3	School Travel Patterns
4	Action Plan and Next Steps
	Appendix A: Action Plan
	Appendix B: Map Package
	Appendix C: Surveys

In 2018, Tecumseh Elementary (Tecumseh) began the City of Vancouver's School Active Travel Planning (SATP) program. This program is a partnership between the City and the Vancouver School Board.

The SATP program encourages and promotes walking, cycling, and rolling to school. The program's focus is to:

- Improve the safety and comfort of walking, cycling, and rolling infrastructure around schools
- Increase education and awareness around active travel

The program is supported by the City of Vancouver's long-range Transportation 2040 Plan. This document includes policies to support the encouragement, promotion and education of sustainable travel in school and to move towards zero traffic fatalities and serious injuries. Transportation 2040 also sets a target that at least two-thirds of all trips will be made by foot, bike, and transit.

The SATP program is a community-based model for implementing school travel planning. Known collectively as the 5E's, the program takes a comprehensive approach to support active and sustainable travel to and from school. The 5Es are:

- **Evaluation**: Collect information to understand context and monitor changes.
- **Engineering**: Improve infrastructure near the school.
- Enforcement: Increase compliance with traffic laws and parking regulations.
- **Education**: Change perceptions of active travel and support programs to improve safety and reduce conflicts between modes.
- **Encouragement**: Promote active travel as a fun, easy and exciting way to get to school.

The SATP process is defined by four phases of implementation over two to three years (see Figure 1).

Figure 1. School Active Travel Planning Process

The City of Vancouver, the Vancouver School Board, the Principal and the Parent Advisory Council (PAC) are the key partners in this process. Other stakeholders may be involved in the program, such as the Vancouver Police Department (VPD), Insurance Corporation of B.C. (ICBC), Translink's TravelSmart and other community organizers or agencies. Please see Appendix A for each stakeholder's action item moving forward. Tecumseh's current catchment area is bordered by E 33rd Av to the north, Victoria Dr to the east, E 49th Av and E 45th Av to the south and Knight St and Argyle St to the west (see map in Appendix B). In 2018, Tecumseh had 440 enrolled students. The student population is diverse, with approximately 40% of students identifying English as a second language.

During phase 1 of the program (September 2018-January 2019), City staff collected information and engaged with parents and school staff to learn about the school. Figure 2 summarizes the public engagement and data collection conducted in this phase.

Take-home surveys, in class hands-up surveys, visits to the school site and meetings with parents and staff helped generate a better understanding of the transportation challenges and opportunities at Tecumseh.

**Walking**: Tecumseh is bordered by three local streets (Commercial St, E 43rd Av, and Beatrice St) and an aterial street (E 41st Av); all of which have sidewalks on both sides of the street. Students arrive at the school from every direction of the neighbourhood. Improving safety along Commercial St was identified as a top concern, as this is where the majority of pick up and drop off activites happen. Additional concerns included the following:

- Enforcement of moving and parking violations especially during pick up / drop off along the perimeter of the school
- Improving the crossing at E 41st Av and Commercial St
- Missing curb on Beatrice St
- Visibility of pedestrians crossing at E 43rd Av and Beatrice St
- No marked crossings across E 43rd Av at Commercial St
- Visibility of pedestrians crossing (W-E) Commercial St from laneway south of E 41st Av

**Biking and Rolling (wheelchairs, skateboards and scooters)**: The closest bike routes around Tecumseh include Dumfries St and E 47th Av. The percentage of students that cycle to or from school is low, less than 1% of the student population. Many parents cited age as a barrier for them to allow their child to cycle to school. Additional concerns included:

- Living too far away to bike
- Lack of bike infrastructure with direct connections to the school
- Uncomfortable allowing children to bike alone

**Taking Transit**: The closest transit routes to the school are along E 41st Av and Victoria Dr. A small number of students take transit to or from school. However, service along 41st Av will improve with the implementation of the 41st B-Line.

**Driving**: Commercial St is the primary pick-up and drop-off locations for the school. People driving to and from the school are encouraged to travel in a counter-clockwise direction to use designated pick-up and drop-off areas.

A school infrastructure map is included in the report to help students and families plan a comfortable and convenient route to school (see Appendix B).

During phase 1, of the program, an in-class hands-up survey and a take-home survey for parents were used to learn about families travel patterns. These surveys give every student and family a chance to provide feedback. The collection process is summarized in the table below and the survey questions can be found in Appendix C.

