**GENERAL NOTES**

1. Refer to architectural drawings for all walls and stair layout and elevations, unless otherwise noted.
2. Refer to electrical drawings for all final landscape lighting layout and specifications.
3. Refer to architectural and mechanical drawings for all drain locations and rim elevations.
4. Refer to arborist drawings for all tree retention / removal information.
5. Refer to civil drawings for all grading and utility information.
6. Refer to survey drawings for all existing on site services and survey symbols.
7. This plan is NOT FOR CONSTRUCTION and is to be submitted for review to Engineering Services a minimum of 8 weeks prior to the start of any construction proposed for public property. No work on public property may begin until such plans receive "For Construction" approval and related permits are issued. Please contact Engineering, Development and Major Projects and/or your Engineering, Building Site Inspector for details.

**IRRIGATION NOTES**

1. All 'Soft Landscape Areas' are to be irrigated with a high efficiency design/build irrigation system, complete with Rain and Wind Sensor.
2. The irrigation system design and installation shall be in accordance with the Irrigation Industry of BC Standards and Guidelines.
3. System design and installation shall take into account elevation differences, sun orientation and other factors affecting zoning and operation of the system to minimized evapotranspiration and wind lost.
4. System design shall provide for uniform complete 'Head to Head' coverage of all lawns and planted areas.
5. Contractor shall be responsible to provide SHOP DRAWINGS a minimum of 3 weeks prior to installation of any irrigation for review and approval.
6. Should the contractor proceed without approval, any additional modifications to the irrigation systems, as directed by the Landscape Architect shall be at contractors cost.
7. Lawns shall be irrigated on separate zones from planted areas.
8. Controller shall be located in mechanical room.
9. PRIOR to Substantial Performance, contractor shall provide a maintenance data and Operation instruction manual containing operational information for all operating components, cleaning and lubrication schedules, overhaul/adjustment schedule.
10. Record Drawings: Submit with the operating and maintenance manuals a reproducible copy of the AS-BUILT condition of the system.
11. Contractor shall instruct a designated representative of the Owner in the complete operating and maintenance procedures for the irrigation system, including winterizing for the first time with the designated representative observing.
12. Use GSR Schedule 40 PVC designed for solvent welding to PVC pipe except where valves, risers, etc. require threaded joints.
13. Provide sleeves under all hard surfaces and as required through walls.
14. Solenoid valves shall be first quality, compatible with the controller selected.
15. Valve boxes shall be reinforced plastic boxes manufactured specifically for landscape irrigation, complete with captive lock bolt cover, sized to suit valves and other components with adequate room for operation and maintenance.

**DESIGN RATIONALE**

The landscape design is inspired by the tradition of the MST Runners, a celebration of connectivity. The land itself becomes the Runner, carrying knowledge from past to the future through the open space of our shared present.

The accessible entrances and pathways throughout the courtyard provide an invitation for passersby to explore. Here, generations meet to share experiences in the solace of the shaded woodland play space. The permeable private spaces, framed by native plantings, are open and welcoming to the shared courtyard.

Planted areas, natural and permeable surfacing are designed to capture rainwater, as well as provide a diverse ecology for pollinators, wildlife, and people to enjoy and use.

Seating nodes are scattered throughout for friends and neighbours to catch up. Large cedar decks offer opportunities for dancing, exercise, and lounging. The open lawn, adjacent to the children's playground, is designed as a space for games and performances. Community gardens, adjacent edible berry plants, and fruit trees offer food for new feasts to bring neighbors together. At the heart of the plan is the welcoming circle, bringing all the elements together as a central wayfinding element and gathering space shared across all nations.

**BIRD FRIENDLY STRATEGY**

Thoughtful consideration has been given to the elements of landscape design and plant selection to align with the City of Vancouver's 'Bird Friendly Strategy Design Guidelines.' Using native tiered planting materials will offer a mix of textures and heights to support bird habitat by creating nesting spaces, food sources, pollination support, shelters, and protection.

To enhance the bird-friendly nature of this development, particular focus will be placed on expanding the urban tree canopy. This includes a significant increase in the number of trees within the site boundaries, as well as the incorporation of street trees along Heather Street and a row of trees along 35th Avenue. These trees will eventually provide shade, perching points, and nesting opportunities.

