RE: 1111 Vancouver Avenue – Notice of Noise By-law Exception Permit

Dear Residents,

Please be advised that a noise by-law exception permit has been granted by the City of Vancouver at 1111 Vancouver Avenue for Saturday, June 8, 2019. Work will begin at 7:30AM (which is 2.5 hours earlier than the City's Noise By-law allows) and will continue until 6:00PM.

The early start is required to complete a concrete pour that cannot be broken into multiple stages. There will be several pieces of equipment operating that include: a concrete pump and a compressor. The noise will consist of diesel engines, moving equipment, and a light humming noise from the drills, compressors, and other tools.

The following steps will be taken to mitigate the noise impact: staff will be required to use radios and refrain from raising their voices, high impact work (e.g. rebar placement) will be held until after 10:00AM, and we have implemented a plan to minimize the need for backing up vehicles in order to reduce the impact from back-up beepers.

We apologize for any inconvenience during the hours described above. Should you have any questions, please do not hesitate to contact our site management staff at 604-123-4567 or the site superintendent, Taylor Ryan, at 604-765-4321 (cellphone).

Our team at ACME Construction would like to thank you in advance for your patience and cooperation in this matter.

Yours truly,

ACME Construction Ltd.
