Load summary table for the purpose of CE Code Rule 8-200 (2/3/4 electric meters)

	Duplex with Secondary Suites or Lock-Off Units						
Descriptions	Principal			Principal Secondary Suite			
	Dwelling	or Lock-off Unit		Dwelling	or Lock-off Unit		
	Metered	Unmetered	Metered	Metered	Unmetered	Metered	
Basic load	as per 8-200 1) a) i) ii)	not required	not required	as per 8-200 1) a) i) ii)	not required	not required	
EVEMS – service, branch circuit See footnote (b)	Installation of EVEMS is subject to the City Electrician's approval.						
Interlocks - electric space-heating and AC loads - footnote (a)	permitted by 8-106 3)						
Interlocks - electric dryers, EVSE, any non-essential loads See footnote (f)	permitted by 8-106 2)						
	6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	use a 25% demand factor for the subsequent range and other loads; as per 8-200 1) a) vii) A)	6000 W plus 40% rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	use a 25% demand factor for the subsequent range and other loads; as per 8-200 1) a) vii) A)	6000 W plus 40% rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	
Electric range	no electric range, gas range provided: use a 25% demand factor for each load (i.e. dryer); as per 8-200 1) a) vii) A)	6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	no electric range, gas range provided: any provided loads as per 8-200 1) a) vii) B)	no electric range, gas range provided: use a 25% demand factor for each load (i.e. dryer); as per 8-200 1) a) vii)	6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	no electric range, gas range provided: any provided loads as per 8-200 1) a) vii) B)	
	6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	no electric range, gas range provided: use a 25% demand factor for each load (i.e. dryer); as per 8-200 1) a) vii) A)		6000 W plus 40% of rating exceeds 12 kW; as per 8-200 1) a) iv); plus vii) A)	no electric range, gas range provided: use a 25% demand factor for each load (i.e. dryer); as per 8-200 1) a) vii) A)		
	no electric ranges, gas ranges provided: any provided loads (i.e. dryers); as per 8-200 1) a) vii) B). 100% of the combined load up to 6000 W, plus 25% of the combined load that exceeds 6000 W			no electric ranges, gas ranges provided: any provided loads (i.e. dryers); as per 8-200 1) a) vii) B). 100% of the combined load up to 6000 W, plus 25% of the combined load that exceeds 6000 W			
Ampere rating of main circuit breaker,	oversized overcurrent device is not permitted	shall be the greater of the calculated load or 60 A	shall be the greater of the calculated load or 60 A	oversized overcurrent device is not permitted	shall be the greater of the calculated load or 60 A	shall be the greater of the calculated load or 60 A	
panelboard See footnote (c)	A panelboard shall be installed in every secondary suite or lock off unit. (Re: <u>BULLETIN 2020-001-BU/EL</u>) The ampere rating of services, feeders and main circuit breakers must be based on the calculated loads connected to these services, feeders, or main circuit breakers. If the calculated current value does not correspond to a standard rating of circuit breaker, the next higher rating is permitted. Except as permitted by this table, oversized overcurrent devices are not permitted.						
8-200 1) b)	not required						

Footnotes: (Also see table above)

- (a) CE Code Rule 8-200 1) a) iii) specifies the use of demand factor permitted by Rule 8-106 3), for the purpose of these Rules, interlocks must be installed for the operation of electric space-heating and air-conditioning loads, so that only one can be used at a time, and the load providing the greater demand shall be used to determine the calculated load.
- (b) Two or more EV chargers (EVSE loads) may be supplied by the same branch circuit connected to an electric vehicle energy management system (EVEMS) provided that the EVEMS is installed in accordance with Rule 86-300 and Rule 8-500.

It is important to note that

- Rule 8-200 1) a) vi) does not specify requirements where EVSE loads are controlled by an EVEMS in accordance with Rule 8-106 10) or Rule 86-300 2).
- So far, a dedicated certification / product standard does not exist for the electrical equipment comprising EVEMS.

- If the EVEMS is intended to represent a complete system containing pieces of approved equipment, such system standard also does not exist.
- EVEMS must be capable to meet all relevant requirements of Subrule 8-106 10) or Subrule 8-106 11) of the CE Code.

Installation of EVEMS is subject to the City Electrician's approval.

(c) The ampere rating of services, feeders and main circuit breakers must be based on the calculated loads connected to these services, feeders, or main circuit breakers. If the calculated current value does not correspond to a standard rating of circuit breaker, the next higher rating is permitted.

Except as permitted by the table above, oversized overcurrent devices are not permitted.

- (d) Upload a single-line diagram with your application in POSSE. (Re: BULLETIN 2001-008-BU/EL)
- (e) BC Hydro should be consulted on the number of meters, and the number and location of supply services. (BULLETIN 2020-007-EL)
- (f) CE Code Rule 8-200 does not specify the use of demand factor permitted by Rule 8-106 2), for the purpose of these Rules, interlocks must not be installed for any essential loads.

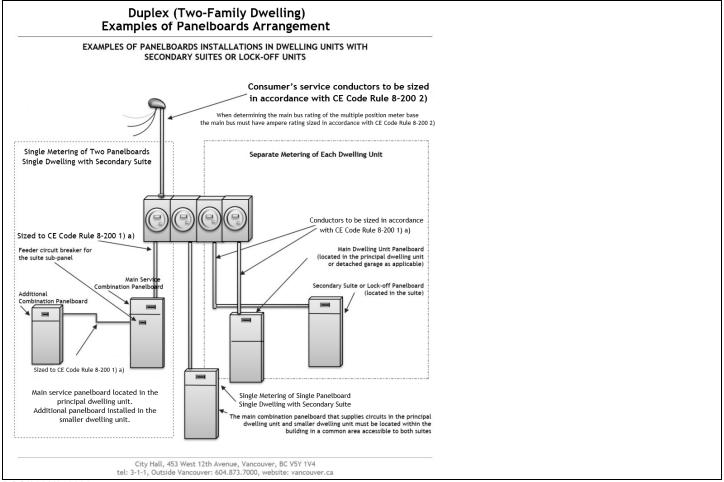

Essential loads	Non-essential loads		
electric hot water heater/tank, electric space-heating except as permitted by 8-106 3), any loads as may be prescribed by the City Electrician	electric range, dryer, sauna heater, water heater for steamer, swimming pool, hot tub, or spa, EVSE, AC		

Electrical By-law requirements and noteworthy information:

Review the Electrical By-law No. 5563.

Review the electrical bulletins (BULLETIN 2020-007-EL, BULLETIN 2020-001-BU/EL, BULLETIN 2019-006-BU/EL, etc.)
