s.22(1)

Dear s.22(1)

Re: Request for Access to Records under the Freedom of Information and Protection of Privacy Act (the "Act")

I am responding to your request of February 18, 2021 for:

Records regarding 3792 West 4th Avenue, PID: 010747486, specifically:

- 1) Erosion control plans, and
- 2) Complaints and violations registered against the property. Date range: as far back as possible to February 18, 2021.

All responsive records are attached. Some information in the records has been severed, (blacked out), under s.22(1) of the Act. You can read or download this section here: http://www.bclaws.ca/EPLibraries/bclaws\_new/document/ID/freeside/96165\_00

Under section 52 of the Act you may ask the Information & Privacy Commissioner to review any matter related to the City's response to your request. The Act allows you 30 business days from the date you receive this notice to request a review by writing to: Office of the Information & Privacy Commissioner, info@oipc.bc.ca or by phoning 250-387-5629.

If you request a review, please provide the Commissioner's office with: 1) the request number assigned to your request (#04-1000-20-2021-116); 2) a copy of this letter; 3) a copy of your original request for information sent to the City of Vancouver; and 4) detailed reasons or grounds on which you are seeking the review.

Please do not hesitate to contact the Freedom of Information Office at <a href="mailto:foi@vancouver.ca">foi@vancouver.ca</a> if you have any questions.

Yours truly,

[Signature on file]

Sediment & Erosion Control Plan

RE: 3792 W 4TH AVE BU430446

Dear Hank:

Hazco Environmental Services Ltd. is pleased to provide the following sediment and erosion control plan for the demolition work at the above noted site.

#### Sediment and Erosion Control

Sediment releases will be controlled by taking a proactive approach to control all possible points of release.

The main area of concern will be the truck traffic that will be coming and going from the site during the removal of demolition debris and broken concrete. The attached site plan shows our proposed access and egress point to the site.

The main points of our sediment control plan are:

- Provide an asphalt pad at all current entrances to the site for loading of trucks and cleaning
  of truck tires prior to exiting the site.
- Install Silt Sacks to the catch basins identified on the site plan (2 on 4th Ave., 1 on Highbury Street). The silt sacks will be monitored regularly by our crew and cleaned/changed when required. All catch basins and interceptors on site will be removed and the storm discharge line will be capped at the P/L.
- Implement a street sweeping schedule, whereby the streets and sidewalks are kept clean by
  means of mechanical and physical sweeping and cleaning. Once again, this will require
  regular monitoring by our crew to ensure that the streets are kept clean and a change in
  sweeping schedule or possible suspension of site activities if required.
- Any temporary soil stockpiles will be covered with poly sheeting during periods of precipitation.
- Following completion of the demolition work, a layer of crushed gravel will be applied all
  areas that have been disturbed to remove assets.

It is our intention is to meet any and all requirements of the City of Vancouver and the Ministry of Environment for Urban Runoff Quality while this work is in progress.

If you have any questions or require any further information, please do not hesitate to contact me at 214-7000.

