## THE ASSIGNMENT

### Intended Use of the Appraisal

We have prepared this report in accordance with instructions obtained from Bruce Maitland, exclusively for the City of Vancouver, for rent setting purposes. We are unaware of any third parties that are likely to see or rely on this report and expressly deny liability for unauthorized reliance.

### Purpose of the Appraisal

The purpose of this report is to provide our estimate of the current market rent of the fee simple interest in the subject property as at the May 1, 2006 effective date of this appraisal.

This appraisal discusses market value and market rent. An accepted Canadian definition of market value is “the most probable price which a property should bring in a competitive and open market as of the specified date under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus.”<sup>1</sup>

An accepted appraisal definition<sup>2</sup> of market rent follows:

The most probable rent that a property should bring in a competitive and open market reflecting all conditions and restrictions of the specified lease agreement including term, rental adjustment and revaluation, permitted uses, use restrictions, and expense obligations; the lessee and lessor each acting prudently and knowledgeably, and assuming consummation of a lease contract as of a specified date and the passing of the leasehold from lessor to lessee under conditions whereby:

1. Lessee and lessor are typically motivated.
2. Both parties are well informed or well advised, and acting in what they consider their best interests.
3. A reasonable time is allowed for exposure in the open market.
4. The rent payment is made in terms of cash in Canadian dollars, and is expressed as an amount per time period consistent with the payment schedule of the lease contract.

---

1 *Canadian Uniform Standards of Professional Appraisal Practice* : Appraisal Institute of Canada, 2005, Ottawa, Ont.), line 6143

2 *Dictionary of Real Estate Appraisal*, Fourth Edition, Appraisal Institute, Chicago, 2003

5. The rental amount represents the normal consideration for the property leased unaffected by special fees or concessions granted by anyone associated with the transaction.

The fee simple estate is absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the government powers of taxation, eminent domain (expropriation), police power and escheat (the right of the government that gives the state titular ownership of a property when its owner dies without a will or any determinable heirs).<sup>3</sup> This is the most comprehensive form of ownership. It gives a "bundle of rights" that allows the owner the right to use the property, to sell it, to lease it, to enter it, or to give it away. It also includes the right to refuse to take any of these actions. A fee simple interest excludes existing financing and leases.

### **Scope of Assignment**

The scope of this assignment included:

- An inspection of the exterior of the property on April 21, 2006. We took the photographs herein at that time.
- A review of land use control information obtained through the City of Vancouver's website and zoning bylaw.
- Investigations into market activity from sources including the local real estate board, Land Titles office transactions, real estate agents, vendors and purchasers active in the market, and our corporate real estate database.
- Appraisal and market analyses as described later herein.

## **Technical Investigations**

We did not complete technical investigations such as:

- a technical review of the utility servicing;
- a site survey;
- investigations into the bearing, percolation or other qualities of the soils;
- an environmental review;
- an archaeological survey; or
- a hydrological study.

The analysis set out in this report relied on written and verbal information obtained from a variety of sources we considered reliable. Unless otherwise stated herein, we did not verify client-supplied information, which we assumed to be correct. Any party wishing to rely on this report should confirm the source of any important information herein as well as the assumptions that underlie any significant conclusion.

## **Hypothetical Condition**

Our appraisal of the land only assumes that the property is vacant and available for development. In fact, the property is improved.

We have valued the property based on the existing use and density, pursuant to our instructions, which are consistent with our understanding of the lease. In fact, current development proposals in the area contemplate development densities in the order of 3.5FSR.

We have assumed that the soil and groundwater are free from contamination, adverse substances and adverse conditions. We do not know if these might be contaminated, however, the City of Vancouver has indemnified the owners of the property for any contamination effects.

## **Extraordinary Limiting Condition**

We did not review the title or any charges registered against the property. For the purpose of this appraisal, we have assumed that the property is free and clear of any charges against it.

### **Type of Analysis**

This narrative appraisal report complies with the Canadian Uniform Standards of Professional Practice of the Appraisal Institute of Canada. We have competence in this type of appraisal analysis and have valued this class of real property before.

## **PROPERTY INFORMATION**

### **Civic Address**

Moberly Road, Millyard, Millbank, Vancouver, British Columbia

### **Legal Description**

Lot 8, False Creek, Plan 16003.

### **Title Information and Encumbrances**

We understand the **City of Vancouver** is the registered owner. We did not investigate any charges on the title and are assuming the property is free and clear any charges registered against it.

Subject to the limitations of this assignment and based on our interviews, client-supplied information and our review of the title search print, we believe that title encumbrances do not materially affect the value of the property except as discussed specifically herein. However, we did not obtain a legal opinion of the state of title or any of the encumbrances, we lack qualifications in this area and we have not read the documents registered against title. Our appraisal therefore assumes that title is good and marketable and that encumbrances do not affect the value of the appraised interest.

## ASSESSMENTS AND TAXES

The property is the subject of strata subdivision. It is neither assessed nor taxes separately, but rather pursuant to the subdivision. Actual value assessments for this strata subdivision, as provided by British Columbia Assessment for 2006 are as follows:

Actual value reflects the opinion of British Columbia Assessment of the market value of the property as at July 1, 2005 based on the physical condition of the property as of October 31, 2005. Assessors disregard encumbrances such as leases and financing, and can base their assessments on mass appraisal techniques such as multiple regression analysis and on dated inspection information. Consequently, actual values can be a less precise estimate of market value than provided by a full appraisal.

## HISTORY AND USE

### Leasing History

Between 1976 and 1982, the City of Vancouver issued head leases on the South False Creek subject development lands to developers, which constructed multiple family housing on the land, registered strata subdivisions and sold the individual units on the marketplace. This led to 56 strata lots, and presumably 56 residences under Strata Plan VR466 registered August 1977. Almost all of the units have since resold at least once. The land leases called for ongoing rental payments, which the owners of individual units paid on a monthly basis. The amount of the rental payments varied from unit to unit, and would reflect the unit entitlements and the total rent for the overall parcel. The City entered into similar agreements with several developers of strata projects on other False Creek sites.

The leases provided for a fixed annual rental amount for the overall property, which adjust at specified dates during the life of the lease. Section 2.01 of the representative ground lease for VR466 provided a fixed rental for the first 15 years after substantial completion, with a prescribed increase for another 15 years. For each subsequent 10-year period, basic rent is to be market rent, as if the lands were unimproved, according to a process that entails appraisers and arbitrators. Rent is to reflect the use set out in the lease, being self-contained residential accommodation, according to Section 5.01 of the ground lease reviewed. For the subject projects, the first of the 10-year rent renewal periods where rents are to be set at market levels occurs in September 2006.

The annual rent payment for VR466 for the first 15 years is approximately \$58,401.06 and for the next 15 years (1991-2006) is \$81,832.04.

In the early 1990's, the City decided to offer tenants the right to prepay the remainder of their lease payments, and commissioned real estate appraisers to calculate the prepayment amounts. The amount of the prepayment varied from unit to unit and for some units was later revised and adjusted. Tenants were under no obligation to accept the prepayment; we understand that about 21 occupants in this project elected to prepay their remaining rent. The option to prepay the lease was not available after 2001.

## **Present and Historic use**

A three-storey, townhouse structure, with strata title tenure, subject to a ground lease. To our knowledge, the original developers sold all of the units, which now are widely held, with little or no multiple unit ownership.

The property is located in the Fairview Slopes neighbourhood, adjacent to False Creek. From the early 1920s to the early 1960s, Fairview Slopes<sup>4</sup> was zoned for three-storey apartments and throughout the 1950s, the area south of Broadway developed as an apartment district. Broadway, as well as Granville and Cambie Streets, became important neighbourhood commercial strips. At the same time, the Slopes were rezoned to industrial use, and some houses were replaced with small industries.

The 1970s were a time of dramatic change for both False Creek and Fairview Slopes. Based on the recommendations by citizens, two advisory review panels and City staff, City Council in 1973 adopted policies that laid out guidelines for redeveloping False Creek. The new City policy required a range of housing to provide a social mix that reflected the City's income and social composition. The City also decided to keep ownership of most of South False Creek, the area containing the subject properties.

Concurrent with the planning for South False Creek, plans to redevelop Granville Island were also being considered. In 1972, the Federal Government transferred administration for the 15-hectare (37 acres) island from the National Harbours Board to Canada Mortgage and Housing Corporation and a movement to rejuvenate the site started to gain momentum. Early in 1976 the Granville Island Trust was formed to advise on the Island's future. The first phase of the Island's redevelopment, the Public Market, opened in 1979, soon followed by the Maritime Market, Emily Carr College of Art, theatres, artist's studios, craft galleries and restaurants.

As the City's plans for False Creek took shape, pressure arose to redevelop the Slopes for high-

density uses. The area was rezoned in 1972 from industrial to residential/commercial. Fairview Heights, a small fifteen-block area extending north of Vancouver Hospital and Health Sciences Centre (formerly Vancouver General Hospital), was rezoned in 1984 from a duplex to a low-rise apartment zone. Since then the area has been extensively redeveloped providing additional housing opportunities for those employed in the downtown core and with Vancouver Hospital.