Hands-Up Survey				
Number of Divisions (Students Trips)	18 out of 19 divisions participated (2, 899 Trips Recorded)			
Hands-Up Survey dates	October 15 - 18, 2018			
Take-Home Survey				
Approximate Response Rate (Students Enrolled)	58 % (of 440 students)			
Number of Surveys	257 surveys			
Take-Home Survey Dates	October 15 - 26, 2017			

In the hands-up survey, an average of 60% of students reported walking to school and 34% reported being driven (see Figure 3). Students also carpooled (about 2%), cycled (about 8%), and took transit (about 5%).

### Figure 3. Hands Up Survey - Transportation Modes

School Active Travel Plan | Tecumseh Elementary

In the take-home survey, families reported on their travel patterns and barriers to active travel. The majority of parents reported that convenience ("on the way to somewhere else" and "quicker") and safety were the primary reasons they drove (see Figure 4). Initiatives that target these issues, such as group travel initiatives (like walking school buses) and VPD pedestrian safety presentations may be useful at the school.

Figure 4. Reasons To Drive

Most parents expressed they would allow their child to walk more often to or from school if they were older, lived closer, or walked with others. Group travel would likely help families who felt they would allow their youngest to walk if they were older or walked with others (see Figure 5). For families who want to live closer, biking may bridge the distance gap.

Figure 5. Parents Would Allow Youngest Child to Walk More If...

Additional survey results can be found in Appendix C.

An action plan for the school has been created through collaboration and consultation with the school administration, the PAC, VSB staff, City staff and other local stakeholders. This plan will guide the implementation of the 5Es in the coming years.. A summary of the infrastructure improvements can be found in the map below (Figure 6) and a detailed action plan and implementation can be found in Appendix A.

### Figure. 6 Proposed Infrastructure Upgrades

These infrastructure improvements are targeted at areas where students are walking and biking. The improvements above:

- Create more comfortable facilities
- Increase the visibility of students using facilities
- Communicate clearly to students where they should cross

Beyond the scope of the action plan, the school community and City will continue to look for continual educational resources to support school active travel such as:

- Partnering with award winning children's entertainers Will Stroet of Will's Jams and Charollette Diamond to inspire road behaviour through the following:
  - "Grandma On the Move" traffic safety song and music video
  - "Grandma On the Move" children activity book
  - School concert
- Collaborating with school adminstrators and the PAC to develop "active travel signage" designed by students to highlight their school as active travel zones
- Encourage school adminstrators to apply for the City of Vancouver's Walk +Bike + Roll mini grants to support active travel events such as "Bike to School Week" or "Walk to School Week"
- VPD pedestrian safety talks

The City of Vancouver looks after action items related to evaluation and engineering. The City, the SATP partners and other organizations work together to provide the 3Es.

- Enforcement: VPD, ICBC and City of Vancouver Parking Enforcement
- Education & Encouragement: The school, PAC, VPD, ICBC, Translink, City of Vancouver and community organizations

Details of these actions are also provided in the Action Plan in Appendix A. Additional resources in the appendices include:

- A transportation infrastructure map for families planning their active travel routes to school (Appendix B).
- A parking map to promote safe pick-up and drop-off behaviour around the school (Appendix B).
- Extended survey results for use by the school community (Appendix C).

In phase 4, the City will lead another data collection process to measure the success of the initial action plan and as a check-in point to update the plan.

Vancouver Police Department (VPD)				
Pedestrian Safety Presentation Present to students on walking safety		Anticipated 2019-2020	To encourage safe walking behaviour.	
Enforcement.Enforce any moving violations as requested by the school		Ongoing	To encourage safe pick up and drop off behaviours	
TravelSmart				
Present Transit 101 Present to grade 6 and 7 students on sustainable travel choices		Anticipated 2019-2020	To increase student's awareness of active travel options in Vancouver.	

The following package is intended to provide all families at the school with the information to plan their route to school however they travel. Both maps can be sent home and posted within the school for review.

The infrastructure map (and accompanying back page) helps families make the best decision about their active travel route to school. The map of parking (and accompanying back page) near the school lays out the different types of parking available for parents.

### **Tecumseh Elementary ~ Active Travel Infrastructure Map**

### **Safety Tips**

Safe places to cross the street are at the corner of the street with a stop sign, traffic or pedestrian signals or at a marked crosswalk.

Always make eye contact with others before crossing the street.

Traffic Circles - Cars or bikes should yield to the right and stop for people walking.

Disclaimer: This map is produced as a public resource for general information purposes only. The City, it's employees, officers, directors and representatives do not guarantee the accuracy of the information contained therein nor warrant the safety of any route, highway, road, street, designated cycling route or other shown in the map information.

September 2019

### **Active School Travel**

Walking, cycling, and rolling benefits students, the community, and the environment.

