March 20, 2023

s.22(1)

Dear s.22(1)

Re: **Request for Access to Records under the Freedom of Information and Protection of Privacy Act (the "Act")**

I am responding to your request of February 13, 2023 under the ***Freedom of Information and Protection of Privacy Act*** for:

The following records regarding the Arbutus Greenway and benches received by 3-1-1, the council correspondence mailbox, or any staff of the Arbutus Greenway Project:

- 1. Comments or complaints about the lack of benches;**
- 2. Comments or complaints about existing benches; and**
- 3. Requests to add or remove benches.**

Date range: September 10, 2021 to February 12, 2023.

All responsive records are attached. Some information in the records has been severed (blacked out) under s.15(1)(l) and s.22(1) of the Act. You can read or download these sections here: http://www.bclaws.ca/EPLibraries/bclaws_new/document/ID/freeside/96165_00.

Under section 52 of the Act, and within 30 business days of receipt of this letter, you may ask the Information & Privacy Commissioner to review any matter related to the City's response to your FOI request by writing to: Office of the Information & Privacy Commissioner, info@oipc.bc.ca or by phoning 250-387-5629.

If you request a review, please provide the Commissioner's office with: 1) the request number (#04-1000-20-2023-084); 2) a copy of this letter; 3) a copy of your original request; and 4) detailed reasons why you are seeking the review.

Yours truly,

[Signed by Cobi Falconer]