Construction of the projects occurred in the late 1970's and early 1980's, and this is reflected in their design and materials of construction. Building codes and construction practises were changing during this time, and some projects of this vintage "leaked."

## THE SITE

### Location

The site is located on the north side of Moberly Road with frontages along Millbank, Ferry Row, and Millyard in False Creek South in the Fairview neighbourhood of Vancouver, British Columbia.

## **Topography**

The site is level and at grade with the adjacent road and surrounding development.

## **Soil Conditions**

We have not been provided with a soil survey for the subject site and we have not commissioned one. For the objective of this report, we have assumed that the bearing, percolation and other characteristics of the land are adequate to permit development under the present land use controls, without undue and costly site preparation or engineering.

We did not observe any contaminants or hazardous materials at the property and do not have the knowledge or qualifications to detect the existence of such materials on or in the property. Our value estimate assumes that there are no contaminants or hazardous materials on, in or near the property that would cause a loss in value. We recommend retaining an expert in these matters if doubt exists regarding the quality of the soils or groundwater.

## **Access**

Pedestrians can access the property along Millbank, Millyard and Moberly Road. Primary vehicle entry to and egress from the site is available via Millyard Road and Moberly Road.

The major east-west arterial route through the Fairview area is south of the subject along West 6<sup>th</sup> Avenue, connecting with West 2<sup>nd</sup> Avenue to the east and West 4<sup>th</sup> Avenue to the west.

Major north-south arterial routes include Cambie Street to the east providing direct access to Downtown Vancouver via the Cambie Street Bridge, Oak Street to the west and Granville Street farther west, also providing access downtown.

## **Street Improvements**

Millbank has a dedicated width of 45 feet along the subject property and is part of the seawall along False Creek South. Millyard and Ferry Row have dedicated widths of 35 feet and are asphalt paved.

Moberly Road is asphalt paved curb to curb, two lanes in width with concrete sidewalks and ornamental street lighting. Visitor Parking is accessed via Moberly Road and is south of the subject. Traffic signals control the intersection of Moberly Road and Sixth Avenue.

## Utilities

Utility services typical of an urban community are available in the area, including municipal water and domestic sewer, storm water drainage, electricity, natural gas, telephone and television cable.

## Surrounding Developments

The subject property is situated on the south shore of the False Creek basin. The immediate surrounding area is predominantly multifamily, low-rise, wood-frame or mid-rise concrete developments with some commercial at grade. Commercial developments are concentrated on Granville Island to the west and 6<sup>th</sup> Avenue to the south. 6<sup>th</sup> Avenue and up in the Fairview area is primarily medium-rise residential, often with commercial use at street level.

Directly south, west and east of the property are three-storey low-rise apartment buildings with commercial at grade in the development to the east. West of the property is Destination Park separating the Heather and Spruce neighbourhoods. Heather Civic Marina is situated to the northeast.

False Creek Elementary is on the west side of Destination Park, within a five minute walking distance. Two blocks southeast of the property is a bus loop providing public transit

## LAND USE CONTROLS

The subject property is zoned FCCDD, False Creek Comprehensive Development District. The intent of the zone is to regulate development in a portion of that part of the City of Vancouver for which the zoning district is described as "False Creek Comprehensive Development District (FCCDD)" adopted in 1974.

The subject property is within Sub-Area 6, which comprises two major neighbourhoods, on the west the Heather Neighbourhood and on the east the Spruce Neighbourhood with Destination Park separating the two.

The Phase 1 policy calls for residential development at densities of 45 to 65 units per acre, which requires a blend of apartment and townhouse densities, along with related uses such as school and park facilities. The policy calls for building heights of 65 to 120 feet. Based on policy documents downloaded from the City's website, no significant changes appear to have occurred to these policies. Given the pattern of recent development in False Creek, it is likely that the City would adopt higher development densities if it revisited the land use controls.

### The Heather Neighbourhood

The Heather Neighbourhood is planned as a mixed life-style residential area. Non-residential uses include a marina, community facilities and some commercial facilities. The neighbourhood area encompasses 19.318 acres with the development area being 10.96 acres. The number of residential units is not to exceed 650 units or an average net density of 60 units per acre. The Site coverage in development areas is not to exceed 65%.

### **Significant Area Future Development**

#### *The Canada Line*

The transportation corridor connecting downtown Vancouver with Richmond is one of the busiest in Greater Vancouver and home to one-third of the region's jobs and 20 percent of its population. The proposed Canada Line will include 16 stations, and provision for three future stations located to serve the dense and growing neighbourhoods along the corridor. The projected completion date is last half of 2009, roughly four years away.

The proposed Canada Line will provide a north-south link needed to help enhance the regional network, creating a safe, fast and reliable rapid transit system. The line will connect with the existing Expo and Millennium rapid transit lines, WestCoast Express and SeaBus at Waterfront Station. The Canada Line provides for a future connection with a Millennium Line extension to Broadway and Cambie Street. The project also includes a park-and-ride facility and a bus exchange at the Bridgeport Station; a second bus exchange will be provided at the Richmond Terminus Station.

The Canada Line consists of a fully grade-separated alignment that will run from downtown Vancouver to Richmond Centre and the Vancouver International Airport.

Starting at Waterfront Station, the Canada Line will run beneath Granville Street, False Creek and Cambie Street and will remain underground until 63rd Avenue. Between 63rd and 64th Avenues, the Line will transition from an underground to an elevated guideway, extending south across the North Arm of the Fraser River to Bridgeport Station. From this station, two separate lines will provide service along elevated guideways, one to central Richmond and one to the Airport.

A park-and-ride facility and a bus exchange will be at the Bridgeport Station; a second bus exchange will be provided at the Richmond Terminus Station. The Line will include 17 stations: four in Richmond, 4 on Sea Island and 9 in Vancouver.

Annual boarding (one-way rides) is projected to range from 28 to 38 million in 2010 with modest annual growth over the following years of 1% to 1.5%. This translates into 2010 trips at 75,000 to 100,000 boardings per day.

Plans indicate that the False Creek Station location will be near the Cambie and 2<sup>nd</sup> Avenue interchange, a few minutes walk to the subject property. Moberly Road will become a primary access point from the station to the Seawall area.

Because of Skytrain, the Cambie Corridor should experience sustained long-term growth superior to areas not gaining rapid transit service. In addition, the future Olympic village will be located in the Second Avenue/Main Street area, and will provide long-term market, affordable and social housing as well as a modest commercial component. Further development in the Southeast False Creek area will surround Athlete's Village. In summary, population and access should increase and the Seawall will remain a strong attraction for leisure traffic, thereby positively influencing future values.

### *Olympic Village and Southeast False Creek Development Plan*

The following is a descriptive excerpt from the City of Vancouver.

"Southeast False Creek is a new community planned for the last remaining undeveloped waterfront in the False Creek basin, adjacent to Downtown Vancouver. The objective of the development is to create a new community based on principles of sustainability. Planning has been underway for several years and has now reached the Official Development Plan stage of planning approval process.

The overall intent is to create a diverse community within a low- to mid-rise scale of development. Approximately 2.2 million square feet of space will be developed on the publicly owned lands. A full slate of roads, pedestrian routes and public parks will be created. The overall park space target is 26.4 acres with an allowance of up to a 10% reduction agreed to by Council resolution. A broad mixture of uses will be encouraged in the plan with flexible space at ground floor allowing for changes in use over time. Community facilities on the site will include an elementary school; a community centre and boating centre; an inter-spiritual centre; up to five childcare facilities; and, outdoor uses like playfields, an amphitheatre and community garden plots.

The character of the proposed development will build on the unique industrial history of the site. Both open spaces and built form will respond to the legacy of the working history of the place. The waterfront will remain in its diverse, almost rough character, with a diversity of edge conditions from naturalized areas to wood-piled structures. Buildings will reflect the simple bold forms found on industrial sites and will include the use of brick, large window and door openings and industrial finishes. This attitude will extend into developments on the private lands surrounding the site, south to Second Avenue and east to Main Street."

### **Southeast False Creek Development Area**

Newspaper reports indicate the 2.2 million square feet of space will be 2 million residential and 200,000 commercial/ other. This represents a significant population increase for the general area, which historically has had an industrial, non-residential character. Soil remediation work has begun, and the City has selected a developer for the Athlete's Village project, with construction to start within the next 12 months.

The Southeast False Creek Official Development Plan By-law and two accompanying Council Reports (Financial Strategy and Sustainability Targets and Indicators) were approved by Vancouver City Council at Public Hearing on March 1, 2005 and enacted on July 19, 2005.

Based on the information available to us, the subject development appears to conform to the land use controls.

Most provincial municipalities have also adopted official community plans, area plans and other planning devices that supplement their zoning bylaws. The process for developing an Official Community Plan ("OCP") typically involves considerable social, economic and demographic research and an extensive public consultation process. OCPs serve to express municipal aspirations for future land uses within its borders, guide capital budgeting and direct the handling of rezoning applications. In British Columbia, municipalities generally do not rezone properties for a use or development scale that is contrary to the OCP; rezonings of this nature first require an amendment to the OCP.

