RE: Residential Parking – Parking Survey Results for 700 W 66th Av

Dear Resident:

The parking survey for your block is now closed and has indicated that:

16% **support** the installation of permit parking regulations
14% **did not support** the installation of permit parking regulations
70% **did not respond** to the survey

Since less than 51% of block households have voted in favour of installing regulations, the survey has **NOT PASSED**.

The RPO regulations will be removed from the block in the coming months and the street will become unregulated.

This website may be helpful explaining parking by-laws on streets with no posted regulations:
<https://vancouver.ca/streets-transportation/unsigned-streets-and-lanes.aspx>

More information can be found regarding the RPO change that is taking place city wide here:
<https://vancouver.ca/streets-transportation/changing-citywide-resident-parking-only-to-residential-permit-parking.aspx>

Future requests will be considered but a year wait is required before submitting a new one.

Thank you for your participation.