Cobi Falconer, MAS, MLIS, CIPP/C
Director, Access to Information & Privacy

Describe details (who, what, where, when, why) Only happens when the weather is better. 910 Non-Emergency has been called but something also needs to be done like relocating these benches to more of a commercial area of the green way. Have there been any examples in ways to better manage gatherings? There was a gathering last night, became an evening situation, to avoid from the bus lane. There are benches on the greenway (but not on the neighboring property). Most weekends they are used by a group of people to bike to music and hang out. He addressed his concerns when they were originally installed and he was told that he would need to contact the non-emergency police when they are there later at night. That's not a reasonable option. The police are busy doing other things and along with that the teenagers hanging out on benches doesn't seem right. However they are very noisy and this is a residential area. Citizens would like to request that the benches be removed or at least moved to more of a commercial area of the green way. Some of 17th would be ideal. Please contact us discuss options for the discussion. 2. Type of feedback Complaint 3. Feedback regarding City Department 4. Department 5. Department Services 6. | Public Hearing Correspondence Case | 103104126780 | 311 | UNADDRESSSED LOCATION | UBA 311 | app version: 1.12 original address: 311 UNADDRESSSED LOCATION | <p>1. Subject (address if applicable): 2086-2098 West 7th Avenue, and 2091 West 8th Avenue</p> <p>2. Position: Oppose</p> <p>3. Comments: Bluestad Wood: The Project's site itself is home to a remnant of CFB woodshed, dating back perhaps more than a 100 years. It was planted at some time in the past with cypress, and laurels. It provided so much welcome cooling, during last year's heat dome, that grateful residents, both and pretty painted benches, under its shade. There are a number of three-storey walk-up townhomes, which feel the heat quite badly, being heat islands. Yes, heat islands do exist in this part of Hillside along Arbutus and are shown clearly on the maps. Delamont Park, the toddler playground opposite, which because of its silica sand floor, absorbed heat and was off-limits to children. Sure enough if you look at the DTES heat map from the Urban Forest Strategy.pdf this woodshed shows up as a pale blue rectangle 2 blocks below Broadway on Arbutus. The boxes that are on the 1 x 1 m rectangles classified as "Land Surface Temperature on a hot summer day (Range: C14-C15) Senior non-profit) MAPPING URBAN HEAT p11 p17 Where Section Two. These are beautiful, a large, healthy and resilient tree. The arbutus report, describes their site as the subject of concern of three lots including 44 acres in two between residential streets and the Arbutus Greenway to the west. The southern lot along 8th Ave currently has no buildings on site and a fence in yard. The two lots along 7th Ave have no on-site structures, however there is a walking path through with park benches. These two lots are mostly grass with multiple connected trees. The dominant on these lots are mostly grass with multiple connected trees. The dominant on-site trees species is Norway spruce with multiple connected trees. There are no on-site low-stemmed trees, 12 street trees, and trees along the Greenway. This application proposes to remove eight on-site trees, and to add street trees located in the proposed driveway on Arbutus Street above the building's proposed footprint. There are upland accent trees lagged down to streets, which then, showing great resilience grow up again, and extend the area along the heat dome. So much (and surprisingly) not that such both and painted benches there. Delamont Park did not function in the same way. They were lagged in the past, when they were roughly 1 m 20 cm in diameter. Their offshoots have more green high and provide much needed urban canopy. Their root system is well established, and deep with no risk of wind uproot. The wood, which is some of Vancouver's hidden gems, will be cut down should the project continue.</p> <p>4. Neighbourhood: Hillside</p> <p>5. Full name: [REDACTED]</p> <p>6. | Public Hearing Correspondence Case | 101016127317 311 | UNANSWERED LOCATION | UNR 311 | <p>app version: 1.12 original address: 311 UNANSWERED LOCATION</p> <p>1. Subject (address if applicable) 2006-2008 West 7th Avenue, and 2001 West 8th Avenue 2. Position Option 3. Comments Bluebird Wood The Project's site itself is home to a remnant of CFB woodland, dating back perhaps more than a 100 years. It was planted at some time in the past with cypress, and bluebirds. These are splintered ancient trees logged down to stumps, which, then, showing great resilience grew up again, and colonized the area during the head down. So much land surprisingly left, that local bulk and painted benches there. Delorain Park did not function in the same way. This wood function wonderfully as an example to local children, and perhaps when the City tries to complete to many other children, as an example of RESILIENCE. They were logged in the past, when they were roughly 1 to 20 cm in diameter. Their offshoots have since grown high and provide much needed urban canopy. Their root system is well established, and deep with no risk of wind-prod. Their extensive root system, like that of other large trees serves to drain storm water to GARDENS. They are beautiful, a large, healthy and resilient tree. The arboretum report, describe their site as "consisting of three lots totaling 44 acres in size between residential streets and the Arbutus Greenway to the west. The southern lot along 8th Ave currently has no buildings on site and is reserved in part. The two lots along 7th Ave have on-site structures, however there is a walking path through it with park benches. These two lots are mostly grass with multiple street-level trees. The dominant on-site tree species is Norway spruce (Picea platensis) ? This wood, which is one of Vancouver's hidden gems, will be cut down should the project continue. There are a number of three-story walk-up nearby, which feel the heat quite badly, being heat islands. Yes, heat islands do exist in this part of Arbutus along Arbutus and are shown clearly on the attached map. Delorain Park, the ladder playground facility, in contrast, was still an overnight, because of its silica sand floor, which absorbed heat. Sun enough if you look at the DTES heat map from the Urban Forest Strategy.pdf, this woodland shows up as a pale blue rectangle 3 blocks below Broadway on Arbutus. (If you believe that pale blue square on the 1st red rectangle classified as "Land Surface Temperature on a hot summer day (Image C12-40 MAPPING URBAN HEAT p.11 p.17" [see area of Senior non-profits trail]) Another map relating to Urban Forest Canopy reveals this part of Arbutus 16, to lack Canopy (attached). The Arbutus Greenway has successfully connected parks for social interaction, play, and recreation. It provided connections to neighbourhoods, parks, and other points of interest along its way, without denying opportunities for urban ecology, urban agriculture, and the RUBAL WILDLING of remnant woodlands. Many large trees will be lost because of the construction attendant to the Broadway Plan. Like MDP in Mount Pleasant, this bluebird wood in Kits, forms part of the neighbourhood character, and is a CDV hidden gem. 4. Neighbourhood Kitsano 5. Sub-theme 8-22(1) 6. There