Unlike most provincial municipalities, the City of Vancouver does not have an OCP. As a result, the F.C.C.D.D. zoning by-law is the main document governing the site. Municipal councils can change only some aspects of the land use controls that apply to certain properties. Provincial, regional and federal controls that also affect development include:

- environmental and fisheries regulations;
- heritage policies;
- public health, building and fire codes; and,
- highways and transit plans.

The mandate for this appraisal did not require research into all of the land use regulations that possibly apply. Further, existing land use controls do not always bind regulators, who can develop new policy and rescind or modify existing land use policies. Municipal planning officials and independent planning consultants can assist with specific questions on land use matters.

## MARKET OVERVIEW VANCOUVER

### Geography

Vancouver is the largest city in the province of British Columbia and is surrounded by water on three sides. Vancouver is bordered on the north by Burrard Inlet, on the west by English Bay, on the south by the Fraser River and to the east by the municipality of Burnaby. The city encompasses an area of 28,700 acres and is a major Pacific Ocean seaport and an international and national distribution centre, served by Vancouver International Airport, the Port of Vancouver and VIA Rail Canada.

The population of Vancouver has been increasing steadily over the past ten years with a median increase of 1.03% per year. A total increase of 8.7% has occurred since 1996, compared to a 13.08% increase for the Greater Vancouver Regional District (GVRD) and 9.81% increase for British Columbia. The constraint on population growth for Vancouver is a shortage of incremental development rights, for the City is almost fully built out. Current city planners envision accommodating through higher densities on redevelopments in and near the downtown. The GVRD population is growing more rapidly than that of British Columbia; however Vancouver's growth is slower than British Columbia indicating it is the cities outside of Vancouver that are the main contributors to the GVRD's growth. This is due to the greater availability of developable land and increased density opportunities in the suburbs.

The unemployment rate for Vancouver as at March 2006 was at 4.8%, the lowest rate in the past 10 years. Statistics Canada reports that British Columbia has seen the fastest job-growth rate of all provinces in the past year with the largest job gains occurring in retail and wholesale trade due in part to the rising incomes and population growth in B.C. TD Bank forecasts this rate to continue to decrease for British Columbia leading up to the 2010 Olympics.

## Interest rates

*Source: Bank of Canada*

A lower interest rate allows buyers to spend more on their home as the interest component of their mortgage payment is less; when interest rates increase, buyers will have less to spend on their homes as the payment will rise due to higher interest expense. Due to the effect on affordability, as interest rates rise, sale volumes decline relative to supply, placing downward pressure on home prices will decrease; as rates fall, prices usually increase. The 5-year mortgage interest rate as at April 2006 was 6.75% below the average over the past 25 years of 10.29%. Mortgage rates had risen, by as much as 1% since summer of 2005

## House Price Index

*Source: Greater Vancouver Real Estate Board*

The Greater Vancouver Real Estate Board produces a House Price Index (HPI) each month for detached homes, attached homes and apartments. The HPI is achieved by dividing the median price of homes for the month by the median price of homes in June 1991, when the index began, and then multiplying by 100. The HPI relates to the change in price relative to June 1991. The HPI in January 2006 for Vancouver was approaching 200, signifying that prices have nearly doubled since 1991.

## Demand and Supply

*Source: CMHC Housing Reports*

The chart above illustrates the supply and demand for condominiums and townhomes in Vancouver. Units-under-construction have been rising since the market nadir in 2000; the inventory of complete and unoccupied units has been falling since 2000 indicating a strong demand for condominiums. The fact that the inventory has been decreasing as the supply increases is one indicator that demand is outpacing supply. This condition creates upward pressure on price levels.

Vancouver apartment and townhouse starts have begun declining. From 2004 to 2005, starts fell from 4,329 to 3,308, or a decrease of 23.6%. Canada Mortgage and Housing senior market analyst Cameron Muir states, "Ongoing supply-side constraints will moderate homebuilding activity over the next two years. Competition for skilled labour and rapidly rising construction costs will continue to be significant impediments for homebuilding."

Source: *Canada Mortgage and Housing*

The Vancouver region has been showing a pattern similar to the City of Vancouver with the main difference being that housing starts and completions are still rising in the Vancouver CMA where in Vancouver they have begun declining. This is due in part to the decreasing supply of land and increasing land values in the City of Vancouver. Because of the higher land values, many families are moving to more affordable housing in Vancouver's suburbs, leading to an overall increase in the region's starts, completions and absorptions.

The sales-to-new listings ratio is another indicator of the relative balance between demand and supply in the existing home market. In markets where sales are high relative to new listings, potential buyers have less choice and typically have less bargaining power. Canada Mortgage and Housing has stated that a sales-to-new listings ratio above 50% is associated with rising prices, a "sellers' market." As at February 2006, the Real Estate Board of Greater Vancouver reported the percentage of sales to listings at 69% for apartments on Vancouver's westside.

Source: Real Estate Board of Greater Vancouver

Another measure of the strength of Vancouver's housing market is the number of sales transactions occurring. The greater Vancouver Real Estate Board publishes monthly statistics on the number of sales for detached, attached and apartment units. Results are as follows for the number of attached and apartment sales in Vancouver's westside between 1998-2005:

Source: Greater Vancouver Real Estate Board

The number of attached and apartment sales transactions began increasing steadily in 2000. By 2003, the number of sales in Vancouver's westside had more than doubled to 6,891 sales compared to only 2,794 in 2000. As at December 2005, the Greater Vancouver Real Estate Board had recorded 6,693 sales for the year.

## HIGHEST AND BEST USE

An accepted definition of highest and best use is “[t]hat reasonably probable and legal use of vacant land or an improved property which is physically possible, appropriately supported, financially feasible, and that results in the highest value.”<sup>5</sup>

The highest and best use of a property is an economic concept that measures the interaction of four criteria: legal permissibility, physical possibility, financial feasibility and maximum profitability. Estimating the highest and best use of a property is a critical appraisal component that provides the valuation context within which market participants and appraisers select and analyze comparable market information.

An appraiser considers highest and best use of the property “as if vacant” separately from the highest and best use of the property “as improved.” This is because the highest and best use of the site, as if vacant and available for development determines the value of the land, even if the property's existing improvements may not represent the highest and best use of the site.

An accepted definition of the highest and best use of a land or site is “the use among all reasonable alternative uses that yields the highest present land value, after payment for labour, capital and co-ordination. The conclusion assumes that the parcel of land is vacant or can be made vacant by demolishing any improvements.”<sup>6</sup>

Zoning policies in place contemplate use of the property as FCCDD, False Creek Comprehensive Development District.

Changing the land use controls requires approval by municipal council of a rezoning. Given the nature of development in the area and the pattern of municipal land use policy, we consider the prospect of achieving a rezoning to another use as unlikely. Current city policy favours higher densities in the areas near the downtown core. Were the subject precinct to be redeveloped today, the Southeast False Creek policies suggest that the housing form would likely be mostly apartment in a low to mid-rise format, and density would be higher, in the order of 3.5 FSR. For

<sup>6</sup> IBID, line 6658

the purposes of this analysis, we have assumed that the existing use and density reflects the legally permissible level.

For the purposes of our analysis, we have assumed that the non-financial title limitations do not restrict use of the site beyond the restraints of the land use controls.

Market values and rents for residential properties in the neighbourhood are sufficient to retire the cost of construction, adequately compensate the developer and to provide a positive return to the underlying land.

The site size, utility servicing, exposure and topography generally suit the requirements of development. Based on the surrounding development pattern we have assumed that soil conditions could support development as contemplated under the land use controls without undue or costly site preparation.

Consequently, we conclude that highest and best use of the site, as if vacant and available, entails development pursuant to the applicable land use controls, and as market conditions permit. (For the purpose of this analysis, we have assumed that the existing use and development density is the maximum permitted on the property.)

The highest and best use of a property as improved is “multiple-family residential”, the use that should be made of an improved property in light of the existing improvements and the ideal improvement described at the conclusion of the analysis of highest and best use as though vacant.”<sup>7</sup>

## VALUATION

### Introduction

Our mandate is to estimate the market rent of the subject site, for the purpose of setting rent for the next term in this long-term leasehold arrangement. We have assumed that the existing use and density are the maximum permitted on the site.

Market rent is interpreted to mean the most probable fixed annual minimum rent for the land determined in accordance with generally accepted appraisal principles and methods and having regard to the privileges and obligations contained in the lease. Lease agreements on multifamily residential lands such as the subject typically involve long lease terms, in the order of 50 to 99 years; periodic rent reviews and renewal options at market rent. Leases are most often written on a triple net or absolute net basis, with the lessee being responsible for all operating, maintenance and repair expenses as well as property taxes and insurance. Long-term land rent generally has a relationship to the underlying land value.

