Dear: Resident or Business,

RE: Nanaimo Street Upgrades - Upcoming Construction from McGill St to 4th Ave

Starting next year, the City will be upgrading critical sewer infrastructure along Nanaimo between McGill Street and E 4th Avenue. In coordination with this work, there is also an opportunity to upgrade the street to make it safer and more comfortable for everyone and to better serve the neighbourhood.

Construction is scheduled from early 2019 to spring 2020. Please refer to page 3 for a map of the project area.

Join us for an Open House

Come by to meet the project team, ask questions, provide feedback on elements of the street design, and get more information about construction.

Date: Tuesday, November 13, 2018
Time: 5:00-8:00 PM
Location: Kiwassaa Neighborhood House, 2425 Oxford St

Share your feedback on the following potential changes to Nanaimo St:

- Removal of a travel lane, where excess vehicle capacity exists between 2nd Ave and Pandora St, to reduce crossing distances for people walking, discourage speeding and create a more comfortable experience on the street
- Upgrades to pedestrian crossings at ten key intersections
- Installation of a painted bike lane, as well as improvements for people cycling at key intersections to reduce conflicts with vehicles
- New left-turn lanes down the centre of the street, with new centre medians where possible
- Traffic signal upgrades at five key intersections
- Repaving of the street surface
- Sidewalk repairs where needed

Visit vancouver.ca/nanaimoupgrades to view the Open House materials (available in early November) and sign up for upcoming newsletter updates. The project team can be contacted at nanaimoupgrades@vancouver.ca and feedback on the recommended designs is open until **Sunday, December 2, 2018**.

Why this work is taking place

Sewer Upgrades: Work includes replacing the sewer with a separated and larger-capacity system that will have one pipe for rainwater runoff and another pipe for sanitary sewer. The new system will have a life expectancy of approximately 100 years.

This sewer separation will also contribute to the annual 1% sewer separation target set by the Metro Vancouver Integrated Liquid Waste and Resource Management Plan, as well as the Province of BC's 2050 sewer separation target.

Transportation Improvements: Nanaimo is an arterial street, a truck and bus route, and provides an important connection to local neighbourhoods. The Grandview-Woodland Community Plan process identified upgrades to Nanaimo Street as an opportunity to better serve the local community. This is closely aligned with Transportation 2040, related City policy, as well as community feedback.

Kind Regards,

Ivan Malis P.Eng., PMP
Senior Project Manager, Project Delivery Branch
City of Vancouver
