 2012, which seeks to increase walking and cycling to school.

The program is delivered in partnership with Vancouver School Board, who works with the City to identify and support selected schools through the program.

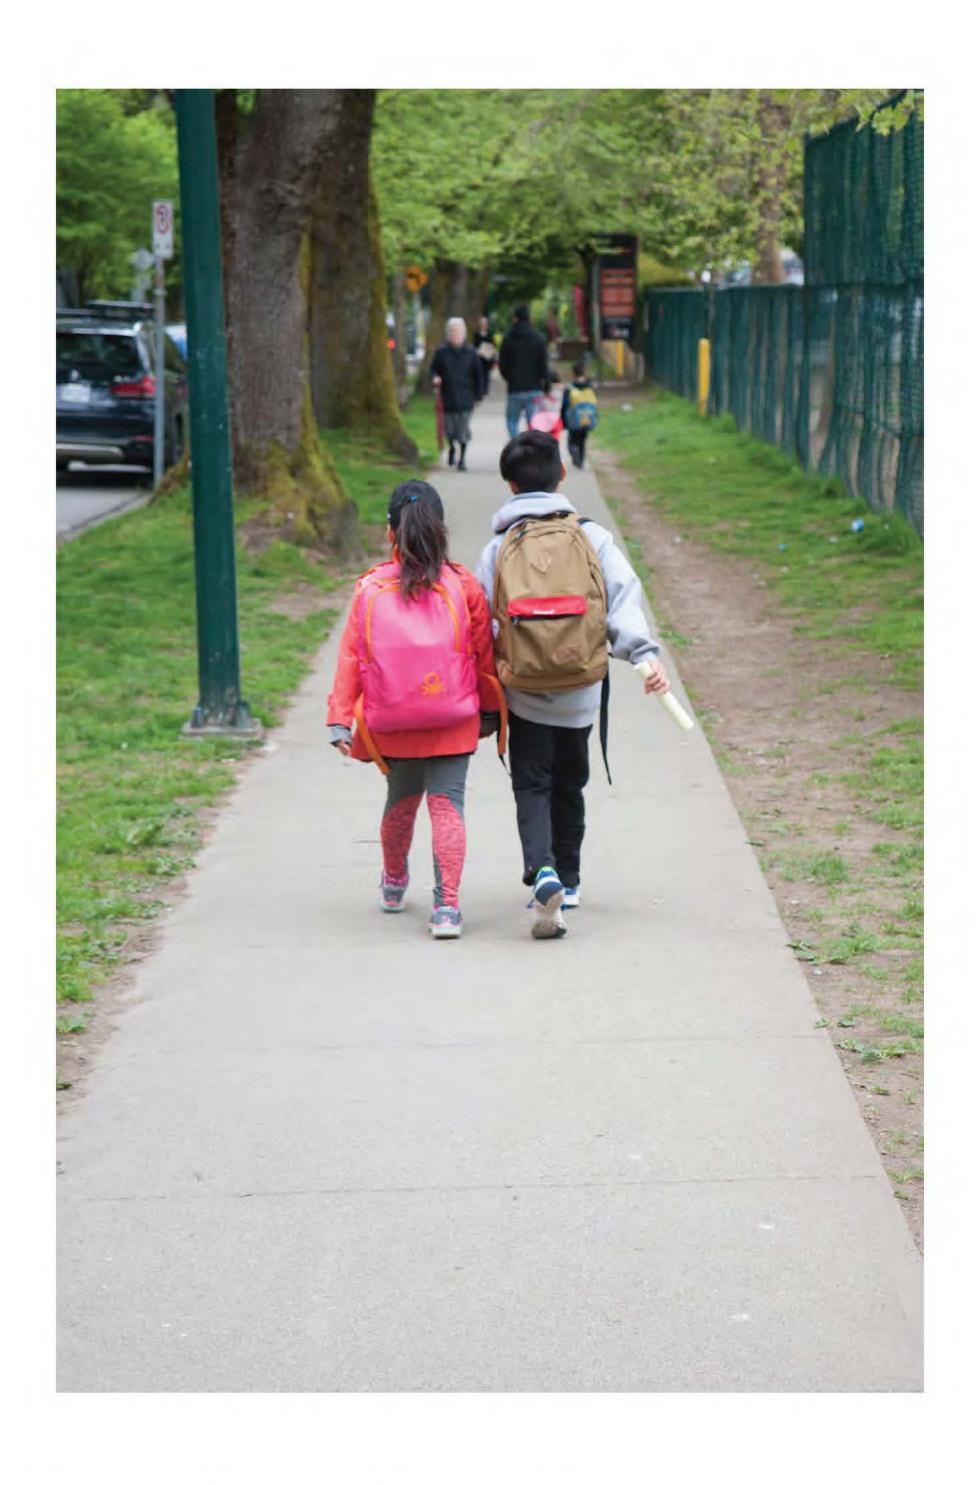

The program serves to increase education and awareness about active transportation, and works to deliver Transportation 2040 policy to connect schools to high quality walking and cycling routes.

Program benefits include:

- Infrastructure improvements around schools, such as marked crosswalks, curb bulges, new or revised parking signs, speed humps, or pedestrian countdown timers
- A "Best Routes to School" map for the school community, identifying recommended walking and cycling routes in the catchment

To date, the City's program has involved approximately 20 schools, including Hastings Elementary School in the Hastings-Sunrise neighborhood.