An appraiser may value land<sup>8</sup> that is vacant and available for development in various ways:

- 1) Direct comparison,
- 2) Extraction,
- 3) Allocation  
Income capitalization, divided into two direct capitalization techniques:
- 4) Land residual
- 5) Ground rent capitalization, and  
One yield capitalization technique:
- 6) Discounted cash flow analysis (subdivision development analysis)

Direct comparison relates current market activity to the site being valued. Extraction, a variety of abstraction, deducts the depreciated value of the buildings from a sale price to show vacant land value. Allocation, employed when comparable sales evidence is scarce, relies upon a typical land-value-to-property-value ratio. The direct capitalization techniques entail the capitalization of income from a single year of property operation. Land residual allocates net revenue from an improved property into its component parts of first, the building, with the

---

residual to the land. Ground rent capitalization converts net lease payments into capital value. The yield capitalization technique explicitly recognizes time-value-of-money considerations. Subdivision development applies to undeveloped acreage where a potential urban development represents the highest and best use of the land. The analyst considers cash flows over the construction and the marketing stages.

There is an established market for freehold land in the residential neighbourhoods surrounding False Creek. The City of Vancouver has a number of leasehold properties throughout the City, typically leased for multifamily development purposes. In the instance of the subject and a number of other local projects, these lands are held under arrangements whereby the rents are paid annually and periodically reviewed. Most projects, though, entail prepaid leases.

Two appraisal methodologies are commonly considered when examining annual land rent: the Direct Comparison method, in which rents on similar sites are analyzed and compared to the subject, and the Rate Times Value method, in which a rate of return is applied to the estimated land value.

Because property values are location specific and there is scant information on comparable non-prepaid multifamily land leases, we concluded that direct comparison would not provide a value indication that is meaningful and reliable. Our analysis therefore involves the Rate times Value method.

**Rate times Value**

In general, the reliability of this method depends on the availability of appropriate information on land values and ground rental conversion rates.

*Land Value*

We surveyed the Vancouver area for evidence of recent sales, listings or offers to purchase on properties that provide useful benchmarks of value for the subject property, emphasizing transactions that are recent sales. Important criteria include:

- Recent sales
- Settings near False Creek
- Similar parcel size
- Similar development potential (density and housing form)
- Similar density, measured in terms of FSR (the basis on which multifamily land trades in Vancouver)
- Similar relationship to the water and to water views.

Examples of land sales meeting one or more of these criteria follow:

**Remarks**

A development site located in the central north area of Southeast False Creek and known as 'Sub-Area 2A.' Total area net of roadways is 488,748 square feet, or 11.22 acres. Total area for private development: 300,256 square feet or 6.89 acres, assuming an estimate of 28,428 square feet for community centre, childcare facility land, an estimated 90,940 square feet for City-owned affordable housing and 68,818 square feet of City-lands within sub-area 2A.

Millennium will design and construct all of the buildings in the first phase of the project (Sub-area 2A of the SEFC site) to meet or exceed the social, economic, and environmental sustainability standards set out in the City's SEFC Official Development Plan (ODP). The Millennium proposal also provides training, employment and business opportunities to inner city and aboriginal communities.

Gross floor area for all the site components and per the RFP is 1,191,511 square feet, however, this sum is inflated by a 10% increment to allow flexibility in architectural design for the various components; Maximum development is 1,083,192 square feet, of which 860,702 square feet is residential, 117,669 square feet is "choice of use", 77,073 is commercial and 34,748 square feet is amenity space. 246,161 square feet of the residential component is to be "affordable housing," i.e., nonmarket. Deducting the amenity space and the nonmarket housing produces a net yield of 802,283 square feet; Millennium's proposal entailed 808,047 square feet.

## LAND SALE NO. 14 (Cont.)

### Remarks (Cont.)

Title to all developable parcels will remain with the City until the end of the exclusive use period, after which the city will transfer the developer's parcels to Millennium. A ground lease will allow the parties to conduct their responsibilities up until the transfer. The development agreement will contain the provisions granting the developer the right and obligation to purchase the developer's parcels following the Exclusive Use Period.

The developer will also design and manage construction of 250 units of affordable housing, a childcare facility, community centre, non-motorized boating facility and related underground parking facilities. The City will pay construction costs for these facilities plus a fee estimated to be \$5 million. Millennium has also proposed a plan to create modest market housing for middle-income earners in the development, and will work with the City over the coming months to finalize its plans.

Land related costs beyond the purchase price include a \$6 DCL per square foot buildable. The cost of the \$6/BSF development cost levy over 808,047 square feet is \$4.85 million and is not included as part of the land value estimated herein.

The City has asked for fees as community amenity charges as high as \$43/BSF on neighbouring sites, with the present proposal at \$26/BSF; for the subject 808,047 square feet, the levy savings will be \$21 million. The final amount is yet to be determined. 50% of the amenities are to be in place for 2010. The balance will roll out over the 10 years beyond that.

City officials confirm that the sale price includes these additional development charges for community amenities that neighbouring developers will have to pay. Effectively the City will pay for these costs through in kind development contributions to the site. Therefore, the price paid by Millennium in effect includes all such supplemental development levies.

The terms of the RFP are that the affordable housing and community amenities are not at the developer's risk. The developer may build these and charge a fee to the City. Alternatively, the City may build these on its own. As such, this analysis excludes these buildings and lands.

In addition, City officials have indicated in the RFP its preference that the affordable housing be located on a distinct and separate piece of land. Discussions with City officials indicate that the affordable housing will be built on a lot bordering 1st Avenue. We have assumed this in our analysis of the sale.

City officials confirmed they would pay any incremental costs associated with soil contamination. Other developer costs at risk include extra site preparation and construction costs related to non-native land fill known to require additional foundation work such as piling and underground parking tanking.

Incremental foundation work is expected to entail piling and related costs. Assuming 20% of the site requires piling, we estimate this would cost approximately \$6.5 million. 50% of the parking stalls will likely require "tanking" at an additional cost of \$5,000 per stall. Based on an allowance of 1,200 square feet per unit and 1.3 stalls per unit, an estimated 438 stalls would need to be tanked at cost of \$2.2 million.

In addition, City Officials reported that due to contamination and unstable landfill, the entire site between First Street and Front Street would have to be excavated down to native soil. Immediately next to First Street, depth would be 3-4 meters but then would go to 8 meters deep for the rest of the site. Between the water and Front Street, further analysis has to be done but development would likely be piled due to depth and other factors. The site would then have to be refilled with load bearing material. Developer's portion of site incremental excavation and fill costs and contingencies have not been included in this estimate.

Benefits to the developer include property tax holiday during the development period through an interim ground lease arrangement. This benefit is estimated to be approximately \$4.1 million, present value based on a \$470 /SF of site and applying 2005 mill rates for residential and commercial.

Other benefits to the developer include the likely waving of permit fees during the development period which City officials estimate would run between \$1 and \$2 million. We have used a figure of \$1.5 million.

City officials confirm that the purchaser has waived the right for the City to pay the holding costs during the Exclusive Use Period, which they estimate to worth between \$10 and \$12 million. We have used a figure of \$11 million discounted at 7%; the present value is \$8.4 million

Payment of 85% of the purchase delayed until after project completion. At a 7% discount rate, the present value of the transaction is \$154 million, a \$39 million reduction.

Present value of land and related costs total \$144.6 million or \$178.94 per buildable market square foot.

The allowable development area of 808,047 saleable square feet assumes RFP (December 7, 2005) and ODP guidelines. This figure is net of any affordable housing construction, which is at the cost and risk of the City.

Southeast corner of the intersection of West 1st Avenue and Wylie Street, east of Cambie Street and north of West 2nd Avenue, in the South East False Creek area. Improved with a four-storey timber and brick building on the west portion of the site plus a one storey, non-basement concrete block building adjacent on the east. Historic use for storage and office purposes, aggregate building area is approximately 42,052 square feet. The four-storey-plus-basement heritage building is to be retained, with the one storey, non-basement concrete block structure to be demolished. A five-storey building is to be erected on the east portion of the site and combined gross floor area for the two structures is to be 69,084± square feet. The floor space ratio for the overall development will be 3.81. 40 parking stalls for this project will be under a nearby site at 420 West 1st Avenue, which was purchased as part of the subject acquisition and immediately sold to the purchaser of the former Maynard's site, with the requirement to accommodate (but not pay for) the parking forming part of the transaction.

To compensate the owner for the cost of retaining the heritage building, the City of Vancouver will provide 93,073 square feet of transferable density. Valued at \$50 PBSF, this incentive was intended to offset the incremental cost of retention relative to new construction,

Forms part of the South East False Creek Official Development Plan, adopted July 2005; sub-area 1B, allowing a total floor area of 81,655 square metres or 878,956± square feet, all of which can be multiple family residential. Specific land uses and regulations as per the Official Development Plan point to a floor space ratio of 3.50 for the subject enclave, including mandatory retail, service and office uses. Development will occur primarily under the CD-1, Comprehensive Development District zoning. Maximum building height in Area 1B is 38 metres or 125 feet.

As a general comment, the subject has a density, measured in terms of FSR and unit per acre (UPA), toward the lower end of the market data range. With high demand and limited land supply, the City favours higher densities in contemporary land developments than it did thirty years ago when the subject development was approved.

To consider sales of land that in aggregate have the characteristics relevant to this analysis, it has been necessary to include land sales extending back to April of 2003. Because the Vancouver multifamily land market has been rising, a time adjustment is needed. The two common methods to evaluate changing market conditions involve the analysis of individual property resales, and the analysis of sales of similar properties. Because the development market has been strong, buyers of development sites have tended to develop rather than hold them; consequently, there is little in the way of recent resales to analyse. We therefore examined sales of similar properties.