are a number of three-story walk-up nearby, which feel the heat quite badly, being heat islands. Yes, heat islands do exist in this part of Arbutus along Arbutus and are shown clearly on the attached map. Delorain Park, the ladder playground facility, in contrast, was still an overnight, because of its silica sand floor, which absorbed heat. Sun enough if you look at the DTES heat map from the Urban Forest Strategy.pdf, this woodland shows up as a pale blue rectangle 3 blocks below Broadway on Arbutus. (If you believe that pale blue square on the 1st red rectangle classified as "Land Surface Temperature on a hot summer day (Image C12-40 MAPPING URBAN HEAT p.11 p.17" [see area of Senior non-profits trail]) Another map relating to Urban Forest Canopy reveals this part of Arbutus 16, to lack Canopy (attached). The Arbutus Greenway has successfully connected parks for social interaction, play, and recreation. It provided connections to neighbourhoods, parks, and other points of interest along its way, without denying opportunities for urban ecology, urban agriculture, and the RUBAL WILDLING of remnant woodlands. Many large trees will be lost because of the construction attendant to the Broadway Plan. Like MDP in Mount Pleasant, this bluebird wood in Kits, forms part of the neighbourhood character, and is a CDV hidden gem. 4. Neighbourhood Kitsano 5. Sub-theme 8-22(1) 6. | Public Hearing Correspondence Case | 101016127460 311 | UNANSWERED LOCATION | UNR 311 | <p>app version: 1.12 original address: 311 UNANSWERED LOCATION</p> <p>1. Subject (address if applicable) 2006-2008 West 7th Avenue, and 2001 West 8th Avenue 2. Position Option 3. Comments Bluebird Wood The Project's site itself is home to a remnant of CFB woodland, dating back perhaps more than a 100 years. It was planted at some time in the past with cypress, and bluebirds. These are splintered ancient trees logged down to stumps, which, then, showing great resilience grew up again, and colonized the area during the head down. So much land surprisingly left, that local bulk and painted benches there. Delorain Park did not function in the same way. This wood function wonderfully as an example to local children, and perhaps when the City tries to complete to many other children, as an example of RESILIENCE. They were logged in the past, when they were roughly 1 to 20 cm in diameter. Their offshoots have since grown high and provide much needed urban canopy. Their root system is well established, and deep with no risk of wind-prod. Their extensive root system, like that of other large trees serves to drain storm water to GARDENS. They are beautiful, a large, healthy and resilient tree. The arboretum report, describe their site as "consisting of three lots totaling 44 acres in size between residential streets and the Arbutus Greenway to the west. The southern lot along 8th Ave currently has no buildings on site and is reserved in part. The two lots along 7th Ave have on-site structures, however there is a walking path through it with park benches. These two lots are mostly grass with multiple street-level trees. The dominant on-site tree species is Norway spruce (Picea platensis) ? This wood, which is one of Vancouver's hidden gems, will be cut down should the project continue. There are a number of three-story walk-up nearby, which feel the heat quite badly, being heat islands. Yes, heat islands do exist in this part of Arbutus along Arbutus and are shown clearly on the attached map. Comments: Bluestad Wood The Project's site itself is home to a remnant of CFB woodland, dating back perhaps more than a 100 years. It was planted at some time in the past with cypress, and bluebells. There are splintered ancient trees logged down to stumps, which, then, showing great resilience grew up again, and coated the area during the head-down. Such a kind of surprising life, that took both old and younger branches there. Delmont Park did not function in the same way. The wood function was different as an example to local children, and perhaps when the City was a completed to many other children, as an example of RESILIENCE. They were logged in the past, when they were roughly 10 to 20 cm in diameter. Their afflictions have since grown high and provide much needed urban canopy. Their root system is well established, and they with no risk of wind-prostrate. Their extensive root system, like that of other large trees serves to draw storm water to ACQUAFLO. These are beautiful, a large, healthy and resilient tree. The arborist report describes their site as "consisting of three lots totaling 44 acres in size between residential streets and Arbutus Greenway to the east. The southern lot along 8th Ave currently has no buildings on site and is vacant in part. The two lots along 7th Ave have no on-site structures, however there is a walking path through with park benches. These two lots are mostly grass with multiple scattered trees. The dominant on-site structure is a former maple (Acer platanoides). This wood, which is one of Vancouver's hidden gems, will be cut down should the project continue. There are a number of trees every walk up nearby, which have had a healthy, being tree stands. The wood stands do most of this part of the site along Arbutus and are shown clearly on the attached map. Delmont Park, the better playground facing it, in contrast, was still not at all, because of its site and floor, which is described. Some enough if you look at the CTS heat map from the Urban Forest Strategy pdf, the wood stand shows up as a park blue rectangle 2 blocks above Broadway on Arbutus. If it be better that park blue square on the 5 red rectangle classified as "Land Surface Temperature on a hot summer day (Degree C) 12-14 MAPPING URBAN HEAT ISLAND 211.pdf" (on one of Senior non-profits blog). Another map related to Urban Forest Strategy reveals the part of Arbutus 16, to look along (attached). The Arbutus Greenway has successfully connected paths for social interaction, play, and education. It has provided connections to neighbourhoods, parks, and other points of interest along its way, without denying opportunities for urban ecology, urban agriculture, and the RURAL WILDING of remnant woodlands. | Fireworks Request Case | 20200016421 | | | 2081 W 7TH AV | | <p>Location: Delmore Park (2081 W 7TH AV) Type of request: Concern/complaint details: Hello, someone has set off large, extremely loud fireworks every night in Delmore Park, at W 7th/Vancouver, for several nights now. Here is some of their address, left in the children's playground this morning. I've tried talking the non-emergency but the way there was to long the fireworks stopped and I hung up. Is there a way to ask a police or to bring a few times in the evening? The park sign says it's closed at night, but most nights there are groups of people on the benches smoking, drinking, doing drugs, and hearing their music. The parents and toddlers to clean up. The surrounding vegetation is still dry when the rain stops. My dog, other pets, and local wildlife are all being harmed by the fireworks - not to mention the humans here. I'm aware that they're not legal in Vancouver - I'm going to report them to the police. I'm also aware of several people who boast of going to Squamish to buy them and set them off in Vancouver. Thanks</p> | 6.22(1) | 6.22(1) | 10/25/2020 | 2022025 | 311, Community Safety and Risk Reduction - Fire Prevention | Title updated to: Fireworks Request Case - Concern |

