*The service providers listed here have provided their information to the City of Vancouver and their inclusion on this list does not constitute endorsement or recommendation by the City of Vancouver. This list is not exhaustive and other service providers may be available.

For testing conducted to meet the requirements of the City of Vancouver Operating Permit program (vancouver.ca/operating-permit), it is an owner’s responsibility to verify that the service provider meets the requirements of Vancouver Building By-law Book II, Division B, Article 2.2.1.7. (reference: free.bcpublications.ca/civix/document/id/public/vpbl2019/2045666158). The City of Vancouver does not guarantee the quality of any services rendered by these service providers.

Service providers: To be included in this list or to update information, please contact operatingpermit@vancouver.ca. This list is revised periodically, as new information is received.

Sample collection & transportation: Water samples for *Legionella pneumophila* analysis must be collected by qualified persons (such as holders of the EOCP Building Water System Operator certification, or equivalent) and transported appropriately to a qualified laboratory for analysis.

Sample collection and transportation guidelines are available on the City of Vancouver Operating Permit webpage: vancouver.ca/operating-permit

Sample collection and transportation services may be provided by laboratories; independent consultants; or water treatment, mechanical or pool services companies.