Multifamily land sales in suburban areas of Vancouver tend to be zoned RM-3, RM-4, C3-A and C2. RM-4 is the most common in recent land sales, and being a pure residential use schedule, is free from the commercial influences of the C2 and C3-A schedules. We examined sales of RM-4 sales since early 2003, completing separate analyses for the east and west side markets of Vancouver.

Plotting these sales illustrates rising values.

Applying the formula for the trend line of East side RM-4 sales shows a typical 2.24% monthly rate of increase over the period of interest.

The west side sales show a typical 1.17% monthly increase in values. The subject lies in the west side, however, the east side data is technically better: the west side data shows somewhat greater variability than that from the east side sales, and does not have any 2006 sales, while two 2006 trades exist in the east side data. Since the subject lies on the west side, we have given greatest weight to the west side data, recognizing the higher time adjustment shown by the east side data in our time adjustment of 1.25% per month.

The following chart shows the results of this time adjustment.

After adjustment for time, the price per buildable square foot ranges from \$98 to \$326, and the price per unit extends from \$74,346 to \$371,876, with a central tendency near \$200,000. Floor space ratios range from 0.75 to 3.81; at 1.07, the subject lies toward the bottom end of this range. We completed three graphical analyses to examine patterns within the data with respect to the relationship between value and density.

Graphical analysis shows no obvious relationship between the price per buildable square foot and the floor space ratio which is simply because the sales do not represent homogenous properties: development economics are such that the price per buildable square foot generally declines as density increases.

There is a clear relationship between density, measured in terms of units per acre, and the price per unit. There is also a clear relationship between the floor space ratio and the price per square foot of land.

With the foregoing as background, we turn now to analysis of the market data.

Land Sale No. 1 is a development site located on the southwest corner of West 6th Avenue and Ash Street in Fairview, near the subject. This 22,000 square foot site is exposed to considerable traffic, mostly from 6th Avenue. An offer to purchase was reported in April 2003 for \$3,060,000 or \$139.09 per square foot, representing a price of \$87,429 per unit and \$85.59 per square foot buildable. (Time adjusted rates are \$136/BSF and \$138,432 per unit.) At the time of offer, the site contained two old commercial buildings that contributed little to overall value. The purchaser was to build a 35-unit multiple-family residential development. This setting is clearly inferior to that of the subject and the FSR is higher; we regard both time-adjusted indicators as low for the subject.

Land Sale No. 2 is on the south side of Cornwall Avenue, east of Balsam Street and opposite Kits Beach, with excellent water views. We included this and another sale to help reflect the influence of a water amenity on value. The 5,401 square foot site is zoned RM-4, with a maximum 1.45 FSR. It now contains a four-storey, four-unit luxury multiple family residential

development. The property sold in July 2003 for \$975,000. Time adjusted rates are \$192 per buildable square foot and \$371,876 per unit. These are very large units, at 1,940 square feet, relative to the subject at 1,049 square feet; the unit rate is high for the subject. Density, in terms of FSR is higher; however, the subject orientation to the water is superior. Further, the site is very small, and very small sites are less economic to develop. Overall, we regard the \$192/BSF as low for the subject.

Land Sale No. 3 is a 21,981 square foot FM-1 zoned multiple family residential development site located on the south side of West 6th Avenue, west of Willow Street, in Fairview. West 6th Avenue in this location is a busy street. The former "McIver's Appliances" site sold in September 2003 with a development permit in place for a 52 unit low-rise multifamily development that included a small commercial component. The sale price of \$2,600,000 represented time adjusted rates of \$107 per buildable square foot and \$74,346 per unit. The units are very small, at an average of only 692 square feet, and the subject setting is clearly superior. These rates are low for the subject.

Land Sale No. 4 is a 1.4-acre comprehensive development site two blocks east of Cambie Street, south of Langara Golf Course in the Oakridge area of Vancouver. At the time of sale, the property was improved with a vacant, older private hospital structure. Vancouver has now amended the zoning to allow up to 43 multiple dwelling units (30.5 UPA) at 1.0 FSR. The April 2004 sale yielded \$5,500,000, with time-adjusted rates of \$122 per square foot buildable and \$174,423 per unit (for larger units than in the subject). At 1.0 FSR, this property is one of the few sales with an FSR near that of the subject. The subject setting is clearly superior, and the rates associated with this trade are thus low.

Land Sale No. 5 is a 15,569 square foot, RT-8 zoned development site on the west side of Macdonald Street, north of West 3rd Avenue in the Kitsilano. The property sold for \$2,403,000 in October 2004, showing a time-adjusted rate of \$261 per square foot buildable. This site has a low 0.75 FSR, and an attractive Kitsilano location. I regard this rate per buildable square foot as high for the subject.

Land Sale No. 6 refers to a 12,000 square foot potential development site located on the south side of Cornwall Avenue, between Vine Street and Yew Street, across from Kitsilano Beach

Park. The property was improved with a three-storey, 24-unit apartment building and sold in January 2005 for \$4,650,000 or \$387.50 per square foot of site. Value is primarily in the land, although the improvements contributed somewhat to value. Based on the 1.45 maximum floor space ratio the transaction showed a time-adjusted rate of \$325.74 per buildable square foot. The subject setting is superior, however, the contribution of the comparable improvements and the appeal of the Kitsilano location are more than offsetting – I regard this adjusted rate as materially high for the subject.

Land Sale No. 7 refers to a 28,125 square feet, RM-3 zoned property on the south side of West 14th Avenue, east of Granville Street. The three-lot assembly closed between January and April 2005. The purchase price was \$7,690,000, which after adjustment for time reflects rates of \$203,767 per unit and \$229.84 per buildable square foot, based on a 1.45 floor space ratio. The purchaser contemplates a high-rise development on the site, which will provide very good views to units on the upper floors. This phenomenon will offset, to a greater or lesser extent, the superior subject setting and the higher FSR. Average unit size is 887 square feet, smaller than for the subject. I regard the \$229.84 per square foot rate as a useful indicator for the subject, with the adjusted unit price of \$203,767 low, due to the smaller average unit size.

Land Sale No. 8 is a three-lot redevelopment assembly located on the north side of West 4th Avenue, between Highbury Street and Wallace Street near Jericho Beach. The properties were improved with three wood frame apartment buildings containing 32 units. The purchaser was planning to redevelop the site in the short to medium term. The May 2005 trade at \$5,775,000 reflected a time-adjusted rate of \$259.47 per square foot buildable, at the maximum 1.45 FSR. This Point Grey location has high market values, and represents a superior location, which the subject water setting mostly offsets, and the improvements likely continue to contribute value; I regard this \$259 rate as high for the subject.

Land Sale No. 9 pertains to an assembly of three properties totalling 37,496 square feet on the northwest corner of West 11th Avenue and Birch Street in the Fairview neighbourhood of Vancouver. At the time of the sale, the overall property was improved with a rental conversion dwelling and two low-rise apartment buildings. Polygon is proposing a 12-storey high-rise development with a maximum floor area of 54,369 square feet. The properties were assembled in August 2005 for \$11,973,002, which yields a time-adjusted rate of \$246.73 per square foot

buildable at the maximum 1.45 FSR. The purchaser contemplates a high-rise development on the site, which will provide very good views to units on the upper floors. This phenomenon will offset, to a greater or lesser extent, the superior subject setting and the higher comparable FSR. I regard the \$246.73 per buildable square foot as a slightly high indicator for the subject.

Pending Land Sale No. 10 pertains to the December 2005 contract for a 17,250 net square feet property on the south side of West 8th Avenue, between Yew Street and Arbutus Street in the Kitsilano neighbourhood. At the time of the sale, the property was improved with a three-storey, wood frame apartment development constructed in 1966. The purchaser is proposing to demolish the existing improvements and construct 18 townhouses with a saleable area of 26,100 square feet and secured underground parking garage measuring 11,000 square feet. This proposed development reflects a floor space ratio of 1.51, based on the net site area of 17,250 square feet. The offer price was for \$5,700,000, showing adjusted rates of \$232.27 per square foot buildable and \$336,796 per proposed unit. After considering the settings of subject and comparable, we regard the \$232.27 rate per square foot buildable as a useful indicator for the subject; as the 1,450 square foot average unit size is larger than that of the subject, the \$336,796 per unit is a high indicator

Pending Land Sale No. 11 refers to the Maynard's Auction site, a 67,812-square-foot development site on the northwest corner of Wylie Street and West 2nd Avenue in Fairview, east of the subject. The eight-lot assembly has an offer as of December 2005 for \$100 per square foot buildable or approximately \$23,680,000. The property is located on the edge of the Southeast False Creek neighbourhood, but out of the Olympic Village security zone and will not be subject to the additional development cost charges (budgeted at the time of sale between \$12 and \$26 per buildable square foot, plus the citywide \$6 levy.) At the present 3.0 FSR limit, the rate per buildable square foot is \$116.40, however at the 3.5 FSR provided on nearby Southeast False Creek South East sites, the rate per buildable square foot is \$99.77. After adjustment for time, the 3.0 FSR unit rate is \$123.80 per buildable square foot; at 3.5, the adjusted rate is \$106.11. The density is much higher, and the setting clearly inferior; the unit rates associated with this trade are low for the subject.

