

File No.: 04-1000-20-2021-283

June 14, 2021

s.22(1)

Dear s.22(1)

Re: **Request for Access to Records under the Freedom of Information and Protection of Privacy Act (the "Act")**

I am responding to your request of June 1, 2021 for:

Records regarding Gibby's Field, located at 1400 block East 18th Avenue, specifically the nature of the work being done in this area by the City's Engineering, Streets Design department.

On June 1, 2021, the city received your FOI request for the above records.

On June 9, 2021, a clarification letter was sent to you requesting some more information to assist us with our search.

Based on your response to the clarification letter, our office contacted the Engineering Department on June 11, 2021. Engineering confirms the City is currently in process of surveying Gibby's field and the surrounding lane and street. The survey is being done at the request of the Park Board in order to better understand water drainage in the area.

All responsive records are attached.

Under section 52 of the Act, and within 30 business days of receipt of this letter, you may ask the Information & Privacy Commissioner to review any matter related to the City's response to your FOI request by writing to: Office of the Information & Privacy Commissioner, info@oipc.bc.ca or by phoning 250-387-5629.

If you request a review, please provide the Commissioner's office with: 1) the request number (#04-1000-20-2021-283); 2) a copy of this letter; 3) a copy of your original request; and 4) detailed reasons why you are seeking the review.

Yours truly,

[Signature on file]

Barbara J. Van Fraassen, BA
Director, Access to Information & Privacy

ED Request Form - Gibby's Field 4.29.pdf

Hi Patrick,

We are doing a nature restoration project in a residential neighborhood and it would be really helpful if your team and do a survey for the site. I noticed on the form that there is an option for drainage investigation to be included, can you provide me a little more info on what this would include? It looks like there may be a potential to redirect /combine water flow from surrounding areas to this site and provide opportunities for temporary water feature to increase biodiversity. Any drainage information that can be included as part of the survey would be extremely helpful.

Thanks,

Penny Huang