**Environment** 

Reduces car travel to school, in turn decreasing traffic congestion, greenhouse gas emissions, and air pollution.

Community

Creates opportunities to engage with neighbours and socialize on the way to and from school.

Student

Leads to healthier, happier and more alert learners through increased physical activity.

Health

Inspires actve travel habits early in life that carry into adulthood.

Walk+Bike+Roll Getting Around the Vancouver Way

road, street, designated cycling route or other shown in the map information.

### LEGEND

### **3 mins Parking (School Days)**

These spots are for quick pick-ups and dropoffs. Park and collect your child guickly to create a spot for another vehicle.

### 30 mins Parking (School Days)

These spots are for quick pick-ups and dropoffs or for parents that would like to stay on the school site for no more than 30 minutes.

### No Stopping (Anytime)

Vehicles cannot stop in a No Stopping zone for any reason, or any length of time. No Stopping signs without time limits are in effect at all times.

7AM.7PM

### No Stopping (School Days)

Vehicles cannot stop in a No Stopping zone for any reason, or any length of time. This gives emergency vehicles somewhere to park during school hours.

### No Stopping (7am-7pm; 7 days a week)

Vehicles cannot stop in a No Stopping zone for any reason, or any length of time between 7am-7pm due to transit priority along 41st Av.

#### School Drop **Off/Pick Up** Zone

### **Support Active Transportation**

Keep the area around your school a safe place to walk. cycle and roll by following the posted signs. If you are driving, consider the "Drive to Five" initiative. Park five mintues away and walk to school. It is an active way to start and end the day.

Sept 2019

### **Appendix C: Surveys**

Appendix C contains additional surveys results as well as the hands-up survey form distributed to classrooms and take-home survey distributed to families.

The results in the figures below are a continuation of those in Figure 3. The surveys asked parents how their youngest child travels to school and their relationship with active travel. Comparing the hands-up survey (Figure 3 on page 7) with the take-home survey (Figure 7 below), active travel mode share is greater in the take-home survey results. This may be related to the difference in wording in the survey questions ("how did you travel to school" vs. "how does your youngest child *usually* travel to school") however it is likely related to self selection for the survey. Families that choose active travel may be more likely to fill out a survey on active travel.

### Figure 7. Take Home Survey Results - Transportation Mode Share

Families were also able to give details about how often their youngest child walks or bikes as well as how often these journeys take (Figure 8 to Figure 11). These results show the majority of students walk regularly ("almost everyday" or "2-3 days a week").

The majority of students do not cycle to or from school. Parents felt that they would allow their child to cycle more often to or from school if they were older, better cycling routes were available, and cycled with others (Figure 12). Participation in active travel events such as "Bike to School Week" may assist in promoting cycling as an active travel mode to or from school.

### Figure 8. Frequency of Walking Trips To / From School

Figure 9. Duration of Walking Trips To / From School

At Tecumseh, the majority of parents expressed interest in safety improvements to Commercial St (Figure 13). This is largely due to the fact that the majority of students are picked up and dropped off along Commercial St, adjacent to the key entrance of the school faces onto.

Figure 11. Duration of Cycling Trips To / From School

Ce document contient des renseignements importants qui pourraient vous concerner. Veuillez demander à quelqu'un de vous le traduire.

Dear Tecumseh Elementary School Parent:

Tecumseh is participating in the City of Vancouver's School Active Travel Planning Program to encourage and promote walking, cycling and rolling to school. The program takes place over two years and includes several types of projects to address barriers to active travel such as:

- Gathering information from students and families about their travel choices.
- Creating a school travel action plan.
- Upgrading transportation infrastructure near the school.

Studies have shown that active travel has many benefits for students, the community, and the environment, including: increasing physical activity among students, leading to healthier, happier, and more alert learners, reducing car travel to school, in turn decreasing traffic congestion, greenhouse gas emissions, and air pollution and inspiring active travel habits early in life to carry into adulthood.

To learn more about the program, please visit vancouver.ca/school-active-travel.

Your feedback is important to the success of the program. Please take 10 minutes to complete the attached survey and tell us about your family's travel choices. This information will help us create a school travel plan that considers the needs of the school's students and families. In addition, as part of the City's Transportation 2040 Plan, survey data will be shared with the 41<sup>st</sup> B-Line project team. For more information on the 41<sup>st</sup> B-Line please visit <u>https://www.translink.ca/Plans-and-Projects/B-Line-Consultation.aspx</u>.