Land Sale No. 12 refers to a 30,274-square-foot site situated at the southwest corner of West 1st Avenue and Manitoba Street, in the South East False Creek development area. The property sold

in December 2005 for \$9,750,000 or \$322.06 per square foot of site. Based on a floor space ratio of 3.5, the transaction shows an adjusted rate of \$97.87 per buildable square foot. This site is obliged to pay the South East False Creek development levies, anticipated at the time of sale to lie between \$12 and \$26 per buildable square foot, but subsequently expected to lie in the order of \$26, in addition to the \$6 city wide charges. Again, due to setting views and FSR, the \$98 rate associated with this sale is materially low for the subject.

Land Sale No. 13 is the former St. Vincent's Hospital property at the southeast corner of Arbutus and West 49th Avenue in Kerrisdale. The site has a sloping terrain and backs onto a presently unused CPR rail corridor; it is near the commercial heart of Kerrisdale. The 1.281-acre triangular site is proposed for 28, 2.5-storey townhouses, "Bannister Mews." Closing in December 2005 the trade at \$6,755,000 yields an adjusted \$255,436 per unit and a price per buildable square foot of \$154.43 at the maximum 0.83 FSR; notwithstanding the Kerrisdale market demand, the site setting is much inferior to the subject – the price per buildable square foot is clearly low for the subject; however, because the average unit size is considerably larger, the \$255,436 unit rate is likely toward the high side.

Land Sale No. 14 is the Athlete's Village property in False Creek. The net "market" lands are about 6.89 acres, and will accommodate about 808,047 square feet of saleable or rentable area. The project entails an additional +/- 300,000 square feet of non-market housing and community amenity space. This is a desirable waterfront residential site, and likely the last to be available for years. The developer is to construct the facility in time for the Olympics, receiving the project for sale or rental thereafter. The nominal value of the April 2006 transaction is \$193,000,000; after adjustment for a variety of factors, the net price is \$144,600,000, \$178.94 per buildable square foot. As a general comment, this rate should be less than appropriate for the subject, which is a much smaller site in a better False Creek, and has a materially lower density. However, reliance on this unit rate requires caution, due to the complexity of the transaction.

Land Sale No. 15 is the Best Building site at West 1st Avenue and Wylie Street, a block east of the Cambie Street Bridge, and forming the westerly boundary of the South East False Creek development area. Sites in this location are obliged to pay area development costs, presently expected to be in the order of \$26 per square foot, plus the \$6 per square foot citywide levy. The four-storey-plus-basement heritage building is to be retained, with the one storey, non-basement

concrete block structure to be demolished. A five-storey building is to be erected on the east portion of the site and combined gross floor area for the two structures is to be 69,084± square feet. The floor space ratio for the overall development will be 3.81. This April 2006 agreement at \$9,375,000 equates to \$135.70 per buildable square foot and \$175,750 per unit. There is a significant amount of transferable density associated with retention of the existing building; however, this incentive supposedly reflects the added costs of its retention. Again, while the price per buildable square foot and per unit are clearly low for the subject, the complexity of this transaction makes it difficult to rely on the data as more than a general indicator.

In terms of the adjusted price per buildable square foot, we regarded indices No. 5, 6, 8 and 9 as high limits, showing values of \$247 and beyond. Indices No. 1, 2, 3, 4, 11, 12, 13, 14 and 15 are low indicators, showing rates of \$192 and less. The remaining indicators, No 7 and 10 show rates of \$230 and \$232 that were considered useful indicators for the subject. In our view, value will lie between \$220 and \$240 per buildable square foot. At the \$230 midpoint, value is \$13,514,800.

\$/BSF	value
220	12,927,200
230	13,514,800
240	14,102,400

The price per unit indicator was also considered, albeit for support only, because there are fewer indicators. Indices No. 1, 3, 4, 7 and 15 are considered low indicators, showing rates up to \$203,767. Three sales were considered to show upper bounds – Indices No. 2, 10 and 13, with rates of \$255,436 and higher. Our analysis points to value within the lower part of this ranges, say in the order of +/- \$230,000 to \$250,000 per unit, where value for the 56-unit subject property would lie between \$12,880,000 and \$14,000,000 – the midpoint is \$13,440,000.

\$/unit	value
230,000	12,880,000
240,000	13,440,000
250,000	14,000,000

Our **\$13,514,800** conclusion of value relies on the price per buildable square foot unit of comparison, with good support from the price per unit analysis.

Exposure time<sup>9</sup> is the time a property remains on the market. In an appraisal, the term means the estimated length of time an owner would likely need to market the appraised property interest before the hypothetical consummation of a sale at market value on the effective date of the appraisal. An opinion of exposure time is a retrospective estimate that has its basis in an analysis of past events assuming a competitive and open market.

In our view, the subject property ought to trade within a time typical for its market. This exposure time was typically three months or less for properties such as the subject. This time estimate assumes no known or suspected defects, reasonable pricing and professionally marketing. It does not include the time for normal due diligence, nor the closing time after an agreement in principle.

#### *Ground rental conversion rate*

While the City has at various times adopted policies respecting ground rental conversion rates, it often relies on real estate appraisal advice. We routinely interview officials of property owners (usually government or quasigovernment in character) respecting their land use policies: The majority who monitor the marketplace rely on appraisal advice for properties of material value. Properties of nominal value are often rented using administratively simple policies, involving “zone” values or assessed land value.

The various municipalities and agencies surveyed suggest an overall range in yield rates of 6% to 12%, with the province charging as low as 4.5% for rural and remote locations. Industrial rates fall within a narrower range of 8% to 12%, with the preponderance of evidence suggesting 8%. In our experience, the public sector trails the private sector in setting their rates. We have given little weight to these leasing practises, other than to note that historically the rates tend to lie slightly beneath the prevailing overall rate for improved properties of a similar use and nature.

One can gain insight into ground rental conversion rates by examining the overall rates associated with sales of improved multifamily residential properties. These improved sales generally show higher rates than appropriate for long-term land leases, due to the need to recapture depreciating building assets. Representative recent sales of improved residential

Apartment Sale No. 1 refers to the December 2004 sale of an 83-unit, 14-storey, high-rise apartment building on the west side of Yew Street, north of 43rd Avenue in the Kerrisdale neighbourhood of Vancouver; the site measures 33,106 square feet and has RM-3 zoning. The building contained 15 studios, 55 one-bedroom units and 13 two-bedroom units and was reportedly in good condition at the time of the sale. The property traded for \$15,600,100 or \$187,953 per unit, while the overall rate was 4.4%; 27.4% expense ratio, with the rents including heat.

Apartment Sale No. 2 is a 24-unit apartment building located on a 12,000 square foot RM-4 zoned site on Cornwall Avenue in the Kitsilano area of Vancouver. A January 2005 offer for \$4,650,000 or \$193,750 per unit closed in April. The offer reflects an overall rate of 4.2%. Rents were regarded as below market at the time of the sale; low rents depress overall rates.

Apartment Sale No. 3 involves a 50-year-old five-storey concrete apartment building with one level of secured parking, reportedly in good condition. It has a very good west-of-Denman location on the northeast corner at Gilford Street, in the West End. Hollyburn Properties acquired the property from an estate. This 41-suite property has mostly bachelor units, and occupies a small 8,712 square foot RM-5B zoned site. Closing in April of 2005, this \$5,600,000 sale yielded a 4.8% overall rate.

Apartment Sale No. 4 pertains to a 42-unit, seven-storey concrete apartment building on an 8,646 square foot RM5-A zoned site, midblock on the north side of Harwood Street, west of Broughton, in the West End neighbourhood of Vancouver. The building was constructed in 1959 and was reportedly in good condition. The property traded in April 2005 for \$5,500,000 or \$130,952 per unit. The overall rate was 3.83%, expenses at \$2,987 per unit are reasonable, but the high operating expense ratio of 37% shows that rents are low.

Apartment Sale No. 5 is a 14-storey, concrete high-rise apartment building in the West End. The property was listed in July 2004 for \$12,875,000 or \$125,000 per unit, eventually selling in April of 2005 for \$12,500,000. The transaction reflected an overall rate of 5.2% with a 30.5% operating expense ratio.

Apartment Sale No. 6 is a ten-storey 38 suite apartment building on the corner of Nicola Street and Harwood Street, in Vancouver's West End. The RM-5 zoned site is small, at only 9,432 square feet, but it offers views from the upper levels. 18 of the 38 units are studios. Closing in December of 2005, the \$5,350,000 sale yielded an overall rate of 4.1%, with expenses at a high 37.7%, again suggesting rents were below market levels, thus depressing the overall rate.

Apartment Sale No. 7 is Bermuda Manor, a 67-unit three-storey wood frame apartment in Kerrisdale; The 49,500 gross square foot improvement represents a 1.33 FSR on the 36,920 square foot RM-3 zoned site - maximum density would be 1.45 FSR. Estimated at 35 to 40 years in age, the June 2005 sale at \$12,883,250 represents a 5.08% overall rate.

