Greetings Mayor and Council,

As part of the City's efforts to eradicate the Japanese beetle, an invasive and destructive pest that feeds on the flowers, fruit and leaves of over 300 species of plants, a temporary transfer station has been opened in the False Creek area for homeowners and landscapers to drop off their green waste.

The City and Park Board have been working closely with the Canadian Food Inspection Agency, British Columbia (BC) Ministry of Agriculture, and non-governmental stakeholders like Invasive Species Council of British Columbia, BC Landscape & Nursery Association and industry, to respond to the presence of Japanese beetle first found in the False Creek area in 2017.

The temporary transfer station is open June 17 to Oct 18, Monday to Friday from 2pm to 6pm. An Information Bulletin will be distributed shortly.

Best,
Sadhu