#### Please return ONE survey per family by Friday, October 26, 2018.

If you have any questions about the survey or the School Active Travel Program, please contact our team at <u>schoolactivetravel@vancouver.ca</u>.

Thank you,

Liliana Quintero Transportation Engineer Engineering Services City of Vancouver <u>schoolactivetravel@vancouver.ca</u>

### School Active Transportation Planning Transportation Survey

te X HX

This survey is part of the City of Vancouver's School Active Travel Planning program which seeks to improve the safety and comfort of walking, cycling, and rolling to school. **Your input is vital** to the success of this program.

Div:

### Please fill out ONE survey per family and return it with your youngest child by Oct 26, 2018.

### Tell us about your family...

1. How old are your children attending Tecumseh Elementary School?

Child	Age	Child	Age
1		1	
2		2	
3		3	

- 2. What is your postal code?
- 3. Do you live in the school's catchment?
  - Yes
  - No

### Tell us about driving...

- 5. How often is your child **driven TO** school?
  - Almost everyday
  - 2-3 days per week
  - **2**-3 times per month
  - 2-3 times per year
  - Never

- How does your **youngest** child usually get <u>TO</u> school? (Select one)
  - Walk
  - Bike
  - Roll (e.g. wheelchair, skateboard, scooter)
  - Bus or Skytrain
  - Carpool (Your children travelling with other children)
  - Car (Your children only)
  - **D** Other:

- 6. If you ususally drive your **youngest** child **TO** school, what are the most important reasons why? (Select top three)
  - I'm worried about traffic safety (e.g. traffic volume, speed of vehicles)
  - I'm worried about my child's safety (e.g. being alone, getting lost)
  - It's quicker for me to drive them
  - □ It's on my way to somewhere else
  - Weather
  - My child is too young to travel to school by walking, cycling, or rollng
    Other

### Tell us about transit and driving...

 If you drive, please tell us where you ususally drop-off & pick-up your child. Please review the map below and identify your pick up and drop off locations

Location				
Pick-Up				
Drop-off				

- 8. When driving, my pick-up & drop-off location is chosen based on (Select all that apply)
  - Promixity to the entrance of the school
  - Access to parking
  - Part of quickest route to school
  - □ No space available elsewhere
  - Promixity to accessible entrance (e.g. ramps, curbs)
  - Never drive to school
  - Other

- 9. During pick-up & drop-off I usually stop or park my car for?
  - □ 1-2 minutes
  - □ 3-5 minutes
  - 6-15 minutes
  - +15 minutes
  - Never
- 10. How often does your child **transit <u>TO</u>** school?
  - □ Almost everyday
  - 2-3 days per week
  - 2-3 times per month
  - 2-3 times per year
  - Never
- If your child transits to school, please specify the bus number(s) and / or Skytrain line(s) below.
- 12. I would allow my child to **transit** to and from school more if (*Select top three*)
  - We lived closer
  - □ They were older
  - They took transit with others
  - There were no transfers
  - There were bus stops closer to the school
  - There was a better bus route
  - Nothing I can think of would make a difference
  - Other

Tell us about walking and biking to school...

- 13. How often does your **youngest** child walk <u>TO</u> school?
  - Almost everyday
  - 2-3 days per week
  - 2-3 times per month
  - 2-3 times per year
  - Never
- 14. How long does it take your **youngest** child **TO** walk to or from school?
  - □ 1-5 minutes
  - **G** 6-10 minutes
  - 11-20 minutes
  - +20 minutes
- I would allow my **youngest** child **to** walk to and from school more if (Select top three)
  - We lived closer
  - □ They were older
  - □ They walk with others
  - There was a better walking route
  - There were fewer cars around the school during pick-up & drop-off
  - Nothing I can think of would make a difference
  - Other

- How often does your youngest child bike <u>TO</u> school?
  - □ Almost everyday
  - 2-3 days per week
  - 2-3 times per month
  - 2-3 times per year
  - Never
- 10. How long does it take your **youngest** child **TO bike** to or from school?
  - 1-5 minutes
  - **G** 6-10 minutes
  - 11-20 minutes
  - +20 minutes
- I would allow my **youngest** child **to bike** to and from school more if (Select top three)
  - We lived closer
  - They were older
  - They cycle with others
  - □ There was a better biking route
  - There were fewer cars around the school during pick-up & drop-off
  - There were secure bike racks
  - □ They knew how to bike
  - Nothing I can think of would make a difference
  - Other

Again, here is a map of your child's school and surrounding area

19. Please tell us about one or two areas, if any, you are concerned about near the school.

Location	Concern
1	
2	

20. Do you have any other comments about your child's journey to school?

Thank you for completing this survey!