Apartment Sale No. 8 is an older four-storey mill and masonry apartment at the corner of West 10th Avenue and Birch Street, in Vancouver's Fairview neighbourhood. This 69-suite apartment sits on a 12,632 square foot RM-3 zoned site, and albeit clean, had significant deferred

maintenance at the time of sale. The July 1, 2005 sale at \$7,000,000 produced an overall rate of 5.7, based on the income profile "as is." The poor condition would lead to a price discount, and thus a higher overall rate than for a property in average condition.

Apartment Sale No. 9 is a six-storey masonry and concrete apartment project on the south side of Comox Street, west of Chilco, in Vancouver's West End. This 41-suite apartment project occupies an 11,921-square foot RM-5B zoned site. Closing in August of 2005, the \$7,888,000 trade yielded a 4.1% overall rate (expenses 31.7%, \$3,726 a unit)

Apartment Sale No. 10 is a four-storey, 39-unit apartment building located on the northwest corner of Grant Street and McLean Drive, in the Grandview neighbourhood of Vancouver. The RM-4 zoned site has a net area of 0.46 acres, with the improvements representing a 1.33 FSR. The property sold in November 2005 for \$3,925,000 or \$100,641 per unit. The transaction shows an overall rate of 5.0% (33.8% operating expenses). East side Vancouver locations often have a higher overall rate than those on the west side.

Apartment Sale No. 11 refers to the December 2005 sale of a 47-unit apartment building on a 22,400 square foot RM-4 zoned site at the northwest corner of Cypress Street and West 7th Avenue, in Kitsilano. After adjusting for post purchase repairs and fees, the price was \$7,825,000. The overall rate was 4.5%. Expenses were 30.23%, with the landlord paying heat.

Apartment Sale No. 12 represents the January 2006 sale of a 32-unit, wood frame apartment building located on the south side of West 8th Avenue, in Kitsilano. The RM-4 zoned site measured 18,750 square feet and represented most of the value. Built circa 1966, 22 units were 1-bedroom, with six 2-bedroom and only three studio units. The sale price of \$5,700,000 equates to an overall rate of 4.04%, with a 30.1% operating expense ratio. When land makes up the bulk of value, lower overall rates are the result.

Apartment Sale No. 13 is a three-storey 21-unit wood frame apartment in Kitsilano. The 12,000 square foot site is zoned RM-4, 1.45 FSR. The building has an elevator, both two-bedroom suites have two bathrooms and the condition was very good. Rents were believed to be below market, which influenced the overall rate; the \$4,000,000 estate sale closed in January 2006: 3.8% overall rate, 30.6% operating expense ratio, \$3,210 per unit. Rents were reportedly below market, thus depressing the overall rate.

Apartment Sale No. 14 is Carolina Court, a 41-unit three-storey frame apartment building in the Mount Pleasant neighbourhood of Vancouver. The 0.46-acre RM-4 zoned site can yield a maximum density of 1.45 FSR; however, the existing improvement likely represents full development of the site under present guidelines. The property sold in January of 2006 for \$4,250,000, after 84 days of marketing; 4.97% overall rate (33.7% operating expense ratio, \$2,613 per unit). The expenses as reported appear low, and this would inflate the overall rate.

Apartment Sale No. 15 is Fortune House, a 12-storey strata apartment high-rise located in Downtown Vancouver, southeast corner of Howe Street and Nelson Street. This is a 1980's office building that was converted to a strata-titled apartment building in the '90s. Comprised of 130 residential units and 8 retail units with a total net saleable/leasable area of 84,106 sq. ft., the top two floors contain eight luxury penthouse suites. The transaction closed at the end of March 2006, at a price of \$30,030,000, a value inflated by the strong marketplace for strata apartments. The overall rate of 3.37% requires an upward adjustment for this factor.

Apartment Sale No. 16 is an extensively renovated 27-suite three-storey apartment building on the south side of West 12th Avenue, west of Oak Street in Vancouver's Fairview neighbourhood, near transit. It occupies a 12,632 square foot RM-3 zoned site. The property sold in April of 2006 for \$5,200,000, yielding a 4.9% overall rate (29% operating expense ratio, \$3,856 a unit.) The extensive investment in renovations has led to quality units with high rents, and inflated the overall rate.

Pending Apartment Sale No. 17 is a three-storey frame apartment building on the northwest corner of West 14th Avenue and Spruce Street, in Fairview. It occupies an 18,731 square foot RM-3 zoned site. An offer in April of 2006 for \$5,900,000 reflects a 4.2% overall rate (\$3,297 expenses per unit, 30.0% of effective gross income).

Pending Apartment Sale No. 18 is a three-storey-plus-penthouse 30 unit frame apartment building in the 1300 block of West 11th Avenue, in Fairview. It occupies an 18,731 square foot site that is zoned RM-3 and comprises the bulk of value. An April 2006 offer to purchase for \$5,600,000 reflects a 3.9% overall rate, at a 32.6% operating expense ratio. Again, the high underlying land value likely depressed the overall rate.

The 18 indices presented traded between December 2004 and April 2006 at prices ranging from \$3,925,000 to \$30,030,000. We examined the data for a pattern of change over time. Plotting these sales on a graph suggests a modest decline, but variation within the data makes it difficult to quantify any specific adjustment.

Overall rates range from 3.4% to 4.7%, with a median and average of 4.31% and 4.45%, respectively. These rates include a rate of return on the land and building investment, as well as recapture of the depreciating improvement asset. All of the indicators require a negative adjustment to reflect a land-only lease situation, but as discussed above, some of the rates require upward adjustment for other factors.

Based on the above, after consideration for the existing strong market conditions, income characteristics, location and relative size, a realistic ground rental conversion rate will lie in the order of 3.75% to 4.25%. According, we adopt a rate of 4.0% for the purpose of the Rate-Times-Value method.

Market rent by the Rate-Times-Value method is estimated as follows:

$\$13,514,800 \text{ times } 4.0\% \text{ is } \$540,592$

This rent is equivalent to \$9,653 per unit per year, and \$9.20 per square foot of building.

The only party who may rely on the opinions expressed in this report is the specified intended user, even where the report is for financing purposes. Where the intended user is a lender, its borrower and the loan insurer may also rely on this report. This report assumes that only the intended user specified herein will rely upon it, and only for the intended use stated herein. No one else may rely on this report without the written consent of the appraiser, which we may not provide retroactively. We expressly deny any legal liability for unauthorized reliance and for any other use.

When preparing an appraisal for lending purposes, appraisers do not investigate if the prospective loan and applicant satisfy prudent loan underwriting criteria. Correspondingly, we assume no responsibility for loans made where the borrower lacks the ability or motivation to repay the loan, or where the lender has not followed prudent lending practices. When we authorize a lender to rely on this report, we grant such authorization subject to the lender completing a thorough due diligence investigation, which reasonably concludes that the borrower has the intention and capacity to repay the loan.

The basis of the opinions and estimates herein is information gathered from various sources considered reliable and believed to be correct.

We assume no responsibility for factors relating to the legal description, state of title or for unapparent conditions of the property not brought to our attention that might affect value.

We have included plans and sketches for visual reference only. We cannot assume responsibility for the accuracy of such illustrations where the basis was third party sources.

The client or identified third parties provided figures in this report relating to land and floor areas unless stated otherwise. Incorrect land and floor areas could render our analysis and conclusions invalid.

The economic conditions and outlook current at the date of valuation form the basis of our opinions and conclusion of value. Because market conditions, including economic, social and political factors change rapidly, and, on occasion, without warning, it could be misleading to rely on the market value estimate expressed herein as of any other date except with the further advice from the appraiser, for which advice we will accept no responsibility unless made formally and confirmed in writing.

We undertook no investigation with the local zoning office, the fire department, the building inspector, the health department or any other government regulatory agency except as expressly described in this report. The subject property must comply with such government regulations. Any noncompliance may affect market value. Confirming compliance could require further investigations.

We were not provided with studies of hazardous materials or contaminated land, and we were not authorized to commission such studies. We therefore offer no opinion with respect to the status of the lands or soils. We assume no responsibility for any such conditions or for any specialized expertise or engineering knowledge required to discover, remove or eliminate them. We recommend retaining an expert in this field if doubt exists about the quality of the soils or groundwater.

The appraiser is not qualified to comment on environmental issues that may affect the market value of the property appraised, including but not limited to pollution or contamination of land, buildings, water, groundwater or air. Unless expressly stated, the property is assumed to be free and clear of pollutants and contaminants, including but not limited to moulds or mildews or the conditions that might give rise to either, and in compliance with all regulatory environmental requirements, government or otherwise, and free of any environmental condition, past, present or future, that might affect the market value of the property appraised. If the party relying on this report requires information about environmental issues then that party is cautioned to retain an expert qualified in such issues. We expressly deny any legal liability relating to the effect of environmental issues on the market value of the property appraised.

Except as this report specifically notes otherwise, our conclusions presume that the appraised property is free and clear of all liens or encumbrances except normal mortgage financing. Our valuation excludes the cost to retire the mortgage obligation.

