

GOAL: *A sustainable, energy and carbon-efficient community*

Vancouver has the goal of being the Greenest City in the World by 2020. This includes aspirations to reduce dependence on fossil fuels and lead the world in green building design and construction. To achieve this, all neighbourhoods must start to take a more aggressive approach to reducing energy consumption and the production of greenhouse gases (GHGs).

The new Grandview-Woodland Community Plan will be built around three key Energy/GHG objectives.

- OBJECTIVES:**
- 1.0 Encourage the energy retrofits of existing buildings
 - 2.0 Encourage new developments to utilize renewable energy
 - 3.0 Green Building
