Centre: Waterloo to Balaclava

What is different? Why?

Widened sidewalk on the north side of the street
• To provide additional space for people walking and running with connections to waterfront parks

Maintain a level sidewalk across driveways
• To bring sidewalk width in line with other sections of the Seaside Greenway

Road narrowed between Waterloo and Balaclava
• To improve the walking and running surface for people of all ages and abilities

Front boulevard on the north side of the street widened to 2.7m
• To provide a more comfortable pedestrian experience by creating separation between vehicles and pedestrians and improving visibility for all road users

Some existing trees and hedges removed from the street right of way
• To improve visibility for all road users

New street and pedestrian lighting
• To provide lighting levels to current standards and improve visibility for all road users

New street tree planting
• To replace existing trees that need to be removed and to enhance the public realm

Corner bulges at Waterloo St and Balaclava St in association with raised pedestrian crossings
• To improve pedestrian crossings and reduce vehicle speeds

Point Grey Road closed at Trutch in association with bike path and additional park space
• To reduce vehicle volumes and to enhance the public realm