Our report presumes that adequate fire, peril and liability insurance are available to cover any reasonable use of the property, at costs and terms that have been typical over the years.

The liability of Grover, Elliott & Co. Ltd. for a claim related to professional service provided pursuant to this service in either contract negligent misrepresentation or tort, including the owner's, officers, employees or subcontractors of the firm is limited to the extent that such liability is covered by the Appraisal Institute of Canada's errors and omissions insurance in effect from time to time, which is available to indemnify the company and its appraisers at the time the claim is made and not more than two years after the services are rendered.

No one should rely on this report in any context other than that in which we present it. Use in excerpted or partial form could mislead.

Possession of this report, or a copy of it, does not carry the right to reproduction or publication, in full or in part. No one other than the identified intended user can use this report for its stated purpose. No one can use this report for any other purpose without our written consent. Exceptions exist for due process of law and for confidential review by the Appraisal Institutes of Canada and the United States.

Attendance at any legal proceedings with respect to this report, and any fees and expenses for preparation and attendance requires our prior agreement. However, neither this nor any other limiting condition is an attempt to limit the use that a judicial body might make of this report should it properly become evidence in duly constituted proceedings. Section 11.01 Notice to and remedies of MORTGAGEE

(a) No re-entry, termination or forfeiture of this lease by the LESSOR shall be valid against the MORTGAGEE who has filed with the LESSOR notice of MORTGAGE in favour of the MORTGAGEE and specified in advance for notice under Article XXIX unless the LESSOR shall first have given to the MORTGAGEE notice of the default or contingency entitling the LESSOR to re-enter, terminate or forfeit this lease, specifying the nature of that default or contingency, and stating the LESSOR's intention to take such proceedings and requiring the MORTGAGEE:

- (i) to cure the default or contingency specified in the notice within a period of sixty (60) days from the date of receipt of that notice by the MORTGAGEE; or
- (ii) if the default or contingency is other than the failure to pay BASIC RENT or ADDITIONAL RENT or taxes or any other sums required to be paid to the LESSOR by any provision of this lease and if the default or contingency cannot reasonably be cured within such sixty (60) day period, then to diligently commence to cure the same and to diligently prosecute to conclusion all acts necessary to cure the default or contingency,

and the LESSOR hereby grants the MORTGAGEE access to the SAID LANDS and BUILDINGS for that purpose. If the default

or contingency is cured within the period specified, the MORTGAGEE shall be entitled to continue as tenant for the balance of the TERM, providing that the the MORTGAGEE attorns as tenant to the LESSOR and undertakes to be bound by and to perform the covenants and agreements of this lease; PROVIDED HOWEVER that in the event the MORTGAGEE consists of more than one mortgagee each having a separate charge upon the LESSEE's interest in this lease, and more than one of them wishes to cure the default or contingency specified in the notice aforesaid, then the LESSOR hereby agrees to permit curing of the default or contingency specified as aforesaid, and the assumption of the balance of the TERM as aforesaid, by that mortgagee which is willing to cure and assume as aforesaid and whose charge ranks in priority over the charge or charges held by the other mortgagee or mortgagees willing to cure and assume as aforesaid; EXCEPT THAT in the event any MORTGAGEE has commenced a foreclosure action the provisions of section 21.02(b) shall apply.

- (b) In the event the MORTGAGEE commences foreclosure proceedings against the LESSEE, whether or not the LESSEE is in default of the performance of its covenants and agreements with the LESSOR under this lease at the time such foreclosure proceedings are commenced, the LESSOR shall not re-enter, terminate or forfeit this lease after the commencement of foreclosure proceedings on the ground of any default or contingency entitling the LESSOR to re-enter, terminate or forfeit this lease if the MORTGAGEE:

- (i) shall first have given to the LESSOR notice of the foreclosure proceedings;
- (ii) is actively prosecuting the foreclosure proceedings;
- (iii) cures the default or contingency within a period of sixty (60) days from the date of receipt of notice from the LESSOR specifying the nature of the default or contingency, or if the default or contingency is

PROVIDED HOWEVER that in the event the MORTGAGEE consists of more than one mortgagee and more than one of them commences foreclosure proceedings, the right to cure any default or contingency granted by this section 21.02(b) to a foreclosing mortgagee shall be deemed granted to them in the order of priority of the charges held by the foreclosing mortgagees.

- (c) If this lease shall be subject to termination or forfeiture pursuant to Article XX by reason of the bankruptcy or insolvency of the LESSEE and the MORTGAGEE has filed with the LESSOR notice of MORTGAGE in favour of the MORTGAGEE and specified an address for notice under Article XXIX the LESSOR shall give to the MORTGAGEE notice of the bankruptcy or insolvency of the LESSEE entitling the LESSOR to terminate or forfeit this lease and stating the LESSOR's intention to take such proceedings and requiring the MORTGAGEE to cure the LESSEE's default and the LESSOR's default shall be deemed to have been sufficiently cured if the MORTGAGEE shall,

- (ii) cure every default within a period of sixty (60) days from the date of receipt by the MORTGAGEE of the notice from the LESSOR of the bankruptcy or insolvency of the LESSEE, or if such default or defaults are other than the failure to pay BASIC RENT or ADDITIONAL RENT or taxes or any other sums required to be paid to the LESSOR by any provision of this lease and if such default or defaults cannot reasonably be cured within such sixty (60) day period, immediately commence to cure the same and to diligently prosecute to conclusion all acts necessary to cure the default or defaults;
- (iii) attorn as tenant to the LESSOR and undertake to be bound by and to perform the covenants and agreements of this lease.

PROVIDED HOWEVER that in the event the MORTGAGEE consists of more than one mortgagee the right to take possession and control, to cure any default and to assume the lease as aforesaid shall be deemed granted to them in the order of the priority of their respective charges.

- (d) Any re-entry, termination or forfeiture of this lease made in accordance with the provisions of this lease as against the LESSEE shall be valid and effectual against the LESSEE even though made subject to the rights of any MORTGAGEE to cure any default of the LESSEE and to continue as tenant under this lease.

The receipt and acceptance by the LESSOR of rent or other monies due hereunder with knowledge of any breach of any covenant or agreement by the LESSEE shall not waive such breach. No waiver by the LESSOR shall be effective unless made in writing.

Save as hereinafter provided, if the LESSOR and the LESSEE do not agree as to any of the matters which, if no agreement is reached upon them are by the provisions hereof to be determined by arbitration, any such disagreement shall be determined by arbitration pursuant to the provisions of the Arbitration Act of British Columbia (R.S.B.C. 1960, Chapter 14 as amended to January 1, 1976). The provisions to be implied in submission in pursuance of section 4 of the said Arbitration Act shall not be applicable to arbitration hereunder. The following provisions shall govern any arbitration hereunder:-

- (a) The reference to arbitration shall be to three arbitrators, one of whom shall be chosen by the LESSOR, one by the LESSEE and the third by the two so chosen and the third arbitrator so chosen shall be the chairman.
- (b) The award may be made by the majority of the arbitrators.
- (c) Save as in this lease otherwise expressly provided, the arbitrators shall make their award in writing either within three (3) months after entering on the reference or after having been called on to act by notice in writing from either party to the submission, whichever is the earlier, or on or before any later date to which the LESSOR and the LESSEE by writing signed by them may from time to time enlarge the time for making the award.
- (d) If the arbitrators have allowed their time or extended time to expire without making an award or if the chairman shall have delivered to both parties hereto a notice in writing stating that the arbitrators cannot agree, either party hereto may apply to the Supreme Court of British Columbia or to a judge thereof to appoint an umpire who shall have the like power to act in the reference and to make an award as if he had been duly appointed by all the parties to the submission and by the consent of all the parties who originally appointed arbitrators thereto.

- (e) The umpire shall make his award within one (1) month after the original time appointed for making the award of the arbitrators has expired, or on or before any later day to which the parties by any writing signed by them may from time to time enlarge the time for making the award, or if the parties have not agreed, then within such time as the court or judge appointing such arbitrator may deem proper.
- (f) The provisions of paragraphs (f), (g) and (h) of the Schedule to the Arbitration Act as amended to January 1, 1976, shall be the terms of any submission to arbitration hereunder.

- (h) The costs of the reference and award shall be in the discretion of the arbitrators or umpire, who may direct to and by whom and in what manner those costs or any part thereof shall be paid, and may tax or settle the amount of costs to be so paid, or any part thereof, and may award costs to be paid as between solicitor and client.
- (i) If, within a reasonable time, a party who has been notified of any dispute fails to appoint an arbitrator or the two arbitrators appointed by the parties do not agree upon a third arbitrator, then the party or parties not in default may apply to a judge of the Supreme Court of British Columbia for the appointment by such judge of an arbitrator to represent the party or parties in default or a third arbitrator or both of such arbitrators.

The parties agree that with respect to any amendment to the said Arbitration Act which shall be proclaimed after January 1, 1976, which makes provision that there shall be incorporated in any submission any provision not herein contained, then such provision shall not be a part of such submission to arbitration hereunder unless the parties hereto shall in writing expressly agree to the incorporation of such provision herein.