The planned landscape planting scheme emphasizes canopy and habitat stratification through the inclusion of trees, shrubs, and groundcover plants. The selection of bird-attracting plants, including both native and non-native/non-invasive species, will cater to birds and insects, promoting biodiversity within the site.

- Onsite bylaw trees to be removed: 64
- Replacement trees required at 1:1 or 2:1 ratio (depending on the species selected for replacement).
- Deciduous trees at 6cm caliper minimum
- Coniferous trees at 3.5m height minimum

- Part 1 trees : 44
- Part 2 trees : 20

**LANDSCAPE NOTES**

- All work shall meet or exceed the requirements as outlined in the current Edition of the Canadian Landscape Standard.
- Plant sizes and related container classes are specified according to the Canadian Landscape Standard current Edition. For container classes #3 and smaller, plant sizes shall be as shown in the plant list and the Standard; for all other plants, both plant size and container class shall be as shown in the plant list. Specifically, when the plant list call for #5 class containers, these shall be as defined in the CNLA (ANSI) Standard.
- Area of search for specified plant material shall include the Lower Mainland of British Columbia, Vancouver Island, Washington and Oregon States.
- Contractor shall source specified plant material and only after area of search has been exhausted will substitutions be considered.
- All plant material used on this project shall be hardy in this climate. Plant types have been selected with this as a primary criteria. This Contractor shall guarantee that plant material supplied has equal provenance, ie: it is developed from cuttings or seeds collected in an area of similar climatic characteristics.
- Substitutions in plant material will not be considered unless written proof is submitted thirty (30) days prior to scheduled installation stating a specified plant cannot be obtained within the specified area of search.
- All plants to be sourced from nurseries certified free of P. ramorum.
- Contractor shall not move or work growing medium or additives when they are excessively wet, extremely dry, or frozen or in any manner which will adversely affect growing medium structure. Growing medium whose structure has been destroyed by handling under these conditions will be rejected. Growing medium shall not be handled in wet or frozen conditions.
- Place growing medium, except structural to required finish grades and minimum depths as detailed, unless shown otherwise.
- All growing medium placed on project to meet or exceed BCNTA and Canadian Landscape Standards latest edition.
- All trees to be staked in accordance with CNLA Standards.
- Submit sieve analysis by an approved independent soil testing laboratory for each type of growing medium being used on the project PRIOR to placement for review and approval. Clearly identify source and type for each. Resubmit as required until growing medium is approved.
- Submittals shall be made at least seven (7) days before
- Final spacing, quantity and tree species to the satisfaction of the General Manager of Engineering Services. New trees must be of good standard, minimum 6cm caliper, and installed with approved root barriers, tree guards and appropriate soil. Root barriers shall be 8 feet long and 18 inches deep. Planting depth of root ball must be below sidewalk grade. Call Park Board for inspection after tree planting completion

**PLANT LIST - LEVEL 1 TREES**

TREES symbol	qty	botanical name	common name	size	notes
	09	Acer buergerianum	Trident maple	6cm caliper min.	b+b
	07	Acer circinatum	Vine maple	6'-6" height,	multi-stem, b+b
	19	Acer griseum	Paperbark/Blood-mark maple	5cm caliper	b+b
	07	Acer x Freemanii	Freeman maple	7cm caliper min.	b+b
	04	Acer rubrum 'Bowhall'	Bowhall red maple	6cm caliper min.	b+b
	03	Cercis canadensis	Eastern redbud	5cm caliper min.	b+b
	02	Chamaecyparis nootk. 'Green Arrow'	Nootka Cypress	3' - 4'-0" ht	b+b
	03	Fraxinus americana 'Autumn Applause'	Autumn Applause American ash	6cm caliper min.	b+b
	12	Ginkgo biloba 'Autumn Gold'	Autumn Gold Maidenhair Tree	5cm caliper	b+b, No fruit clusters
	07	Malus 'Royalty'	Royalty Flowering Crabapple	#10 pot	std, b+b
	06	Picea abies 'Aurea'	Golden Norway spruce	5' - 6'-0" height	b+b
	05	Malus 'Golden Raindrops'	Golden Raindrops Crabapple	4cm caliper	std., b+b

Onsite bylaw trees to be removed: 64  
 Replacement trees required at 1:1 or 2:1 ratio (depending on the species selected for replacement).  
 Deciduous trees at 6cm caliper minimum  
 Coniferous trees at 3.5m height minimum

Part 1 trees : 44  
 Part 2 trees : 20
