

# Project Timeline

10th Ave Corridor Phase 3 Open Houses

The 10th Ave Corridor project kicked off in 2015 with launch events in July and public open houses in October. Since then, numerous events and sessions have been held with stakeholders, residents, and businesses for the 10th Ave Corridor.

To view the materials and feedback from previous events, please visit: [vancouver.ca/10th-avenue](http://vancouver.ca/10th-avenue)

10th Ave Corridor Improvements - Process

## Engagement

- #ThisIsHowWeRoll photo sweepstakes (July 2015), VGH Bike-apalooza (Sept 2015), Bike to Work Week (Oct 2015)
- Phase 1 open houses to gather feedback and help identify challenges and opportunities (Oct 2015)
- Meetings with key stakeholder and advisory groups (started Fall 2015 - ongoing), stakeholder workshops (Feb 2016)

Summer 2015 to Early 2016

## Analysis and Design

- Review feedback and conduct additional analysis
- Staff prepare preliminary design options
- Phase 2 open houses for design options in Health Precinct (April 2016)
- NEW: Creation of Health Precinct - Accessibility Working Group, 2 working sessions (July & Oct 2016)

Fall 2015 to Fall 2016

## Refinement and Reporting

- Design refinements based on public feedback ..... Fall 2016
- Phase 3 open houses - Staff present recommended design for Health Precinct & proposed designs for Quebec to Guelph and Commercial to Victoria to the public for feedback (Nov 2016) ..... We Are Here
- Staff present final recommended design to City Council ..... Early 2017

**Construction: 10th Ave Health Precinct, 10th Ave Quebec-Guelph, 10th Ave Commercial-Victoria**

Late 2017

**Improvements for other areas of the 10th Ave Corridor**

2019 onward

## What about the rest of the 10th Avenue Corridor?

Changes to other segments of the 10th Ave Corridor will be made under City’s Cycling Spot Improvement Program.

The 10th Ave Corridor is comprised of a variety of residential, commercial, and health services areas with diverse needs and functions. Today we looked at three high-traffic volume segments on 10th Avenue. Following this consultation event we’ll continue to refine our recommended and proposed designs, while also working to improve other areas along the 10th Avenue corridor.

The types of changes under consideration to address safety and comfort for people walking and cycling in the future include:

- Improving 10th Ave near Granville St
- Improving 10th Ave near Yew St
- Improving safety at existing traffic circles
- Installing traffic diverters
- Traffic signal improvements
- Lighting improvements
- Installing corner bulges
- Removing parking in key locations

Work on future spot improvements is not anticipated to begin until 2019. Local residents and businesses will be invited to provide feedback on local spot improvements along the remaining portions of 10th Ave Corridor as they are developed.

### Cycling Spot Improvement Program

As part of the Transportation 2040 plan, the City has implemented an ongoing Cycling Spot Improvement Program for existing bicycle routes.

The program intends to address:

- Travel comfort for people of all **ages and abilities**
- **Safety** at locations with a high number of collisions
- **Capacity and continuity** of the bicycle route network

#### Spot Improvement Locations

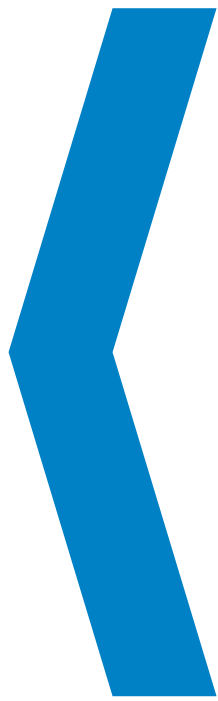

More than 100 spot improvement locations have been completed since the adoption of the Transportation 2040 plan in 2012.

These improvements reduce motor vehicle volumes and speeds while making it easier to cross busy streets on foot and bicycle.

For information on the Cycling Spot Improvement Program visit:

[vancouver.ca/spotimprovements](http://vancouver.ca/spotimprovements)

## Review

Staff will compile and analyze all feedback received through the process and consider adjustments to the designs.

## Report

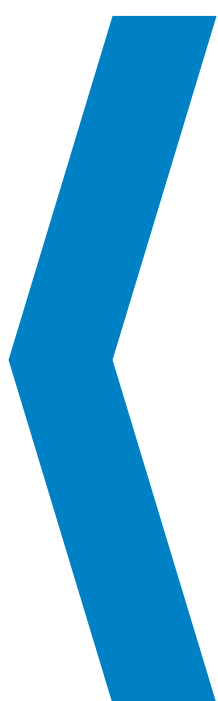

Final recommended designs will be presented to Council Advisory Committees and Council in early 2017. Stakeholders and members of the public will have the opportunity to speak or write to Council to express their opinions on the recommendations.

## Construction

Pending Council approval, reconstruction of 10th Ave in the Health Precinct (Oak St to Cambie St), Quebec St to Guelph St, and Commercial Dr to Victoria Dr is expected to begin late in 2017.

## Future Improvements

Future changes to other portions of 10th Ave Corridor (outside of segments presented here) will be done under the City's Cycling Spot Improvement Program.