| Urban Issue on City Property Case | 20200005443 | | 7300 EAST BOULEVARD | | | Location: 7300 EAST BOULEVARD Additional location details: Hello, I would like to report that some homeless people have been sleeping at the Burnard Street end of the Cypress Community garden in Vancouver. Also homeless dumping happens quite frequently in the area. There is one part of a residential house, a bench, a structure that look similar to a washing unit without the tubs, a small set of drawers and numerous chairs, some of which are useful to the garden but wooden ones have been tossed with the park. I've been about closed the City and provide a sign stating "NO SLEEPING" visitors will be fined or something to that effect. I hope some people will ignore this but if not prevent others. Thank you indicate number of structures and/or items at location. (Do these aggressive people or the area? High priority details: A number of pieces of other furniture have been dumped in this location. (Do these items have anything out of a couch. | \$ 22(1) | \$ 22(1) | 9/29/2022 | 2022099 | ENG Streets Operations | Item # 2022099 \$ 15(1)(i) |

| General Feedback Case | 20200003104 | | Unknown | | | Location: none Feedback or Comment: To Whom It May Concern: I live at \$ 22(1) and I would like to report a problem happening recently regarding the Arbutus Greenway. Since the City has put tables and benches on the Greenway along W. 6th Ave. between Burnard and Cypress, the residents of Greenwich on 5th have been experiencing negative impacts due to the gathering of people there. These gatherings that in the beginning seemed like a good idea have resulted in a lot of noise. The people who gather there probably have no idea that the talking and laughing amplifies at our courtyard due to 10 steps of the building and becomes a nuisance that keeps us awake as long as those people are there. A loud example is the French evening on July 20. \$ 22(1) made a big party around 8pm until 3am. I wasn't able to get any rest that night. Can you please remove the tables and benches and allow Arbutus Greenway to be available, usable, gathering and peaceful destination for us to be? | \$ 22(1) | | 9/18/2022 | 2022108 | ENG Streets Furniture | Referred to queue ENG Streets Furniture |