Regards

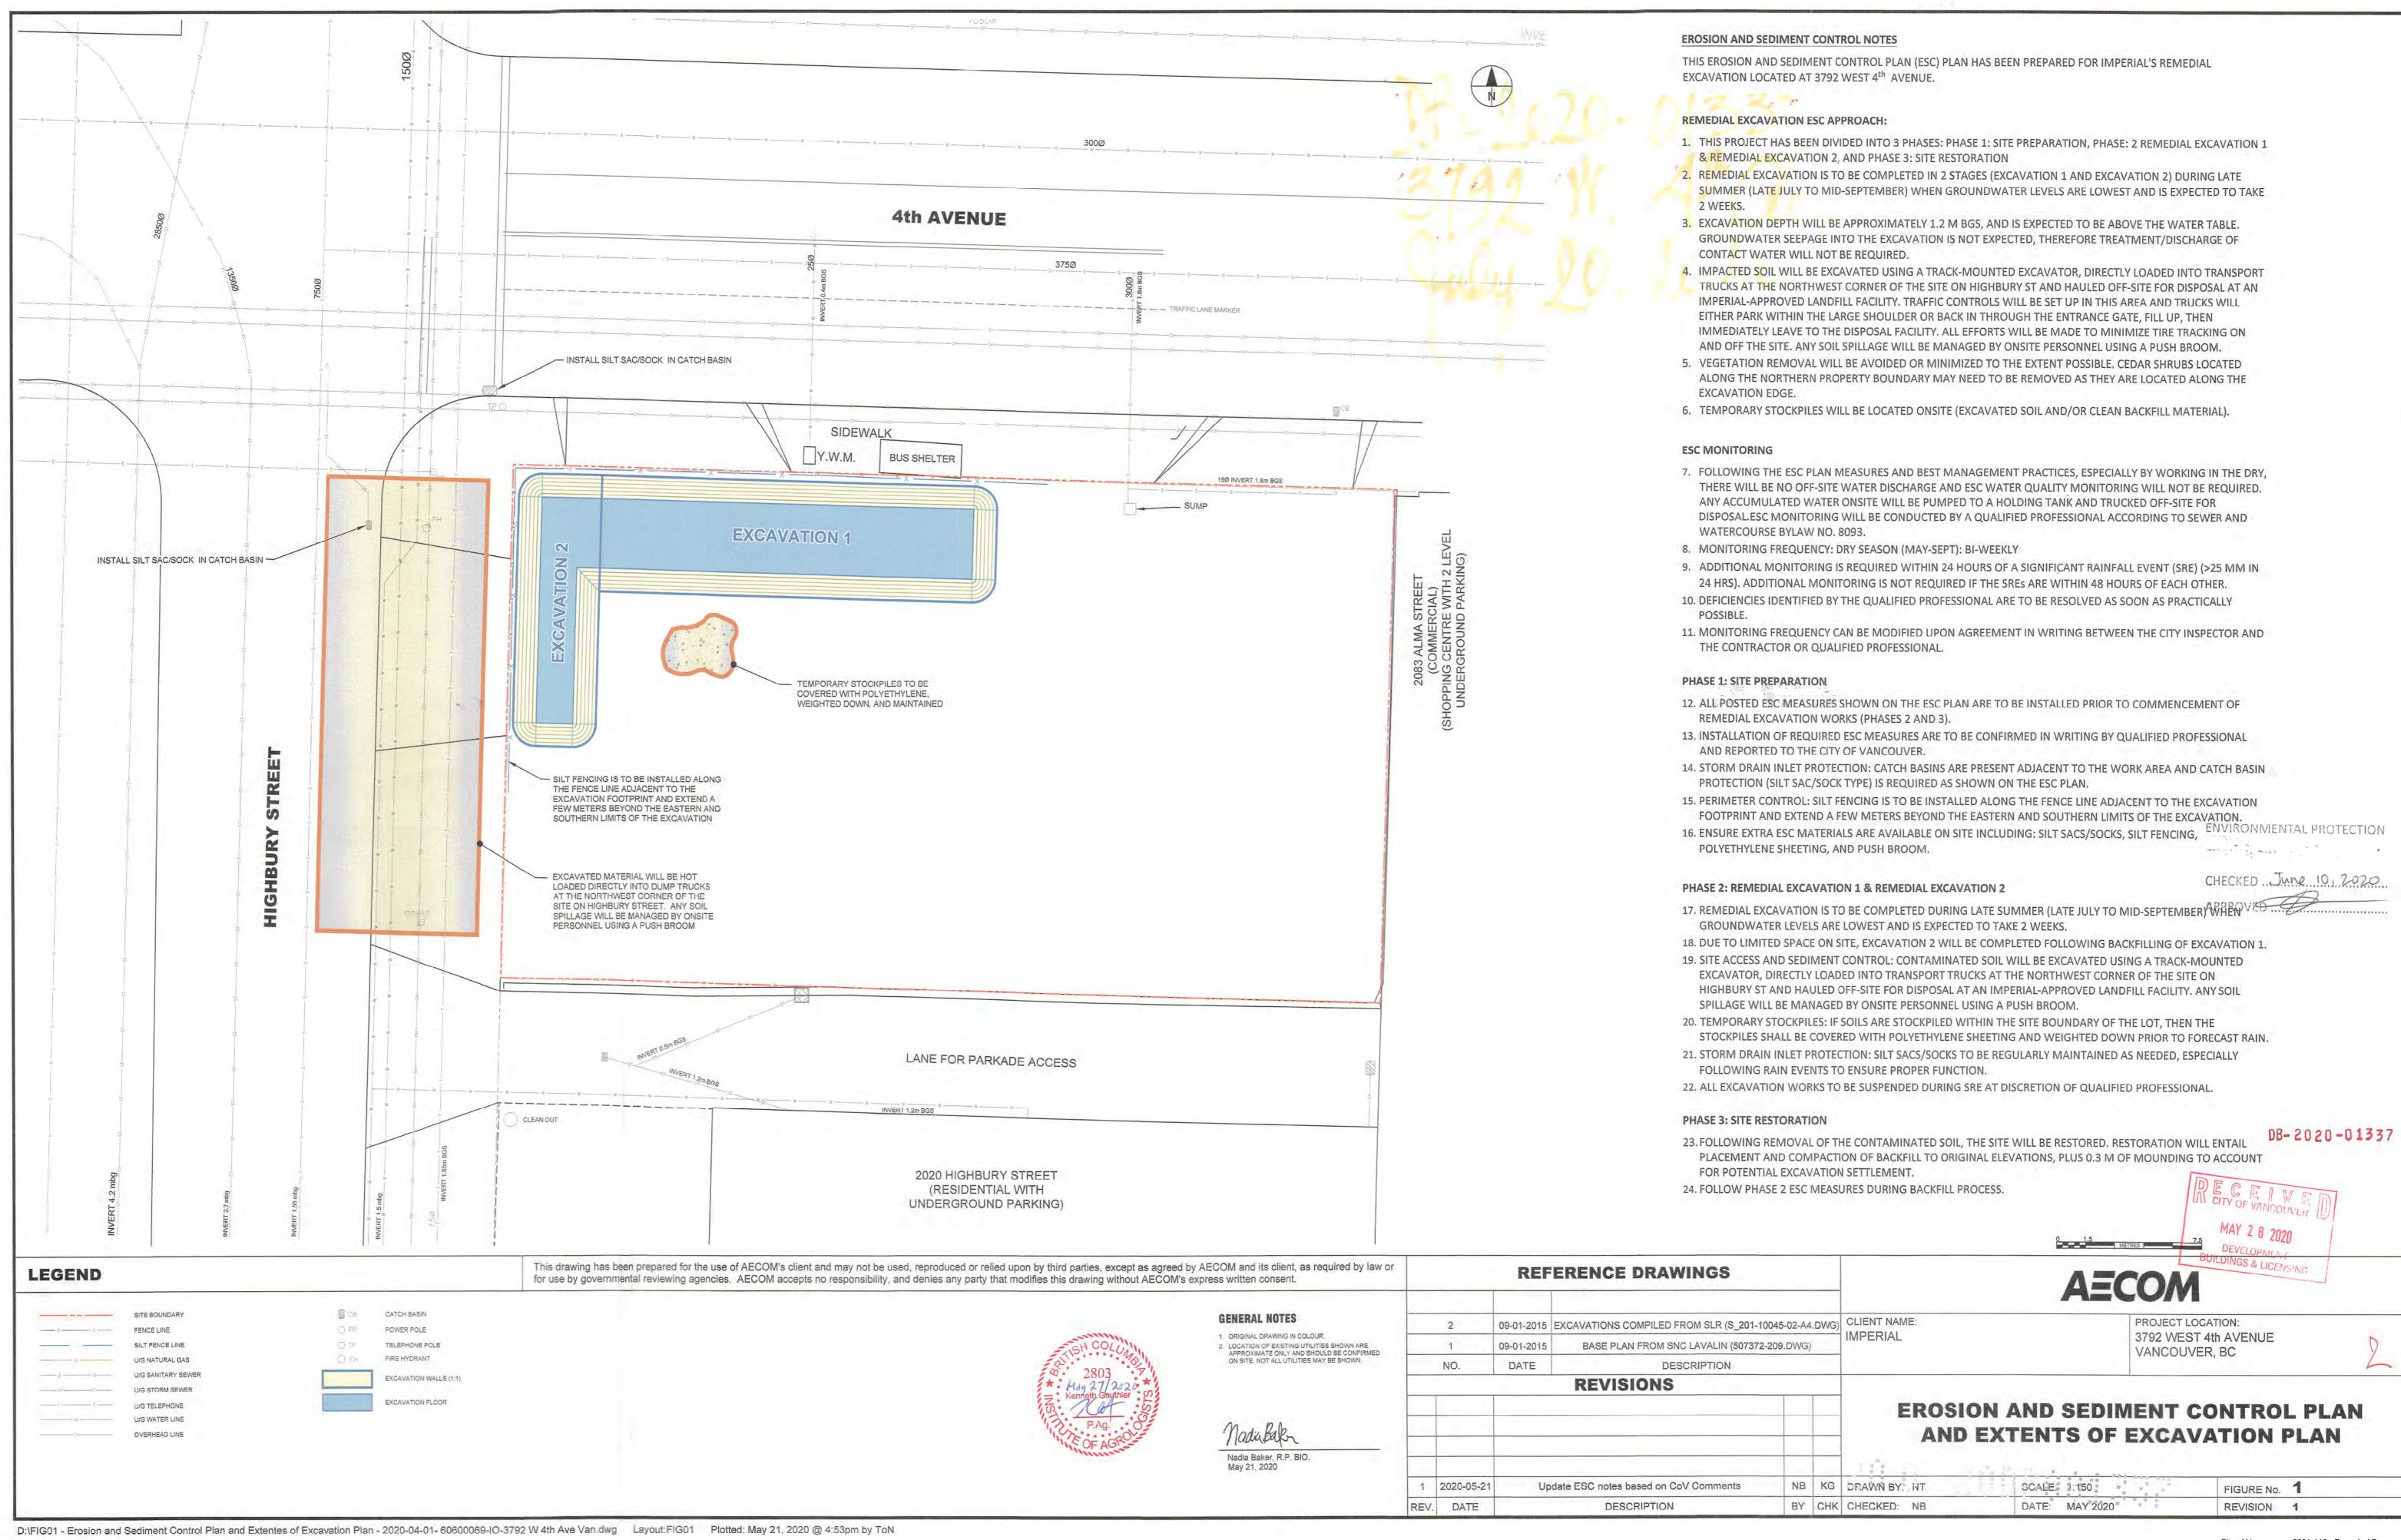

Ron Bobke Project Manager
