LEGEND:

1800	**AM Peak**	AM Period = 00:00-09:00;
1800	**Midday Peak**	Midday Period = 09:00-16:00
1800	**PM Peak**	PM Period = 16:00-24:00

Note: this does not mean all those hours were collected

Overall Peak Hour is calculated as the sum of the non-crosswalk volumes for all modes. In the case of a tie the first max of the time period is used.

For Mode specific peak hours, the same applies except crosswalk is included
